Dedication

We have witnessed the growth of a school from a Tudor Estate at Oyster Bay to an expanding University at Stony Brook.

Amid the growing pains, one man has concentrated his attention on the development of the individual. He welcomed us as bewildered freshmen, our ultimate destinations yet to be realized. He guided us through a period of self discovery toward confidence and maturity of thought, ever asserting his faith in student participation in the affairs of the college community.

This man is David C. Tilley. To him with gratitude, the Class of 1961 dedicates this issue of Specula.
Friends and smiling faces,
special places and people, . . .
come along . . .
The academic institution . . .
Couriers of culture . . .
cool and hot . . .
jazz and lights . . .
folk guitar . . .
In memoriam . . .

melancholy . . .
mood . . .
All in the game,  
the goal, the team  
soul or spirit,  
the sport . . .

Give a shout, a cheer,  
cry "Fight, win" . . .  
All in the wonderful  
game . . .
"Our twin goals must be: a new standard of excellence in education — and the availability of such excellence to all who are willing and able to pursue it."

The College of Arts and Sciences is the parent of liberal education, offering cultural experiences and disciplines in mental conditioning and intellectual activity. The demands made of each participant set the basic academic standards of the College.

During the first two years each student receives a liberal education by taking a variety of subjects in the major fields of study. The junior and senior years, on the other hand, are ones of specialization. A degree is awarded when the demands of the major field and the liberal arts are both satisfied.

The College of Arts and Sciences of the State University of New York at Stony Brook has spent its infancy in experimentation. A pliable skeleton has been molded, fractured, reset and healed in attempts to create a more perfect structure before brittle maturity pervades the system.

In its precocity, the infant has named itself “University,” and extremities, the Schools of Graduate Study, have attained strength by their own exercise as well as from the body to which they are attached.

Research grants in the Colleges of Arts and Sciences are presently in excess of $793,000, and are held in the areas of humanities and social sciences as well as natural sciences and mathematics.

The most immediate prospect for the future is the establishment of a Department of Anthropology, currently sharing its title in the department of Sociology-Anthropology, and the Department of Earth Science, presently part of the Department of Physics.

In addition to the graduate programs now established in Chemistry and Physics, the 1964-1965 academic year will offer programs leading to graduate degrees in Biology and Mathematics.

COLLEGE OF ENGINEERING

The College of Engineering consists of four academic departments and the Computing Center, with programs at both the undergraduate and graduate levels. The Engineering undergraduate program is on a unified basis so that all engineering students take courses in each department while acquiring their fundamental background in the engineering sciences. Some degree of engineering specialization is possible through elective courses which are available to the undergraduate in his senior year.

This fall the engineers moved into their spacious new building, accompanied by all the confusion a change of this nature brings: lost equipment, misplaced equipment, unpacked equipment, and at times carpenters and electricians for classmates. In the spring large quantities of new apparatus began coming in, so that soon the College will have many new modern laboratories.

The amount of research grants in the College of Engineering totals over $400,000. Every faculty member of professorial rank in the college holds a research grant from one of the major sponsoring agencies, among which are the National Science Foundation, Air Force, Office of Naval Research and National Institute of Health.

Of the three graduating classes to date, over fifty percent of the seniors have gone on to graduate schools and, this year, the College was proud to present master’s degrees to its first two graduate students.

"The universe comes to flower not in atoms or galaxies but in poets and philosophers, in scientists and saints."

Edmund Sinnott
SUNY college on Long Island! “Is that Post?” our friends queried. “Oh, you mean Farmingdale . . . Adelphi?” In spite of the general ignorance, we all knew that we had applied for acceptance to the State University of New York, College on Long Island at Oyster Bay . . . temporarily . . . in its third year of existence.

Arriving for an interview or Open House, we marvelled at the Coe Estate, the size of the Dorm rooms (we needed no convincing that they were once horse stalls), and the medieval quality of Coe Hall. Seated before Mr. David Tilley in the tiny, dark admissions office, one might have recalled former history lessons . . . of the Inquisition, perhaps, or the Salem witch trials.

Except for a few Sunday drives, this was the College on Long Island . . . until the fall . . .

The twenty-four resident freshmen who arrived the day before Orientation were introduced to George’s cooking, a few upperclassmen, and, inevitably, the Pines. The following day the commuters arrived to complete the first assemblage of the Class of 1964 College on . . . sorry, Long Island Center. It was raining. After a few words in the Great Hall on the aims of the College, possible programs and activities . . . “If you can get someone to do it with, it’s an activity” . . . we broke into groups for a short, damp tour around the campus (i.e. from Coe Hall to the cafeteria). Some of the more fortunate saw the annex including a soggy, blue Phyllis Russo.

Several days and placement exams later it was time for business . . . registration, that is, and the start of a four-year career of waiting on lines. After I.D. pictures and paying bills, “You must take Humanities I, Social Science I, English I, Mathematics 10 or 12 and one elective. Choose Chemistry 10, Physics 10 or Biology 10, depending on your major field requirement.” And in the Bookstore . . .

“Would you like the Freshman
Pack or the individual books? The difference? Only a half-hour wait."

Classes began. Full of confusion, anticipation and fear instilled by upperclassmen, we sought our respective classrooms and were aided, in some cases, by members of the faculty . . . "Mr. Doll, where is 379? . . . Well, my bicycle is over there . . . "

Henceforth, only minor problems plagued us . . . walking spiral staircases . . . reaching Coe Hall in three minutes when Mr. Miller dismissed us ten minutes late . . . what to do while waiting for the car pool driver while waiting for the carpool . . . what to do when the carpool doesn’t wait.

We can’t help but recall the academic side of our novice year. Chem Lab . . . "Gerry, your hair is on fire! GERRY, your blouse is on fire! GERRYYYYY!" . . . "Aristotle? I thought this was Biology." . . . "You mean this ten-dollar, three thousand page textbook is the supplement to the lectures of the first half of Physics 10?" . . . "D in English? But I got A’s in high school!" . . . "What did I miss today, Mr. Prouty? I see, Queen Elizabeth . . . sex . . . Marilyn Monroe at M.I.T. . . . sex . . . the Sabine women," . . . "No, I really didn’t like Emma." . . . "Differentiate the following, \[ \frac{5}{9} e^{3/4 x} \sin^3 x \tan^{-1} a \] Square the product and integrate. You have ten minutes."

Despite the fact that most of the students were commuters, there was evidence of social life on campus. The Halloween Dance, costumes and all, was held in the cafeteria, and the Yuletide Ball in the Great Hall. One of the few traditions was the annual Christmas prank . . . "Really, Santa, not in the foyer of Coe Hall!" There was the Sadie Hawkins Dance and then, of course, came the Spring Formal, held in the Great Hall, the Coffee Shop and the Italian Gardens, with three bands and candlelit tables on the terrace . . . the first organized undertaking of the Class of ’64 . . . a beautiful enjoyable and successful one. We were really becoming a part of the school.
After a well-earned summer vacation, some of us returned to the Oyster Bay campus, and, then again, some did not. We registered in the gym, experiencing, for the first time, “university” registration... forms and closed out sections. The second annual getting to know you dance left the freshmen literally in the dark. The failure of electricity was prophetic of the future at the Stony Brook Dormitory.

The year of the domes had arrived. The softball field had seen the last of student games and the greenhouse, the last of broken windows. The center of campus activity was the cafeteria while the lounge dome became inhabited mostly by Frosh.

In the spirit of the Halloween season, there was a raid on the men’s dorm led by Judy Shlechta. The retaliation consisted of a few well placed boards and a few not-so-well-placed signs... “Whatdya mean, zoo?”

Christmas time brought the annual Yuletide Ball and the annual Christmas prank, which was neither annual nor tasteful in character. Classes went on as usual. Biology students were heard to say, “What, more fruit flies?” and Chem. students: “When Dr. Schneider said ‘unknown’ he wasn’t kidding.” There was a bit of dissension in the Math department... “How can Mr. Schatten give a two hour mid-term with coffee? I can’t even write Dr. Lister’s problem in two hours.”

Then, of course, there was Dr. Lambe’s text book to supplement his Physics course. Soc. II and Hum. II required extensive reading, which we took in (or rather left out of) our stride.

In March, a mandate from the Board of trustees made it possible for the L.I.C. to offer the Bachelor of Arts and graduate degrees. As befitting a sooner-or-later-great University, a day in March was set aside as University Day... any day, provided it’s a Saturday.

As sophomores, we had some idea of the background and importance of the issues which were the cause of much disagreement at L.I.C. We heartily participated in the
strike on classes protesting the dismissal of Dean Austill. Many questioned the validity of the struggle, seeing greatly respected professors on both sides. All wondered at the outcome in terms of the future and quality of the Long Island Center.

The Spring Formal nearly lost its annual quality due to laxness on the part of the class of 65, but through the dedication and energy of Judy Slecha and Phyllis Wilensky plus other members of the class of 64 the event was made possible and was, once again, a success.

The summer before our junior year was three months of planning and preparation for the move. We expected to feel more like upperclassmen this year, but as it turned out, we knew less about our school than the Frosh.

Orientation had an anything goes character . . . and those meal lines . . . "Why does everyone else decide to eat when I do?" The lounges at the end of the halls were as casual as they could be—no furniture. The dormitory government was any style imaginable . . . and some not imaginable. Open dorms was a big question as were fraternities. Debates on the latter subject arose from a lack of weekend activity for the resident students. The Corners became the escape for many. Sunday night dinner at the Station House helped too.

Even after things became more routine in the dorms, blackouts and fire alarms kept it lively. We'll never forget Dean Tilley with his flashlight and Mrs. B. patrolling the girls' wings to make sure all had evacuated.

The junior year was the year of the beer party. Its success for the engineers predicted it to be the first of many to come. Another first for the college was Spring Weekend, the first college weekend . . . and then there was the talent show.

We lost the interclass track meet . . . again . . . it didn't come as much of a shock since we felt outnumbered . . . freshmen, freshmen everywhere . . . what will next year be?

This was probably the most trying year academically. We examined rocks one night until 1:00 A.M. (solar time) in the Men's Lounge. The advanced calculus class couldn't comprehend what was "trivially obvious." Chem. students became even more frustrated when their grades ranged from
minus 100% to plus 100%. And then there were the biology tests for which zero was a C. Ed. 201 finally became a reality for the education students, although for many who took the course, it still remained a mystery. We lost a few people at the end of the first semester. This was surprising, since we had passed the halfway mark.

The New York State teaching requirements were raised. Many of us were uneasy wondering whether or not we could fulfill them and still get in under the wire. But the most unpopular raising of all was that of the tuition. SUNY at Stony Brook joined other state-supported institutions in protest of the proposed plan by sending a busload of students to Albany to express our opposition.

And so we fumbled through the third year, rougher than ever academically and requiring almost as much adjustment as when we were Freshmen. But surely after a fumble comes a recovery, and perhaps the senior year would be the time . . . At last, the home stretch!

Orientation this year was better than ever. Seniors gladly gave information to inquiring Freshmen . . . one of the four people standing nearest you won’t be here in January . . . Freshman to Howie Schneider: How would you approach this problem? Howie: I’d approach Stutz . . . Saturday night entertainment? Well, if you stand out on Nichol’s Road with a red flashlight . . .

Speaking of Nichol’s Road, Barbara, Phyllis and Renee, who is responsible for the Senior Class publicity on the overpass at 25A?

The tragic death of President Kennedy was an emotional shock and a personal loss to all of us at Stony Brook. This inspired the erection of the first flagpole on campus, and the students along with one of the local ministers conducted a memorial service.

Look at the snow. Too bad it isn’t Oyster Bay. Maybe a few classes would be called off there,
but not here in the flatlands. Snowed in . . . two days of cancelled classes . . . disaster area? The drifts sure are fluffy . . . remind you of pillows . . . hey, wait a minute, don’t jump, that’s the third story!

The Amvet’s Hall will never be the same. The last annual Engineers Beer Party was held this year. How do we know it’s the last? Ask Charlie Tebbe . . . “Hello, this is Charles Tebbe” . . . “No” . . . click.

Too many complaints about the odd looking couples on campus. We’ll let the computer settle this once and for all . . . No cheating, Shelly.

“Mr. Zaustinsky, Margi and Ed won’t be in class today . . . they were just arrested.”

But we had Spring Weekend last year . . . tradition? . . . let me look up that word in the dictionary. In spite of failure in the past to establish new traditions, the Second annual Spring Weekend was a success. Playboy Dance (Yea, bunnies!) . . . the Carnival (Yea, George!) . . . the beach party (Yea, ladies’ room!) . . . and open house (Yea!)

The Riverside Inn and the First Annual Senior Faculty Dinner Dance (tradition?) . . . the last chance to get together as a class (without pomp and circumstance).

No, you’re not seeing things. The poster says “Huntington Town House” . . . the second off campus Spring Formal. Didn’t you order a screwdriver a few hours ago, Tom? It’s just as well, you’ll be in better shape for the mile hike to your car when the dance is over.

June 6 . . . graduation rehearsal.

After they go through some foolishness with their hats, you may file up to receive your diplomas.

“Do we grab first then shake or shake then grab?” . . . “No red socks, please.”

Finally the seventh arrived. The Gymnasium was christened by the solemn ceremony. We were inspired by the “uncertainty of our times” and by the “three flowering cherry trees . . . which will grow and blossom as we are certain this University will.”

"The objectives of a learning community are to promote and preserve significant inquiry through the exchange of ideas; to develop the intellectual and moral powers of students; and to prepare graduates to assume a responsible and productive role in society."

Polity Constitution
EXECUTIVE COMMITTEE

Standing: S. Zornitzer, R. Kulesar, C. Tebbe, E. Wetter.

POLITY

The Polity of the State University of New York at Stony Brook, the student body of the University, is organized to enable the students to meet their responsibilities to themselves as students, as members of a university community and as members of society. All full time students are members and are eligible to participate in the workings of the organization. It is characteristically whatever the students wish it to be and the success of its operation rests with the student body.

The Executive Committee of Polity enacts legislation and initiates its execution, recognizes and supervises student organizations and draws up the budget for activities which are sponsored and supported by the student body. Decisions of the Executive Committee may, in all cases, be overridden by Polity.

Because of the rapidly growing student body it is felt that the present Polity constitution may not remain workable. Thus, a Constitution Committee has been established which will revise the existing constitution to meet this need.
BUDGET COMMITTEE

ELECTION BOARD
J. Strimas, R. Grobe.

POLICY COMMITTEE
M. Cohen, L. Dunner—Secretary, K. Boughan.
To help the Executive Committee carry out its duties and responsibilities, there are several committees which operate under its jurisdiction. The two standing committees of Polity are the Election Board and the Budget Committee. Among the presently active ad hoc subcommittees are the four cultural subcommittees. The Art Committee sponsored the Smithsonian Institute Art Exhibition and the Annual Student Art Contest. The Music Committee operating in conjunction with the Fine Arts Department sponsored concerts covering a wide field of musical endeavor—folk, classical and jazz. The Committee on Cinematographic Arts showed an average of two films a month. After a sporadic opening this fall, W.U.S.B. seems to have overcome technical difficulties and has settled down to a recently expanded broadcast schedule of thirty-four hours weekly.

MOVIE COMMITTEE
CULTURAL SUB-COMMITTEE
J. Holmgren, C. Baron, E. Jackson—Chairman.

FOOD COMMITTEE
J. Bergman, S. Horowitz, C. Kaars.

ATHLETIC SUB-COMMITTEE
Standing: F. Weikman, R. Leitman, P. Hertz, T. Castoldi, C. Kaars.
Although the State University of New York at Stony Brook has no religious affiliation, individual religious organizations have become very much a part of the college community.

Each organization has established a house of worship in the area.

Among the programs sponsored this year by the Jewish Students Organization were lectures, the traditional Chanukah Party, the Purim Party and the Sadie Hawkins Dance, which always proves to be a great success.

The Newman Club sponsored a lecture entitled “Exorcism” or “Casting Out of Devils,” in addition to the talks given by Father McGuire. Once again, as in previous years, the Club sponsored the successful Halloween Dance.

During the past year, the Student Christian Association sponsored many interesting lectures: “The Ecumenical Era,” “Education and the Worship of God,” “Non-Violent Action: Technique for Social Change,” and “The Migrant Worker in Suffolk County.” The S.C.A. is responsible for the Suffolk Student Movement, co-sponsored by the Education Department. The S.C.A.’s social activities included a hayride, Christmas caroling and a Christmas party for a group of migrant workers.

The Lutheran Students’ Group, organized last year, sponsored talks weekly such as, “The Historical Reliability of the Scriptures,” “The Christian View of Sex and Marriage” and “Attitudes on the Racial Crisis.” The group also had a showing of the movies “Martin Luther” and “Question Seven.” During the Christmas season the Lutheran Students also went Christmas caroling.

JEWISH STUDENTS ORGANIZATION

STUDENT CHRISTIAN ASSOCIATION

LUThERAN STUDENTS GROUP

NEWMAN CLUB

ENGINEERING SOCIETY

PHYSICAL SOCIETY

CHEMISTRY SOCIETY

L. Copel, J. L. Barr, P. Steier

SCIENCE ORGANIZATIONS

The recent academic year has seen a good deal of activity originating from four campus science organizations. The annual Undergraduate Chemistry Society picnic was held in October at Sunken Meadow State Park. Since the picnic, the Society has concentrated its attention on sponsoring a series of seminars. Speakers are faculty members as well as members of other academic, research and industrial institutions.

During the fourth year of its discontinuous existence, the Astronomical Society has experienced the pains of both reestablishment and growth. It has centered its activities around many observing sessions held on the roof of the physics building employing the Society’s three inch refracting telescope and equipment belonging to its members. These sessions have been augmented by films coordinated with observations.

The Biological Society was founded during the 1963-1964 academic year under the faculty sponsorship of Dr. Williams. Its purpose is to facilitate individual research by its members. To this end, the Society has occupied and outfitted a room in the basement of the biology building. In addition to providing space and materials, the Society will provide financial aid to support the research of its members, invite speakers, and travel to places of interest to broaden the knowledge of its members in current fields and techniques of research.

Through sponsoring engineering seminars, showing films, and holding informal faculty-student “coffee meetings,” the Engineering Society attempts to acquaint undergraduates with the field of engineering. Last year the First Annual Engineers’ Beer Party proved to be a successful social event. This year the Last Annual Engineers’ Beer Party was again socially successful. Some claim that next year will bring a Third Annual Engineers’ Beer Party. (The nearest hall they could rent is upstate somewhere . . .) Within the academic scope, future plans include Society sponsored undergraduate research and a Society publication.

ASTRONOMICAL SOCIETY

BIOLOGY CLUB

Of the three politically oriented groups on campus, the Council for Political Inquiry is the oldest. It presents to the student body current topics of a controversial nature.

This year two lectures were sponsored by the group, "Problems of Peace Research" by Dr. Paul Lauter and "Has Organized Labor Outlived Its Usefulness?", given by two speakers, one representing labor, the other management.

The Conservative Club is newly organized, having obtained Polity recognition this spring. The group plans to act as a forum within the University by holding public meetings on campus and inviting speakers to present conservative points of view. In general, the activities sought by the group are "those which will preserve America's constitutional government."

The Student Non-Violent Action Committee was also recognized this spring. The members have been working with local organizations concerned with human rights in the Township, the County and on Long Island. The S.N.A.C. initiated and carried out a letter writing campaign to Senators, urging them to support the Civil Rights Bill. The group also assisted the Suffolk Student movement in tutoring groups of Suffolk County children. In keeping with their purpose, the committee sponsored a concert given by the Freedom Singers.

CONSERVATIVE CLUB

COUNCIL FOR POLITICAL INQUIRY

J. Krawczyk—President, L. Ledman, S. Luby, M. Lypka—Treasurer.
SKIN DIVING CLUB

SPORTS ORGANIZATIONS

In the past four years, four new sports organizations have been established independently of the athletic department. The Judo Club is presently making practice its major activity since the members are beginners. When quality has been achieved, competition will be arranged and soon we may see several yellow or green belts on campus.

An excursion to Sterling Forest was made by the Ski Club this winter, but further activity has been limited due to lack of transportation facilities, the large skiing areas being inconveniently located with respect to the campus. More frequent skiing is anticipated next year.

SKI CLUB

Last fall, the Rifle Club received Polity recognition. This group holds regular semi-weekly practice at two local ranges in Port Jefferson and Stony Brook. It is anticipated that the rifle range on campus will be ready for next season. Another regular activity was skeet shooting, using shotguns. A shotgun team may eventually be established. The club participated in two matches this year, with plans to increase its number next year.

The Skin Diving Club officially became a campus organization this year also. Procuring equipment, showing of instructional films and some shallow water diving have been the preliminary activities in which the group has been engaged. The new equipment will allow expansion of activities next year to skin diving, scuba, spearfishing, underwater photography and underwater exploration.
SPECIAL INTEREST GROUPS

Two of the three special interest organizations on campus are newly organized.

The Bridge Club holds weekly bridge games for its members and, at these meetings, teaches the game of bridge to anyone who is interested in learning. The only bridge competition in which the organization participated this year was with Queens College. S.U.N.Y. won this match. Next year the Bridge Club will seek membership in the American Contract Bridge League.

The Chess Club received Polity recognition last fall. One of the original purposes of this group was to put S.U.N.Y. in a different league with academic institutions through competition in chess. Membership in the Metropolitan Intercollegiate Chess League has made seven matches possible this year with Columbia, Yeshiva, Farley Dickinson, Fordham, Hunter, C.C.N.Y., and Westchester Community College. Three of these matches were victorious for the newly organized S.U.N.Y. team.

The Amateur Radio Club, which has been an active organization on campus for some time, encountered numerous difficulties this year in finding a suitable location for permanent set-up of their equipment. This group hopes to be established in a permanent work area this fall so that the station can operate again.

Curtain and Canvas spent another active year arranging for student attendance at musical and theatrical productions, most of which took place in New York City. Puccini’s “Madam Butterfly” and Gershwin’s “Porgy and Bess” were two of the musical presentations attended. “The Clancy Brothers and Tommy Makem” was the first folk concert for Curtain and Canvas. Edward Albee’s “Who’s Afraid of Virginia Wolf” was seen this spring as well as Shakespeare’s “Julius Caesar” which was presented at Hofstra University.

Bridge Club

Curtain and Canvas

Chess Club
LANGUAGE ORGANIZATIONS

This year saw the addition of two foreign language groups to the campus organizations. The German Club originally held bi-weekly meetings on campus, but, when attendance began to dwindle, the meeting place was moved to the “Corners.” Needless to say, attendance picked up again. The meetings include German folk singing and dancing and forms of refreshment for which the nationality is famous. The club sponsored the showing of one German Film, “The Merry Wives of Windsor.”

A highlight of the Spring Weekend was the German Club vs. French Club soccer game, in which the French proved to be the masters.

The French Club, too, began with bi-weekly meetings, but, having the same attendance problems encountered by the German Club, the group resorted to the same solution (on a week alternate to the German Club meeting). The songfest at the “Corners” was a success.

The French Club is presently in the process of building up a record library which will be available to members. Subscriptions to French magazines will also be obtained for the use of the members.
EDITORS

STAFF
University publications serve the fourfold purpose of communications, education, entertainment, and expression.

The Statesman, the student newspaper, published thirteen twelve-page issues during the past academic year.

Under a new constitution, a democratic editorial board was established. This structure has increased the responsibility of the editorial board in that the editorial copy is now a product of the entire board. The purpose of the constitutional revision was to create a structural basis for the Statesman. In the past, the functioning of the Statesman was dependent upon the person who assumed the responsibility of Editor-in-Chief. The paper can now function upon its organizational structure. The growth of the student population and, therefore, of the Statesman staff has made this structure possible.

The literary magazine Soundings is the newest University publication. The idea was conceived in the fall of 1962 but its execution did not begin until 1963. The first issue, a product of a year's work and planning on the part of the editors, was received in the spring by the University community with enthusiasm proportional to the efforts behind the issue.

A nonrestrictive magazine is the goal of the editorial policy. All material submitted is eligible for publication, and is judged by the editors with respect to "quality of thought and expression, seriousness of intention and the appeal the work might be expected to have for a cultivated audience." All contributions are welcomed. Quoting the editors "Soundings' potential, like the potential of the student body, has yet to be sounded."

As you look through this volume of SPECULA you see the second year of the State University of New York at Stony Brook. You see students; students concerned with their academic pursuits, cultural enrichment, and social growth; students working toward their individual goals; students involved in the college community as a whole. This has been Stony Brook 1963-64. It is not simply special places and events, but people, that have made Stony Brook what it was in the past as well as what it will be in the future.

SPECULA has come about through the efforts of a group of students working individually as well as collectively to bring about this record of the 1963-64 school year. I would like to take this opportunity to thank all the editors for their invaluable assistance. Special thanks go to Les Lefkowitz for his color photography as well as most of the black and white candid throughout the book; to Sam Horowitz for finding anything and everything that was ever lost in the yearbook office; to people who wandered into the SPECULA office on hot July weekends; and finally to George Olsen and Bill Fox, the publisher's representatives, for their guidance, concern, and greatly appreciated labor.

OPEN HOUSE
THE RESIDENCE HALL
To a student body accustomed to off-campus housing, commuting and living with relatives, dormitories were an innovation. Couple this with the fact that nearly half the dormitory residents were freshmen and you begin to form a picture of Stony Brook’s “unique situation of dormitory life,” as stated in the Dormitory Constitution.

One has only to recall the black-outs, fire alarms, Polity rallies, food problems and the all-year mud-and-construction problem to realize that we have come a long way in one year toward improving campus living conditions. One has only to consider tripling, fire alarms, a slightly varied food problem and the same all-year mud-and-construction problem to realize that we still have a long way to go.

The South Hall Dormitory, which opened in January, relieved problems of crowding, not only in the rooms but in the lounges as well. South Hall Lounge has become a haven for those who enjoy hootenannies and other informal social gatherings.

In the main dormitory, individual halls contributed to the social life at S.U.S.B. by holding Christmas parties and sponsoring booths at the Spring Weekend Carnival, while panty raids and defenestration brought about informal gatherings of another sort.

Dormitory government consists generally of separate hall governments merging into building governments for legislative and judicial matters. With this there is an administrative system of Resident Assistants, working with the Resident Heads and Dean of Students office. Until now, rules, regulations and accepted codes have been vague, this having advantages, as well as disadvantages. The future promises a stronger organization with a firmer policy and we shall see...
RESIDENT ASSISTANTS

Rah, Rah!
Panty Raid
At State U.

Two hundred jeering, single male students, egged on by 300 screeching coeds, staged the first panty raid in the history of the State University at Stony Brook last night.

Male students at the campus' three-story dormitory, which houses males and females in different wings, paraded on and off for nearly six hours below the girls' windows.

Andre Edwards, 33, director of residence, said the students tried—but failed—to gain entrance into the girls' wing from the inside.

However, the coeds, leaning out windows, tossed undergarments and water—at the milling boys below. The boys tried to climb in windows and go through doors but the coeds pushed back all onslaughts.

There was no damage, according to Edwards. The authorities at the school had everything under control. They included David Tilley, dean of students.

Edwards attributed the raid to mid-term examinations which began yesterday. He said the boys were "letting off steam."

Suffolk police had no knowledge of the goings-on. A woman supervisor in the coeds' wing had a terse "no comment" last night.

Newsday
"Young America must be made fit... to face the future with confidence and strength."

John F. Kennedy
PHYSICAL EDUCATION

Due to interest shown by the student body in previous years in various athletic and recreational activities, many new activities have been established and former activities have been expanded.

Experience, diligent practice, a strong bench and enthusiasm, all contributed to an improved Basketball season. The team finished with six wins. The schedule for next year has been expanded to fifteen games. The opening of the new gymnasium came too late for this season, but everyone is looking forward to having a home court for next year.

Using the severely limited facilities available to them this year, the crew showed great spirit and dedication to the sport. Suspended in the fall for lack of a boathouse, the persistent oarsmen were able to get on the water in the spring. Although the schedule of the meets this year was limited, it should be enlarged next year if the proposed boathouse is built.

Participation and interest shown by students in the intramural program last year helped to gain recognition for soccer as an official intercollegiate sport this year. Gaining experience and confidence as the season progressed, the “Warriors” went on to win the last three games of their first season to give them a 3-3 record.

Cross Country also made its debut as a recognized varsity sport. The demanding activity is conducted over a five mile course and requires more endurance than speed. The team placed third at the Long Island Colleges Cross Country Conference Championship.

Track had an improved season, with the first efforts of the newly-organized relay team being very successful. The sophomores won the interclass track and field meet, while another interclass event, bowling, was as popular as ever.

The intramural program made a major contribution to the growth of school spirit. Those who did not participate in a varsity sport were given the opportunity to compete against their fellow students. Fierce competition and tremendous spirit was shown by each hall in football as well as basketball and softball. Tennis intramurals and instructions were still another aspect of the intramural program.

Although the Cheerleaders have been active for three years, the group just received Polity recognition this spring. The Varsity basketball team was the object of the cheers at home and at away games. Next year provision might be made for cheering at overnight games as well.

Looking to the future—the swimming pool and the gymnasium with all its diverse facilities will be open—additional tennis courts will be available—a soccer field will be completed—a track will be ready. Such expanded facilities will naturally lead to an expanded athletics and recreational program.

good luck,
CLASS OF 1964!

Slater School and College Services wishes to thank the members of the graduating class for their patronage—to say farewell, good luck, and good health.

Your school's administration realizes that classroom performance often depends on planned nutrition. Through ARA Slater, they have wisely invested in quality food, prepared and served in friendly style.

We hope you have enjoyed Slater meals and service—that mealtime provided a pleasant social break in the day's busy routine. From all of us, good luck and good health in the years ahead!
