### **6. Film Research**

So you want to write about movies? We'll show you how interesting and wide-ranging film research really is. Find where the peer-reviewed articles on film are - and aren't, searching for films and scenes by image, sound and keyword, online film archives, finding reviews, organizations, schools and institutes, film buffs, film blogs, film nuts and number crunching, and what's a movie, anyway: TV, video and the internet. "Can you please read over my paper to check it for spelling and grammar?" Learn how to: narrow down your subject areas, do a literature review in your field, find books in STARS, use the library's education subject guide databases to find articles, do a search of the above databases with a federated search engine called Galaxy, and find other library resources such as e-books, research guides by subject area.
