Re: Changes to the Minor in Computer Information Sciences

The Computer Science Department met today and passed the motion that the name of our minor be changed *from* "Computer and Information Sciences" *to* "Computer Science".

Rationale: After approval at all campus levels, the Computer Science Major revision was approved by the State Education Department in November 2007. As part of that revision, the name of the major degree program was changed from "Computer and Information Sciences" to "Computer Science". For consistency, we seek to make the same name change to our minor degree program.
