STATE UNIVERSITY OF NEW YORK
AT STONY BROOK
LETTER FROM
THE EDITOR

I wonder whether in the future years our class will be remembered as the last class to hold graduation exercises at Oyster Bay, or as the first class graduating from Stony Brook. Upon reflection, I think the class of '63 would like to be remembered as both, for we are the only link between the two campuses.

I suppose all universities start with one or two buildings, a small staff, and an equally small student body on a campus. Furthermore, the staff, student body, and number of buildings grow from year to year. We, in a biological sense, are the class that has witnessed the growth from the pulpa to the larvae. As each stage is distinct, yet related, so are the Cox Estate and the McVille grant distinct, yet related. The former begins to show signs of wear on its delicate surroundings, because of phenomenal growth; the latter shows all the signs of emerging as a powerful giant in its world. Each so admirably serves its purpose.

Let all of us at State U., students-alumni-faculty, remember that the time of transition is short and never to be repeated. Savor the sweet remembrances of the first few years, but strive to make future memories so much larger, as befitting.

How's the grass ever going to grow?
Now, how do I get the needle out of my finger?

Dance with me, Harvey!

So this is what it's like to be tall!

I have very little to say today.
ORGANIZATIONS AND ACTIVITIES
ADVISORY JUDICIARY COMMITTEE

The eleven students composing the Advisory Judiciary Committee are appointed by the Executive Committee of the Polity, from a list of volunteers, to serve as counsel to Dean Tilly in cases of dormitory violations.

Pending the ratification of permanent dormitory legislation, this committee will be replaced by a new group which will perform the same function under the recently established dormitory constitution.

DORMITORY CONSTITUTION COMMITTEE

Composed of elected representatives from each hall, the Dormitory Constitution Committee was formed as a direct result of a residents' protest which expressed the desire of the students to institute their own form of government.

The constitution devised by this committee is designed to give each hall the right to decide upon their own immediate living conditions. This system, allowing for nearly complete self-government, is aimed at making dormitory life a rewarding social and educational experience.

Under the governmental structure provided by the Dormitory Constitution, the individual resident maintains a maximum of self-expression within the bounds of community living.

AMATEUR RADIO CLUB

The Amateur Radio Club offers interested students the opportunity of obtaining licenses, gaining knowledge in applied physics and inquiring into the dynamics of communication. This year the club obtained an amateur radio license (WB2AYD) and set up a station. They have obtained all the necessary equipment, including the antenna, and are now ready to begin broadcasting. When the station is completed, the members hope to broadcast at regular hours. Their equipment is capable of broadcasting to unlimited distances. Eventually they will be able to be received by any short wave set.

RIFLE CLUB

The Rifle Club is a new club formed this year. It is affiliated with the National Rifle Association and the Board of Promotion of Rifle Practice from whom it has received targets, and is awaiting the arrival of ammunition and rifles. Although they have not met in any official competition this year, the members are looking forward to next November when they will begin. The Rifle Club has many interesting plans for next year besides competition. Some of these include the formation of a Hunter Safety Club for the University Community and the sponsorship of a Junior Rifle Club for the children of the University faculty.
ASTRONOMICAL SOCIETY

An overabundance of cloudy skies and bad weather has limited the activities of the Astronomical Society this year. In its fourth year at this institution, this group, though small, is apparently not lacking in ambition. With the aid of appropriate optical equipment to which the group has access, they purpose to teach all who are interested about astronomy and the universe while learning along with them. The group looks forward to more interest and fewer clouds.
CHEMISTRY CLUB

The Undergraduate Chemical Society, a student affiliate of the American Chemical Society, caters to the social as well as the academic interests of its membership. Its program provides not only seminars with guest speakers, but also outside activities such as a “get acquainted” picnic for all new students with faculty members and upperclassmen, an ice skating party, and a hay ride.
A newly organized campus group is the Engineering Society which claims a wide range of purposes from orientation to research to social activity. Engineering students have, in the past, been assimilated by the physics and mathematics departments. The Society, through seminars, field trips, and research, hopes to acquaint the undergraduates with the field of engineering. A group research project is a major prospect for activity in the near future. The success of the recent Engineer’s Beer Party assures its repetition as an annual social event.
The Physical Society was formed to advance and broaden the knowledge of the student body in those aspects of undergraduate physics complementary or supplementary to the curriculum. To accomplish this end, they had a series of lectures given by members of the faculty who lectured on the new developments in their field.

COUNCIL FOR POLITICAL INQUIRY

One of the many interesting lectures sponsored by the council.

"I would like to say this about that."

The Council for Political Inquiry offers an opportunity to study historical and contemporary political issues at both the domestic and international levels. The Council sponsors lectures, discussions and research projects in an effort to reach its goal. This year the Council held a student-faculty debate on the virtues of sororities and fraternities. On a less personal level, the Council sponsored a talk by Allan Kaprow and Barry Rubin on *The Influence of History on Arts*; a lecture by Stephen Emory, a Socialist-Labor Party candidate for senator.

The Debate Forum was formed last fall by a small group of students. It fulfills its aims, those of providing its members with an opportunity to develop more critical analysis of argumentation and greater fluency of speech, by presenting to the student body speakers on topics worthy of intellectual consideration. During the past year, the Debate Forum sponsored a lecture by Mr. Zyskind entitled "Values of Rhetoric."
UNIVERSITY CHORALE

An enjoyment of music and the desire to share this enjoyment with others are two of the key purposes of the University Chorale. During the year the Chorale presented seven concerts—two on campus and five in neighboring communities. Though membership was small, the Chorale, under the direction of Mr. Bialosky, attained a high level of perfection in performance by hard work on the part of all.
CURTAIN AND CANVAS

Sponsoring trips to museums and theatres, Curtain and Canvas offers the student an opportunity to broaden his interest in the arts. This year the organization sponsored trips to *A Doll's House*, *Desire Under The Elms*, *Aida* and *The King and I*. A trip was also made to see the Mona Lisa when it was on exhibit in N. Y., and an effort was made to get tickets to the Stratford Festival in Connecticut. In addition the group worked along with the Council for Political Inquiry in sponsoring a lecture by Paul Goodman.
NEWMAN CLUB

The Newman Club, whose purpose in "to deepen the spiritual and enrich the temporal lives of its members through a balanced program of religious, intellectual and social activities," is an organization of Catholic students on a secular campus. In addition to regular meetings with Father McGuire, the club had open lectures given by guest speakers. Other activities included the Long Island Region Newman Day of Catholic Thought, the Halloween Dance, and the co-sponsored Yuletide Ball.

"Do I have any volunteers?"
STUDENT CHRISTIAN ASSOCIATION

The Student Christian Association is a religious organization offering a unique opportunity to obtain an insight into one's own life as well as the life of the modern church. The organization has a three-fold program of lectures, Bible seminars, and small informal meetings to analyse the religious ideas of all Protestant denominations.

In addition to its main religious purpose, the Student Christian Association also has a social purpose. It is an opportunity for Protestant students to meet and know one another. This year the S.C.A. held a Harvest Ball in November which was well attended and offered pleasure to the entire student body.
JEWISH STUDENTS ORGANIZATION

The Jewish Student Organization is a religious society for the promotion of spiritual, social and intellectual activities within the general college community. Activities are open to those of all faiths. The J.S.O. is especially famous for some of its dance sessions, such as the Chanukah Party, the Purim Party and the Sadie Hawkins Dance. Occasionally, activities such as the Yuletide Ball are sponsored in conjunction with the other student religious organizations. The club has established connections with the synagogues in the area, providing a nearby place for students to worship plus an opportunity for them to become acquainted with members of the surrounding communities.

"No Comment."

The Statesman, the official student newspaper of S.U.N.Y., is dedicated to the function of providing the academic community with coverage and analysis of events that are of concern to our academic existence. It covers news both in and outside the bounds of the campus. The Statesman operates with the philosophy that a vital community must have active and knowing members and that it is its job to provide material for the members to learn from and reflect upon.

The move from Oyster Bay to the Stony Brook campus, in its incomplete stage of construction, has lent itself naturally to the composition of the 1963 yearbook. As Coe Hall was to Oyster Bay, so are the cranes and bulldozers and mud to Stony Brook. Specula has tried to capture the unusual atmosphere of this new campus, while at the same time retaining the memories of Planting Fields.

The staff, aided by many contributors, has worked toward this end by creating a pictorial scrapbook of the 1962-1963 school year.

POLITY

The Executive Committee of the Student Polity is the central legislative and governing body of our student government. It concerns itself with the matters that concern and pertain to the student body, which makes up the Student Polity. Under its direct control, we have the standing cultural committees on Art, Music and Movies which have served to provide the college community with much entertainment through the year. Another consideration is with the establishment of policy on issues which may range from the subsidization of religious organizations to the procedure for choosing committee chairmen. This task is first handled by the Policy Subcommittee of the E.C. and then brought to the E.C. to be thrashed out once again before becoming “law.” Perhaps the most important task is that of budgeting and supervising the expenditure of the Student Activities fee. This is the job of the Budget Committee, headed by the Treasurer, and then again the budget is brought for review and approval by the entire E.C. It is their responsibility to draw up a budget which is fair and satisfactory to all quarters.

WE SAVED CREW AT STATE U.
ATHLETICS

With much good will on the part of the students, and a great deal of cooperation in the use of community facilities in the area, many athletic and recreational events were held this year.

Intercollegiate basketball improved with a season of four wins in ten games, and one of the outstanding performances of the year was provided in a close loss to Queens College. The performance of the players was superior, and an excellent demonstration of spirit and sportsmanship was shown by the spectators.

In moving to Port Jefferson harbor, crew again encountered the same difficulty of lack of facilities which had taken almost four years to solve at Oyster Bay. Despite this, the varsity boat beat St. John's in the opening race of the season, and finished out with two strong performances in the final two regattas.

Both cross-country and track staged strong comebacks during the year, with small squads showing promise for the future, which should be even brighter next year with the completion of our own quarter-mile track on campus. The Freshmen continued a trend started by the present Sophomore class in winning the Inter-class track and field meet.

Bowling on all levels was highlighted by a large number of participants. The varsity won two dual matches and placed third in the Athletic Association of Long Island Colleges Tournament, and the interclass matches were won by the Senior women and the Frosh men.

New sports conducted on an informal level included soccer, gymnastics, baseball and tennis. Perhaps the highlight of these programs was the first faculty softball victory in many years.

In addition to the planned sports, many activities such as dances and parties sponsored by the Recreation Advisory Group were enthusiastically received.

In the future, the completion of indoor and outdoor facilities will produce many changes in athletics and recreation. These changes will consist of increased opportunities for participation, both in new and existing activities.

The gymnasium, scheduled to open in January, will provide us with a swimming pool, handball courts, dance studio, wrestling and exercise rooms, both men's and women's gyms, and the necessary service areas. Outdoors, the additions will include six more tennis courts, a second baseball diamond, the running track, and an increase in general field areas.

SENIOR CLASS OFFICERS
H. Schneider,
Treasurer;
B. Englett,
President;
L. Hoffman,
Secretary;
C. Sullivan,
Representative.
“I am a college graduate.” There are few statements which bring to mind so many past experiences and future responsibilities . . . memories of “college days” . . .

Although the move to Stony Brook was anxiously awaited, once it became a reality we Seniors found that our dearest memories revert back to Oyster Bay . . . Freshman year introduced us to many new and wonderful things . . . Dean Austill, Coe Hall, poison ivy . . . the uniqueness of no class division . . . Saturday classes at 8 A.M. when everyone was alert and sparkling—absolutely raring to do school work . . . Nat. Sci. I and those hour and a half Humanities classes were a wonder! . . . Tony Haug was elected the first class president . . . Dean Austill was generous enough to “donate” his sailboat as a Christmas gift . . . the first Yuletide Ball was a success . . . the lightweight crew went for a swim in March when their shell was swamped . . . the model of the Stony Brook campus was displayed in Coe Hall before the groundbreaking ceremonies attended by Governor Rockefeller . . . students picketed the Grant and Woolworth stores in Huntington . . . Jean Shepard spoke to the student body in April . . . then came May with those comprehensive exams and the Spring Formal—“Soiree du Printemps” . . .

September 1960 saw a somewhat smaller Sophomore class returning
from summer vacation ... the coffee shop seemed to get very crowded with all the new Freshmen ... another year of Physics for those who survived Nat. Sci. I ...

Biology 10 acquainted everyone with flour beetles, marbles, and fruit flies ... Santa visited the lobby of Coe Hall ... big headlines declared "Spring Vacation Called Off. Plans Ahead of Schedule. Big Move to Stony Brook On." ... but the dateline read April 1, 1961 ... the students won the softball game again ... good news for all Soc. Sci. and Hum. majors—Oyster Bay became a college qualified to grant a B.A. degree ... University Day was established ... and Oyster Bay had its first graduation ...

With our Junior year came the domes—the outer space classrooms ... Coe Hall rarely used and the cafeteria became the center of all activity ... the student body and faculty grew even larger ... Education 30 caused much discussion ... rumors about the move to Stony Brook in September '62 were heard everywhere ... the Spring Formal spread out to the Italian gardens with dancing outside ... the graduating class was much larger ... and the next year the college would open at Stony Brook ...
The last year of college dawned... Stony Brook was quite a change from Oyster Bay... looking around the campus with its unfinished buildings, one was able to fully appreciate the beauty of Oyster Bay... 400 Freshmen were added to the student body... dorm facilities were much larger than those at O.B. ... Seniors were engulfed with practice teaching and required courses... there were many more social functions... the Seniors had two parties... another first was the Senior class dinner held in Port Jefferson—a delicious dinner, followed by dancing... the Senior girls were introduced to Mrs. Hartzell at a tea given in her honor... Spring Weekend provided a variety of types of entertainment... the Spring Formal was held at the Four Seasons Country Club... the lovely atmosphere was enhanced by a good band and buffet... after much debate it was decided that the Oyster Bay campus would be the site of graduation... this delighted the Seniors who had spent three out of four years there... graduation rehearsal was preceded by a luncheon for Seniors at the home of Dean and Mrs. Hartzell... then came “graduation day” and the end of four years of schooling.
"Hold it one second."

"One more inch and I'll slap you."
And you say the pop-top cans are really that good?

Ah, come on, just one more dance.

Pete's Barber Shop
