INTRODUCTION

The academic year 1968-1969 was the second full year of planning for the five colleges and the two hospitals as well as the community network of hospitals which will constitute the Health Sciences Center.

It is impossible to report on the multitudinous activities and innumerable meetings and discussions on campus, in Albany and Washington and elsewhere. Suffice it to say that the size of the operation and pace of the activities has quickened perceptibly. The major obstacles to maintaining the timetable set forth in 1966 are still the uncertainty of budgetary support, the difficulties in obtaining commitments on physical plans and funds for construction of permanent facilities and the unwillingness of the Budget Division to accept the necessity of temporary spaces until just a few months ago.

Most crucial in the whole matter of planning has been the lack of concordance between physical space availability, budgetary allocations and the recruiting process. These are factors beyond the control of the local campus, extremely frustrating at all times and inevitably resulting in delays as the campus planning group attempts to respond to the multivariate, often conflicting and paradoxical signals from Albany. Nevertheless, the following major points of progress can be singled out for the past year.

1) We have completed the most important phase of recruiting from the point of view of planning and ultimate operation. In this academic year we have completed the roster of deans for each of the five schools - Medicine, Dental Medicine, Nursing, Allied Health and Social Work. In addition, a Director of the University Hospital, a Director of Medical Communications, Director of the Biomedical Library and Director of the Animal Care Facilities -- have begun to plan for their specific programs. The first Chairman of a basic science department has been appointed. Discussions are well underway with outstanding candidates for chairmanships of the Departments of Anatomy, Microbiology, Pharmacology and Physiology. Here, too, the major difficulty is the inordinate delay in getting clearances on salaries from SUNY and the Division of the Budget. These delays often make it extremely difficult and embarrassing in dealing with potential candidates of the high quality we are attracting to Stony Brook.
Selection Committees are also working on the nomination of a Chairman for Community Medicine and shortly committees will be appointed for the selection of a Chairman of the Department of Medicine, as well as the Department of Psychiatry.

2) Preliminary drawings have been completed for Phase I of the permanent building project. This will include facilities for the Schools of Nursing, Allied Health and Social Work. Basic science facilities for Schools of Medicine and Dental Medicine, partial facilities for clinical departmental chairmen, animal quarters, Biomedical Library and Communication Centers, as well as Student Faculty Center are all represented in their entirety. The first phase of the building plan will include a basic science tower as well as an extensive network building.

A commitment has been obtained from the Construction Fund and the architect's office of approximately 60 million dollars for this first phase.

The Phase II will consist of the University Hospital and this is already advanced in the planning stages. Phase III will consist of a clinical sciences tower, the planning for which is also very well advanced. In fact, were the funds available, the preliminary and working drawings for the entire permanent physical facilities could be completed within a year. The preliminary drawings could be completed within several months.

3) After many reams of paper supplying justification, debate, discussion -- the Division of the Budget has finally agreed to permit the rental of temporary spaces. Approximately 2 1/2 million dollars has been made available for this purpose and extended over a period of several years. Plans are already underway for the erection of the first temporary buildings on a site close to the Health Sciences Center campus. These temporary facilities will house all the present staff of the Health Sciences Center. The facilities will contain laboratories, classrooms, animal facilities and office space and with the use of these facilities it is expected that students will be enrolled in some of the colleges in 1970 and if a schedule of availability of temporary spaces can be adhered to, medical students will be enrolled in 1971 or 1972 at the latest.
4) A temporary laboratory-office building -- or so-called "surge" building -- is now under construction and is expected to be completed in 1971.

5) A Biomedical Library housed in the Blue Jay Market in Setauket has been developing at the previously projected pace and we expect it to be available for service to the community shortly after the arrival of the Director of the Biomedical Library, Mr. Emil Frey.

6) The development of clinical campuses has been progressing well. The past year has been spent in many negotiations with the 42 hospitals in Nassau and Suffolk County.
A plan of affiliations has been discussed with every hospital and with SUNY central office in Albany. We are at the stage now of negotiations for the signing of specific legal documents which would spell out the bilateral responsibilities of clinical campus affiliations.

Discussions were also advanced in the matter of the other types of affiliations -- spelled out in the document. It is expected that we will be able to enter some of these arrangements within the next academic year.

7) Many contacts have been made throughout the community with voluntary health agencies and various segments of the community, Regional Medical Programs and comprehensive health planning. Every member of the Health Sciences Center staff has made a distinct part of his effort the encouragement of contacts with professional and lay groups interested in their specific health educational fields.

8) During this year, two significant grants were awarded. The grant for Regional Medical Programs amounting to some $600,000. The Vice President for the Health Sciences and Director of the Center, coordinated the preparation of this grant and acted as coordinator of the program until the recruitment of a permanent coordinator, Dr. Glen Hastings, assumed his duties in mid-June of this year.

A grant was obtained also from the Commonwealth Fund for the use of the Director of the Health Sciences. This grant amounted to $375,000 and it is intended for the purposes of assisting planning particularly in the areas of community medicine, educational research, social sciences and humanities as they relate to the developing curricula and programs in the five schools of the Health Sciences Center.
9) Every member of the Health Sciences Center staff is in demand at the national level for participation on committees and councils of the National Institutes of Health, various professional organizations as a regular part of the duties of every member of the staff.

Commencement Address: Academy of the Sacred Heart, Cincinnati, Ohio, June 5, 1969.

Commencement Address: University of Arkansas Medical Center, Little Rock, Arkansas, June 8, 1969.

Speaker at dedication of Leon Lowenstein Research Bldg., Hillside Hospital, Glen Oaks, N.Y., June 10, 1969.

Commencement Address: Nursing School of Central Islip State Hospital, Central Islip, New York, June 13, 1969.
ADDITIONAL ACTIVITIES

EXTRAMURAL ACTIVITIES -- NATIONAL

Attendance of meetings and active participation in the following National Committees:

Board of Trustees, St. Louis University, St. Louis, Missouri
Committee on Nursing, American Medical Association
Co-Chairman
Council on Professional Affairs, American Hospital Association
Member, Visiting Committee, Western Reserve University,
Frances Payne Bolton School of Nursing
Chairman of the Committee on Allied Health Professions of the
Council on Medical Education and Hospitals, American Medical Association
National Advisory Council Regional Medical Programs,
National Institutes of Health
Board of Visitors, College of Nursing, Vanderbilt University
New York State Health Planning Advisory Council
Executive Committee, Regional Medical Programs -- C.H.P. Planning Committee, New York
Subcommittee on Social Policy for Health Care, New York Academy of Medicine
Chairman, Committee on Health and Human Values
Ad Hoc Committee on Dental Clinical Research, National Institute of Dental Research, N.I.H.
Second Vice Presidency, National League for Nursing, Inc.

EXTRAMURAL ACTIVITIES -- LOCAL

Conducted teaching sessions at the following hospitals:

- St. Charles Hospital
- Smithtown General Hospital
- Mather Memorial Hospital
- Huntington Hospital
- Meadowbrook Hospital
- Brookhaven Hospital
- Good Samaritan Hospital
- Doctors Hospital
- Brookdale Hospital Center
- Nassau Hospital

Regional Medical Programs meeting, Cornell University Medical College, New York, N.Y., June 12, 1969.

Suffolk Academy of Medicine, Meeting with Suffolk County General Practitioners, Hauppauge, N.Y., June 18, 1969.
Edmund D. Pellegrino, M.D.

Health Sciences Advisory Board Meeting, Stony Brook, New York, June 26, 1969.
RESEARCH ACTIVITIES

The work in our laboratory in the past year has been devoted to the following projects:

1) Continuation of studies on the chemical constitution of the bone crystal complex in the early stages of calcification. Several papers on the chemistry of carbonate ion have been published and a couple of others are in press. Solution, solid-phase, equilibrium relationship have been investigated and a study concluded.

Current studies are devoted to the elucidation of the earliest phases of deposition of bone crystal in embryonic chicken bone. Developmental chemical anatomy has been elucidated in the paper which will be submitted shortly.

2) Studies are continuing on the biochemical definition of metabolic bone diseases. Osteomalacia, osteoporosis, osteopetrosis are being studied in man and in experimental animals. Histo-radiographic, infra-red and chemical analytic methods are being used and correlated.

3) Studies have been completed on ion transfers in contracting and exercising muscle in a human. This paper will be submitted for publication shortly.

4) Studies are also continuing on the physiological functions of the parathyroid hormone in patients who have parathyroid disease.
The following grants were received during the past year:

1) The United Fund of Long Island - $20,000 per year for five years - to assist in planning the community aspects of the Health Sciences Center.

2) Regional Medical Programs - U.S.P.H.S. Planning Grant for two years - $675,000.

3) Commonwealth Fund Grant - $375,000 - for three years, for use of the Director of the Health Sciences Center in the development of four programs:
   a) Educational Technology and Media Development
   b) Educational Evaluation
   c) Social Sciences in Medicine
   d) Humanities in Medicine

General Medical Program-Project Committee Meeting, National Institutes of Health, Bethesda, Maryland, May 12, 1969.
RESEARCH ACTIVITIES

Investigation of viral oncogenesis in a model system (avian myeloblastosis virus) was continued. Induction of DNA synthesis in target host cells is a labile process subject to changes in medium. Evidence for a new "pro-viral" DNA, induced by this RNA virus, has been sought, in view of our previous demonstration of sensitivity of the process of infection to DNA inhibitors, but so far not obtained.

A comprehensive review of human inborn errors (Ann. Rev. Genet., in press) revealed strong evidence for the notion that deficiencies for a given enzyme occur at different intragenic sites and that such an important feature as mental retardation may occur with one and not with another, based on small quantitative differences. Therefore excess substrate, excess cofactor, apoenzyme stabilization, and superinduction may all be considered as therapeutic means for dealing with existing enzyme defects without resorting to genetic surgery. A few examples of this approach are cited.

Seminar on absence of preferential binding of transported sugars in erythrocyte membranes in Biology Department's Research Reports, January 19, 1969.

Seminar on preferential glucose binding to tris-disrupted brush border membranes in Biology Department's Transport Journal Club, April 9, 1969.

SPECIAL LECTURES, ADDRESSES AND PAPERS

PARTICIPATION IN MEETINGS AND CONFERENCES

RESEARCH ACTIVITIES

Supported under N.S.F. Grant

Four primary approaches have been used toward achieving the identification and molecular characterization of the components in the human erythrocyte membrane responsible for the "facilitated diffusion" of sugars through this structure:

(1) equilibrium dialysis of sugars in the presence of alcoholic or detergent extracts of human erythrocyte stromata;

(2) proteolytic digestion of the interior surface of the erythrocyte membrane;

(3) sugar distribution in synthetic analogue systems (smectic mesophases);

(4) retardation chromatography on sugar mixtures passing through columns impregnated with erythrocyte "ghosts" or extracts thereof.

Recent studies lead to the conclusion that the upper limit for the number of sugar-fixing sites per cell may probably be reduced from our previously reported figure of 300,000 to about 25,000. A technique for the incorporation of enzymes into functional erythrocytes has been developed, and should be a valuable tool in the characterization of the erythrocyte membrane. The retardation chromatography studies have further amplified our previous conclusion that the specific glucose-binding claimed by the British investigators on the basis of this technique is quite fallacious and can be readily explained on another basis.

STUDENT RESEARCH

Martin J. Rosenberg, B.A.

This program, intended for development as a doctoral thesis to be submitted to the Biology Department of the Graduate School concerns monosaccharide transport between the blood and brain in isolated perfused rat heads. The technique involves measurement of arterio-venous differences of sugar and non-diffusible dye concentrations in serial samples of an artificial blood after a single passage through the brain. Since many of the results obtained to date have appeared clearly self-contradictory, current activities center on modification of the procedures to evaluate feasibility of continuation with this approach.
LECTURES, SEMINARS, CONFERENCES AT S.U.S.B.

Seminar on role of 2,3-diphosphoglyceric acid in passive potassium efflux from erythrocytes, in Biology Department's Transport Journal Club, April 23, 1969.

LECTURES, ADDRESSES AND PAPERS

Paul G. LeFevre, Ph.D.

UTILIZATION OF SPACE

Room 206, Engineering Bldg. - furnished for office use for three persons; occupied by Drs. LeFevre and Masiak and occasional secretaries, July 25, 1968.

Rooms 101-103, Engineering Bldg. - furnished during summer, 1968, as research laboratory for cell physiology studies; occupied by Drs. LeFevre and Masiak, graduate student J.J. Rosenberg and ancillary personnel, about September 17, 1968.

Starting date: September 1, 1969
Sanford L. Kravitz - has been appointed Dean, School of Social Welfare and Professor of Social Welfare.

Starting date: September 1, 1969
Malcolm H. Skolnick, Ph.D.

PUBLICATIONS

SPECIAL LECTURES, ADDRESSES AND PAPERS

American Physical Society Annual Meeting; Section meeting on Preparation of Physics Teachers, Preparation of Graduate Teaching Assistants to Teach in the Sciences, February 5, 1969.

Materials for an Open-Ended Undergraduate Physics Laboratory, Commission on College Physics Summer Workshop, July, 1968.

EXTRAMURAL ACTIVITIES

Consultant, U.S. Department of Labor. Training of Community Advocates. Study Grant sited in Wyandanch, N.Y.

Consultant, U.S. Peace Corps. Training of Peace Corps Volunteers in separate programs in Ethiopia, Liberia, and Sierra Leone, at Virgin Islands Training Center.

Consultant to the American Medical Association. Direction of Film Segment of E.D. Pellegrino, M.D., discussing Patient Care Committees.

Member, Committee on Uses of Computers in Medicine in Bi-County Area sponsored by Nassau and Suffolk Academies of Medicine.

Member, Committee on Uses of Computers in Medicine, Regional Medical Program.

COURSES TAUGHT FOR THE UNIVERSITY

Physics 101-102 Lecturer and recitation instructor
CED 560
Physics 239 ) Methods in Teaching Secondary Science
CED 530 Methods in Teaching Elementary Science
PARTICIPATION IN CONFERENCES AND MEETINGS

Commission on College Physics Summer Workshop, New Mexico State University, Las Cruces, New Mexico, staff member, Preparing High School Physics Teachers, July, 1968.

IBM Customer Executive School, Medical Industry Department, on Hospital Information Systems, Poughkeepsie, N.Y., February 10-14, 1969.

Nassau Academy of Medicine, Garden City, N.Y. Planning meeting, appointed chairman, Committee on Medical Use of Computers in the Bi-County Area, February 19, 1969.

National Science Foundation Site Visits, Columbia University Teachers College, New York, N.Y. Evaluation of Science Curriculum Improvement Study, April 1- and April 30, 1969.

Council on Medical Television, Kansas City, Missouri, April 24-26, 1969.

SUNY Directors of Educational Communications. Chairman, Ad Hoc Committee on Research and Development in Education. Committee meetings in New York City and Binghamton, N.Y. in preparation of final report for June, 1969 meeting of Directors in Albany.

IBM Seminars on Use of Computers in Medical Education, Hospital Information Systems, Patient Care Support Systems, etc. Stony Brook and IBM, Yorktown Heights and Mohansic, N.Y., May 26-28, 1969.

Suffolk Academy of Medicine, Hauppauge, N.Y. Meeting regarding Computers in Medicine, June 5, 1969.
GRANTS

Graduate Research Council - $1,500 to support research in respiratory research (Respiratory Distress Syndrome and Hyaline Membrane Disease).

Department of Army Medical Research and Development Command. Continuation of existing grant for a prototype X-ray scanner has been sought and secured. Continuation begins July 1 for $325,000.

RESEARCH ACTIVITIES

Study of hierarchies of constraints on poverty in extended urban and semi-urban areas.

Improvement of teacher training using techniques in video recording to monitor goal selection-attainment processes.

Development of techniques for early diagnosis and treatment of respiratory distress syndrome (Hyaline Membrane Disease) with Robert Bienkowski (graduate student in Physics) in cooperation with Nathan Seriff, M.D., Director of Pulmonary Medicine, Queens General Hospital and Norman Gootman, M.D., Physician in charge of Pediatric Cardiology, Long Island Jewish Hospital Medical Center.

Development of computer pattern acquisition and analysis of dental X-ray patterns of flying spot (cathode ray tube) scanning with David Levine, Ph.D. and David Mushabac, D.D.S.
DEPARTMENT OF LABORATORY AND ANIMAL MEDICINE
Steven H. Weisbroth - Director, Department of Laboratory and Animal Medicine and Assistant Professor of Pathology

Appointment date: April 1, 1969

Sheldon Scher - Assistant to the Director

July 1, 1969
BIOMEDICAL LIBRARY
During the budgetary year 1968-1969, the Library made considerable progress in acquiring book materials, equipment and staff to support the academic and research programs of the Health Sciences Center.

The first librarian was appointed to the staff in October, and a small staff was organized to handle the administrative, financial and technical operations of this new unit.

This year we began to participate in the SUNY Biomedical Communication Network. Considerable effort and time were spent in planning and activating this ambitious project.

The Library staff concentrated its efforts in the technical services areas, selecting and ordering material in the field of medicine and related subjects. The first listing of the serial titles received by the Library was prepared and distributed to the Health Sciences Center Staff.

Special care has been given to preparing comprehensive and accurate records of the Library's holdings. These records are easily adaptable to computer techniques, and will facilitate the future automation of Library operations.

The Library Director, Mr. Emil F. Frey, visited in March, May, and June. Mr. James Foley, the librarian on the staff, has been consulting with Mr. Frey on Library policy and planning since February. Mr. Frey has been actively recruiting librarians, and the present staff is looking forward to his arrival in September.

Liaison has been established with several of the medical and research libraries on Long Island and the Metropolitan New York area.

Some Problems:

The Library has made significant progress in all areas of its operations. The difficulties in building a staff, especially in appointing people to perform secretarial and accounting duties, was one of our foremost problems. The lack of Library shelving was a continuing problem, and we are now in a position where we cannot shelve over half of this year's purchases, and none of the donations.

The lack of allocated funds for our binding operation is a very serious problem. Our binding costs will be approximately 15 per cent of our total book budget for the coming fiscal year.
PERSONNEL

NEW APPOINTMENTS

Frey, Emil F., Director of Library, and Assistant Professor of Medical Communications. Foley, James, Associate Librarian, October 7, 1968.

NEW ANCILLARY PERSONNEL
(July 1, 1968 to June 30, 1969)

ADDITIONAL ACTIVITIES

1) Meeting with Mr. Alfred Brandon, Library Consultant, William H. Welch Medical Library, Baltimore, Maryland, October 27, 1968.

2) Meeting with Mr. Irwin Pizer, Director of Upstate Medical Center Library, Upstate Medical Center, Syracuse, N. Y., November 25, 1968.

3) Meetings with Mr. Emil Frey, Director of Health Sciences Library, SUNY at Stony Brook, Mayo Clinic Library, Rochester, Minnesota, March 13-14, May 21-23, 1969.

PARTICIPATION IN CONFERENCES & MEETINGS

James Foley

Institute for Public Librarians, Trustees Serving Long Time Hospital Patients, Blind and Handicapped Persons, U. S. Veterans' Administration Hospital Library at Northport, N. Y., December 5, 1969.

Seminar on the Application of Computer Techniques to Serial Control, Mount Sinai Hospital, N. Y., February 8, 1969.

Special Libraries Association Annual Conference, Montreal, Canada, June 1-5, 1969.

UNIVERSITY HOSPITAL

A. The University Hospital staff was actively involved in planning of the University Hospital with Bertrand Goldberg Associates. In addition to numerous detailed planning sessions, visits were made to a variety of institutions throughout the country (see appended list).

B. The University Hospital staff met with representatives of the following hospitals and agencies in Long Island to discuss possible relationships that might be developed:

Meadowbrook Hospital
The Long Island Jewish Medical Center
Northport Veterans Administration Hospital
Hospital of the Brookhaven National Laboratory
Franklin General Hospital
Brunswick Hospital Center
Brookdale Hospital Center
Nassau Hospital
Westhampton Hospital Fund
South Nassau Communities Hospital
Community Hospital of Glen Cove
St. Charles Hospital, Port Jefferson
St. John's Hospital, Smithtown
Martin Luther King, Jr. Community Health Center
Plainview Health Center, Nassau County Dept. of Health
Mercy Hospital
Medi-screening Center of Long Island
East Nassau Medical Group

C. A number of meetings were held with representatives of the Veterans Administration in connection with the anticipated construction of a VA Hospital at Stony Brook.

D. The University Hospital staff was significantly involved in community health planning, through participation in such agencies as the Regional Medical Program, The Comprehensive Health Planning Council,
The Suffolk County Task Force on Hospitals, The Long Island Health and Hospital Planning Council and the Health and Welfare Council of Nassau County.

E. The University Hospital staff provided consultative services to various agencies in Long Island including the Martin Luther King, Jr. Community Health Center, Children's Psychiatric Hospital in Melville, the Nassau County Department of Health and South Nassau Communities Hospital.

F. A resident in hospital administration was accepted from the Cornell University-Sloan Institute of Hospital Administration for a three-month residency with the University Hospital planning staff.

G. The University Hospital staff developed a grant proposal for submission to the United Fund of Long Island, as a result of which UFLI made a $25,000 grant to the Health Sciences Center for the purposes of planning the development of the Center with special emphasis on community needs throughout the Long Island area.

H. The University Hospital staff, with the participation of an unpaid consultant, Dr. Raymond Fink, developed a preliminary proposal for submission to the National Center for Health Services Research and Development, looking toward the funding of a major study of methods of delivery of health services.

I. The University Hospital staff participated in the development of a preliminary submission to the National Bureau of Health Manpower, HEW, for construction funds.
J. Dr. Rogatz conducted a seminar course on hospital costs (Eco 394) for the Department of Economics, in which two students enrolled. Mr. Robert Bruner and Mr. Donald Meyers participated actively in the seminar discussions and in supervision of the field work.
Mr. Robert Bruner, Administrator, University Hospital  (Jan. 20, 1969)
Mr. Donald Meyers, Director, Systems Operation and Development  
(June 2, 1969)

ANCILLARY PERSONNEL

Mrs. Sally Schirmer, Senior Secretary  
(Jan 16, 1969)
