SUNY Fall 2004 Assessment Conference:
Assessment for Academic Excellence!

Keynote Speaker: Dr. Douglas J. Eder, Director, Undergraduate Assessment & Program Review and The Undergraduate Research Academy, Southern Illinois University Edwardsville

Format: Face to face workshop
Duration: One full day
Course Materials: Provided
Prerequisite Knowledge: N/A

About the Keynote Speaker:

DR. DOUGLAS J. EDER's academic discipline is in the area of Neuroscience. He is Director of Undergraduate Assessment and Program Review -and- The Undergraduate Research Academy at Southern Illinois University Edwardsville. He has facilitated conversations in assessment at conferences and at individual institutions from Canada to the Caribbean. In 2001 he served as visiting distinguished scholar at Hamilton College.

Publications include journal articles and an atlas of anatomy as well as articles and chapters in interdisciplinary assessment, authentic assessment, and assessment of accredited programs. He serves, with Kathryn Martell, as co-facilitator of AACSB's Assurance of Learning seminars.

Program Presentation Outline:

8:30 - 9:00 am - Registration & Continental Breakfast

9:00 - 9:10 am - Welcome and Introduction; Dr. Satish Tripathit, Provost, University at Buffalo

9:10 - 10:45 am - Juggling, Dogs, and Quality Education: The importance of feedback, critical thinking, and punctuation; Douglas J. Eder, Ph. D., Director, Undergraduate Assessment & Program Review, Southern Illinois University Edwardsville

The traditional way to answer the question, "Are students learning what I'm teaching?" is through graded assignments and exams. Many other, less formal ways exist that have the additional benefit of increasing student learning through approved feedback. The name for this process is assessment, and it assists a faculty to improve learning and to cultivate a Scholarship of Teaching. This interactive presentation uses good thinking, humor, and feedback to examine the use of assessment for assurance of student learning and for support of program review and institutional accountability.

10:45 am - 11:00 am - Break

11:00 am - Noon - Panel Discussion: Assessment & Program Review

When SUNY's program assessment initiative was initiated in 2001, the College of Arts and Sciences of the University at Buffalo saw the opportunity to put in place a departmental review process that would both
meet compliance, as well as benefit the departments and programs. This panel explores the process the College of Arts and Sciences went through as they developed the program review process, from the development of the parameters, to the actual process. The discussion will cover the pros and cons of the process as seen through the eyes of both faculty and administrators. The Panel: Uday Sukhatme, Dean College of Arts and Sciences; Chuck Mitchell, Chair Geology Department; Tamara Thorton, Chair Department of History; Stefanos Papazarahis, Staff Associate College of Arts and Sciences Facilitator: Douglas J. Eder, Ph.D.

Noon - 1:00 pm - Lunch (provided)

1:00 - 2:30 pm - Assessing Learning; Dr. Ronald Gentile Distinguished Teaching Professor Emeritus, Counseling, School, And Educational Psychology

This session will provide an overview of learning and memory processes and what it takes to achieve mastery of content or skills, plus consideration of the following fundamentals of assessment:

- Whether the purpose is norm-referenced or criterion-referenced,
- The importance of feedback and how it differs from grades and praise, and
- Expanding our measures to assess higher-level thinking.

From these basics, Professor Gentile draws implications for teaching, assessing, and grading which include the following for higher education: (1) identifying and publishing fundamentals as required course objectives (which must be achieved by each student to pass the course); (2) reviewing and testing for prerequisite knowledge and skills prior to or early in each course; (3) teaching with a wide variety of activities and methods, including having students learn by teaching; and (4) making higher grades contingent upon successful completion of higher-level applications or analyses of course concepts or skills (i.e., the kinds of thinking done by professionals in the discipline).

2:30 – 2:45 p.m. - Break

2:45 - 4:15 p.m. - Avoiding the Crushing Impact of Assessment in Higher Education - Douglas J. Eder, Ph. D.

Assessment works best when it is embedded in teaching and learning and when it provides feedback that is timely, relevant, and used. This interactive seminar/workshop aims to use good thinking and humor to harness the effective power of honest assessment for the classroom and for the institution. Turned to advantage, assessment helps faculty members teach smarter, not harder. And by doing assessment in a way that eases administrative burdens, a faculty may revive, survive, and thrive.

4:15 - 4:30 pm - Wrap Up and Evaluations - Jeannette Molina, University at Buffalo
