CEG 537 Immigration Experience in Lit (AH/LS)

This course will examine the immigration experience as reflected in literary works of various genres. The focus of the course will be to identify the unifying characteristics of the works of immigrant writers: What experiences are universal to immigrants from a wide variety of sending countries and cultures? What is lost and what gained in the assimilation and integration processes? How did different ethnic groups respond to the process and how are the similarities and differences reflected in the literary documents they have produced? What does it mean to write about the immigration process and how does the act of writing serve to validate and/or 'work through' certain experiences and ordeals common to most immigrants? Certain common themes we will examine are: prejudice and racism, exploitative labor, and the female immigrant's role within the family structure as it contrasts with the 'old world' conception of a woman's place in the home and community.

Note: This 9-week online course begins 8/29/11; ends 10/30/11; last day to add 9/01/11; visit www.stonybrook.edu/spd/online/started for online course requirements.

CEI 504 Human Behavior as Rational Action (SB/LS or MPS Core A)

Rational behavior means choosing among possible actions those that are most efficient in meeting one's goals. Whether people do so is one of the oldest unresolved disputes in philosophy and the social sciences. We will trace the main positions in this dispute as they have evolved in philosophy, psychology, economics, anthropology and sociology. Even if individuals do act rationally, can we assume that the large scale social patterns that result are necessarily effective? Readings will consider the topic abstractly, but also in the concrete settings of small intimate groups, formal organizations, and primitive and modern economic, social and political systems in both stable and revolutionary situations.

Section S30: Online course, Nicholas Scalzo, Class#97655

CEI 505 Social Science Methodology (SB/LS or MPS Core A)

This course explores the relationship between facts and theories in the social sciences. Various approaches to identifying research questions, applying or building relevant theory, and formulating and testing hypotheses are examined. Emphasis is placed on logical reasoning rather than technical sophistication.

Note: This 9-week online course begins 8/29/11; ends 10/30/11; last day to add 9/01/11; visit www.stonybrook.edu/spd/online/started for online course requirements.

Section S31: Online course, Edward Delgaizo, Class#70247

CEI 506 Understanding Other Cultures (SB/LS)

An introduction to cultural anthropology which will look cross-culturally at various aspects of human society. Focus will be on the application of anthropological methods, theories, and perspectives to the understanding of other cultures, both present and past, with an emphasis on examining meaning and behavior in order to draw relevant comparisons between ourselves and others. Globalization and the effect this has on cultures of the world will also be reviewed.

Note: This 9-week online course begins 8/29/11; ends 10/30/11; last day to add 9/01/11; visit www.stonybrook.edu/spd/online/started for online course requirements.

Section S30: Online course, Katherine Mitra, Class#97737

CEI 511 Modern Commun: Tech Systems (NS/LS)

The study of basic principles and concepts that underlie the design and usage of modern communications technology systems is the emphasis of this course. All effective communications systems (such as radio, TV, and radar) must be designed to match the capabilities of the human user. An example of good ergonomic design is how a hi-fi system is designed to match the hearing characteristics of humans. Students will explore the background principles that relate to communications systems, including the electromagnetic spectrum and analog and digital signals. The study of communications technology systems will also deal with the human and societal impacts.

Section S30: Online course, Albert Pisano, Class#97892

CEI 519 Phil Perspectives on Childhood (SB/LS)

With their first questioning, Why? children challenge us to examine the presuppositions of experience. Their natural tendency to philosophize about words, reality, and morality requires careful nurturing if it is to develop into careful critical reflection. Using the current research and curriculum models of Lipman, Matthews, and others as a guide, we will embark on structured philosophic dialogues with children, coincidentally seeking to reawaken our own wonderment about our world. At the center of our focus will be the tantalizing image of childhood, universally lived and yet mysteriously foreign to the adult. What visions of the world can we share with a child? Philosophy will serve as our conduit into these shared landscapes. In individual research students will have the opportunity to explore historical, sociological, and psychological (as well as philosophical) perspectives on childhood.

Note: Previous course in philosophy recommended

Section S30: Online course, Wendy Turgeon, Class#97771

CEI 531 Cultural Diversity: American Musicals (AH/LS)

This course will use classic musicals to explore differences in ethnicity, gender and economic class. Musicals to be discussed will include Show Boat, West Side Story, Fiddler on the Roof, My Fair Lady, South Pacific, King and I, Carousel and other musical examples. Students will be asked to explore and report on contemporary examples of musicals and popular music videos to expand the resources available in the teaching environment. Combined, these resources, in addition to assigned readings, will form a context for exploring current pedagogical techniques for teaching about cultural diversity (specifically ethnicity, racism, sexism, and economical stratification). Students will receive guidance in the use of music within the classroom to focus discussion on current social issues. The course will rely heavily on active learning. Ideas presented by students and musical examples recommended by both the instructor and the students will drive the content regarding specific topics covered. The instructor will provide the overall format and most listening and reading materials for the course and will maintain a focus so that students do not pull the subject matter away from the stated description.

CEI 544 Mystery of Matter (NS/LS)

Exploration of our understanding of the basic constituents of matter, and of how that understanding and the tools developed to study them affect aspects of contemporary society. Historical discoveries and their place in social and political institutions of the time are considered, along with issues of government funding and the cost to society. Includes a discussion of developments at Brookhaven National Lab and their scientific and social impact. Note: Suitable for students without science background; some chemistry and physics background helpful but not required; coscheduled with PHY 313. Formerly: From Quarks to Cosmos

Note: Suitable for students without Sci background; some Chem and Physics background helpful- not necessary; Offered as CEI 544 and PHY 313

Section 01: TU, 5:20 PM-8:20 PM, TBA, Class#97639

CEI 550 Human Ecology (NS/LS)

This opportunity to explore and analyze the diversity of ecological literature will look at the discipline both as a science of ecology and as a science that applies to the human condition.

Section 01: TH, 5:20 PM-8:20 PM, Francis Turano, Class#97640

CEI 558 Youth and Gang Violence (SB/LS)

Designed for educators, social workers, youth workers, administrators, and others who work with youth, this course will examine youth and gang violence in contemporary America from a public health model. The public health model is a multidisciplinary approach to problem solving that emphasizes involvement in a variety of perspectives including sociological, economic, psychological,

and cultural competence. Through discussions, readings, and research, students will learn the factors that contribute to youth violence and develop the strategies and skills for effective prevention and intervention.

CEI 560 American Democracy: Its Critics and Defenders (SB/LS or MPS Core B)

This course will examine the central components of American democratic government. Critics and defenders of the over 200 year-old Constitution (Congress, President, Supreme Court) will be discussed, as will arguments surrounding the role of political parties, pressure groups, and the bureaucracy. Most readings will be from contemporary authors and reference sources. This course is offered as both CEI 560 and POL 560.

Section S01: TU, 5:20 PM-8:20 PM, Seth Forman, Class#97653

CEI 567 Women & American Experience (SB/LS)

This course introduces students to current scholarship and themes relating to women in US history from early Native American societies through the present. Students will examine various issues that have impacted women's lives, women's role in shaping America's past, and the practice of analyzing the past through the lens of gender. We will also focus on the rise of modern beauty culture as a case study.

CEI 572 The Uses/Abuses of Technology (NS/LS)

Has today's technology been, on the whole, socially beneficial, or has it been detrimental to human life? Take a look at this question by examining such topics as: the nature and types of technological activity; the history of technology and its relation to science; and issues in ethics, economics, and politics. Concepts such as growth and progress, productivity and efficiency, the means-ends relationship, and the 'good life' will be explored.

CEI 589 Technology and the Classroom (SB/LS)

This course will focus on issues and controversies surrounding such learning technologies as the textbook, blackboard, film, radio, television, and computer. These technologies when introduced into the classroom were expected to change pedagogical practices in order to improve student performance. By examining these tools historically, politically, economically and socially, students will assess the influences outside forces, such as business and government, exerted on the selection process in order to address non-pedagogical issues such as class size, teacher shortages, and inadequate funding.

CEJ 552 Adolescent Literature (AH/LS or SB/LS)

This course focuses on the reading of novels, short stories and poetry written for and about adolescents from diverse backgrounds. This course will provide a fuller definition of the developmental stage known as adolescence; offer a range of critical and interpretive approaches to adolescent literature; and explore more deeply the challenges and concerns of adolescents as depicted in the course readings, discussions, oral presentations, and written work.

Note: Offered as CEJ 552 and EGL 360

Section 01: TU, 5:20 PM-8:10 PM, Karen Lund, Class#97742

CEK 501 Survey of Higher Ed Admin

This course will introduce student to the primary areas of responsibility for higher education. Topics will include college and university organizational structures, human resource issues, finance and budgeting, legal issues, parental involvement, mission/access/retention.

Section S01: M, 5:20 PM-8:20 PM, Richard Gatteau, Class#70226

CEK 502 College Students Development Thry (SB/LS)

This course examines the major theoretical constructs that inform practitioners who work with college students. Topics will include moral and ethical development, emotional maturation and identity formation, as well as the link between student persistence and involvement. Students will gain an understanding of psychosocial/affective, cognitive, typological and person/ environment interaction theories.

CEK 503 Leadership in Higher Education

Colleges and universities are unique institutions. Although they seem to increasingly resemble the complex organizations typically found in business and public administration, their special missions of teaching, research and service put them in a singular category where collegiality and university traditions of academic freedom introduce powerful cross-currents of equality. This course explores collegiate leadership, from the lofty heights of the presidency to the more mundane challenges faced by managers at all levels, be they in academic or administrative units. Students will become familiar with the myths and realities of leadership, as presented in the literature, and conduct their own leadership studies.

Section S01: TH, 5:20 PM-8:20 PM, Paul Edelson, Class#70265

CEK 504 Research/Assess/Evaluation Higher Education

This course introduces research, assessment and program evaluation in colleges and universities. With increasingly difficult, diverse, and complex decision-making circumstances, it is essential that professionals examine assessment techniques and how these strategies may be best employed to benefit organizations and ultimately their stakeholders. Higher education (like other organizations) must use evidence for planning and linking programs, evaluating and assessing program results, and

improving programs based on evaluation data. Assignments will emphasize how to perform effective, high quality assessment and program evaluations.

CEK 520 Advising/Counseling Higher Ed

This course is an introduction to advising and counseling in higher education. Course topics include advising and student development theory; advising structures for effective learning, teaching, and mentoring; legal issues in advising; advising methods and best practices; key stakeholders in advising; and articulating a personal advising philosophy.

Section S01: M, 5:20 PM-8:20 PM, Jenny Hwang, Class#98021

CEK 521 Diversity and Higher Education (SB/LS)

This course examines diversity in institutions of higher education from both a theoretical and historical framework. It will provide a foundation for examining policy and practice by the study of key concepts in human diversity, legislation and case studies. Best practice assessment methods are explored within the context of multicultural pedagogy.

Section S01: W, 5:20 PM-8:20 PM, TBA, Class#97952

CEK 523: Student Affairs Administration in Colleges and Universities

An overview of the history of the Student Affairs field as well as a more in-depth examination of the changing context in which student affairs professionals practice. This includes the philosophies, ethics, and theories that guide the practice of student affairs work. Review of the development of the field, legal and ethical foundations of practice, learning, retention and development theories, changing campus environment (including diversity, economic considerations and access issues), organizational structure, strategic planning and finance, information technology, learning outcomes and assessment and human resources as they relate to student affairs. Consideration of the practical application of such topics in specific student affairs units including housing/residence life, student activities, career services, counseling and student health centers and judicial affairs.

CEL 591 Fundamentals Libr & Info Sci

This historical introduction to the profession of librarianship and information science will look at professional literature; role and structure of libraries and information agencies in the conservation and dissemination of knowledge to various clientele; and the nature of research in library and information science.

Section 01: W, 5:20 PM-8:20 PM, Susan Gottesman, Class#97641

CEL 599 Technology of Information

This course will introduce the student to the conceptual and practical elements of visual and computer literacy for the library and information science profession. Particular attention will be paid

to their place and role in libraries and information centers. A laboratory session following each class will give students the opportunity to begin to apply some of the concepts learned in class and to learn and strengthen basic skills.

Section 01: M, 5:20 PM-8:20 PM, Thomas Donlon, Class#97642

CEM 570 Manipulatives and Mathematics (NS/LS)

The focus of this course will be the use of manipulatives as applied to the standards set forth by New York State and the National Council of Teachers of Mathematics. Participants will be using manipulatives during each class period to solve problems and increase mathematical knowledge.

Emphasis will be on content and concepts for grades 4-8.

Section S01: M, 5:20 PM-8:20 PM, Kirk Mason, Class#97643

CEM 573 L.I. Ocean Beaches (NS/LS)

This course is a practical guide to beaches and coastal processes on Long Island's ocean shoreline. Topics include beach features, waves and storms, erosion and erosion control. Recipes for describing and forecasting beach conditions. Suitable for coastal residents, community planners, real estate agents, environmental lawyers, teachers, etc.

Note: This 9-week online course begins 8/29/11; ends 10/30/11; last day to add 9/01/11; visit www.stonybrook.edu/spd/online/started for online course requirements.

CEM 582 Problems of Adolescence (SB/LS)

This course is designed to look at problems experienced in adolescence. The scope of the course will include an overview of the contemporary societal problems experienced by adolescents today.

Intervention strategies through the use of education, counseling and peer support will be explored as a means of increasing effectiveness when working with adolescents. The course is a combination of didactic lectures, experiential practica, film and literature reviews.

Section S01: TU, 5:20 PM-8:20 PM, Kenneth Edwards, Class#97730

CEN 514 Geology of Long Island (NS/LS)

This introduction to the geologic process will explore timelines, continental drift, volcanism, beach processes, glaciation, running water, erosion and weathering, and more, all related to the geologic development of Long Island. There will be two mandatory full-day field trips to observe the region's geologic features.

Prerequisite: Introductory geology course

Section 01: TH, 5:20 PM-8:20 PM, Mirza Beg; Steven Englebright, Class#97644

CEN 557 Statistics and Society (NS/LS)

The goal of this course is to provide students with the ability to critically evaluate social phenomena through an understanding of basic statistical analysis. Students will learn to describe and evaluate data using statistical methods/software. The use of Microsoft Excel with a statistical plug-in will be used by the students to solve the graded problem sets.

Prerequisite: Proficiency in elementary mathematics recommended.

Note: This 9-week online course begins 8/29/11; ends 10/30/11; last day to add 9/01/11; visit www.stonybrook.edu/spd/online/started for online course requirements.

CEN 582 Science in Science Fiction (NS/LS)

The course will deal with an examination of various science fiction short stories and novels to evaluate the validity of the science content based upon the time of writing. Works before and after 1960 will be compared to assess how well the science fiction predicts future technologies. Video and film versions will be compared to the written stories to see how (and if) story and scientific emphasis is changed.

Section S01: W, 5:20 PM-8:20 PM, Bryan Horan, Class#97842

CEP 500 Sport and Society (SB/LS)

This offering will focus on the relationships between the mounting interest in sport and various sociocultural dynamics in our society. Special consideration will be given to developing within students an understanding of the behavioral responses of sports participants and spectators to various motivations in our social system.

Note: This 9-week online course begins 8/29/11; ends 10/30/11; last day to add 9/01/11; visit www.stonybrook.edu/spd/online/started for online course requirements.

CEP 514 Health Sci Applied to Coach II (NS/LS)

Applied anatomy and kinesiology will be discussed in reference to three major topics: anatomic and physiologic fundamentals of human motion, fundamentals of biomechanics, and principles and applications of motor skills. The major topics to be covered in reference to exercise physiology are the following: physiology of energy sources, neuro-muscular concepts, cardiorespiratory considerations, physical training applications, environmental aspects, and nutrition and body composition. Formerly: The Study of Human Movement. May not be repeated for credit.

Note: This course is one of two approved courses to meet the NYS Coaching Certification Health Sciences Related to Coaching requirement. Students must also take CEP 513, Care and Prevention of Athletic Injuries.

Note: Formerly: The Study of Human Movement. May not be repeated for credit.

Section S01: M, 6:50 PM-9:50 PM, Peter Raalf, Class#97780

CEP 517 Psychology of Sport (SB/LS)

Through discussion, analysis, and review of current issues in psychology, students gain an understanding of how relevant psychological variables affect sports performance. Topics include: personality, motivation, relaxation, imagery, leadership, communication, special problems, special groups, and self concept.

Section S01: W, 6:50 PM-9:50 PM, John Bowman, Class#97646

CEP 520 Theory/Techniques of Coaching

This practicum is designed for those students who would like to coach a particular sport at the high school level, but who have had limited coaching experience. A field study program will pair each student with an experienced coach for one season. At the end of the season, each student will be evaluated in the administration and presentation of a specific coaching program. Formerly: Athletic Coaching Accreditation Practicum/Field Study. May not be repeated for credit. Note: This course is approved to meet NYS Coaching Certification requirements with specific sport(s) designation. Prerequisite: CEP 507 and matriculation in the AGC in Coaching.

Prerequisites: CEP 507. Must be matriculated in the AGC in Coaching.

CEV 508 Writing & Understanding Poetry I (AH/LS)

This course will provide students with a solid grounding in the basics of writing poetry. Students will read collections of poetry by contemporary American poets and will study how these master poets give their work focus, beauty, and resonance both as works of art and as public statement. Students will be asked to write poems in response to the assigned poetry and will be guided in the writing of their own original work. The course will also serve to sharpen students' abilities as readers, writers, and interpreters of poetry.

Note: This 9-week online course begins 8/29/11; ends 10/30/11; last day to add 9/01/11; visit www.stonybrook.edu/spd/online/started for online course requirements.

CEV 516 Themes in Science Fiction (AH/LS)

Students in this course will examine some of the major themes and techniques of selected works of science fiction. Although science fiction has been written since the early 1800s, it was not recognized as a distinct genre until the 1930s in America. There is still controversy over the definition of science fiction. In addition, we will be examining works of science fiction that have been made into movies, examining the effects that such mutation has had on the original in terms of plot, theme, message, social implications, etc. We will begin at the arguable beginning of the genre with Frankenstein (1818) and end with 'Johnny Mnemonic' (1985). All of the movies are currently available for rental or purchase.

Section S30: Online course, Margery Brown, Class#97714

CEV 519 Literature of Healing (SB/LS)

In this course we will study literary works that increase one's awareness of life passages. Using European and Eastern translated writings along with American authors, and film, we will examine topics such as human struggle, self-actualization growth and death. The works will be linked to non-fiction essays on philosophy and psychology.

CEV 520 Lit/Culture of Poker in America (AH/LS or SB/LS)

This course will explore how poker players and the culture of poker are represented in novels, film and essays. We will look at the ways in which the game illustrates a peculiarly American subculture as well as non-fictional accounts of poker's changing place in American culture and examine its relationship to popular culture. The game of poker will be examined as a metaphor for social interaction (e.g., risk taking, gender performance, attitudes towards chance and control, etc.) and the character of poker players as examples of classic American types (e.g., the frontiersman, the gambler, the lone wolf, etc.), attempting to account for the recent popularization of poker as spectator sport and national pastime.

CEV 539 Working 9-5: Social Class & Culture in Amer Literature (AH/LS)

In this class we will examine the relationship between social class and culture, as expressed in the writing of poets, fictionists, and essayists. In particular, we will examine the myth of America as a classless society, and historically how writers have challenged that myth. We will also analyze the intersections between class and gender, race, and ethnicity and discuss whose interests are served when groups are described in certain ways.

CEV 545 New York Stories: Literature (AH/LS)

In this course, we will examine the works of authors from the Lower East Side of Manhattan. This neighborhood, home to many Eastern European immigrants, has produced a significant number of literary works, all of which help us gain insight into the life and realities of those who settled there. We will see the way the Lower East Side becomes a sort of iconographic point of origin for many artists and writers, even those whose connection to the area was distant, either by choice or circumstances, as well as analyze the reason for such great literary production in an area marked by poverty and hardship.

CEV 546 Disney and the American Dream (AH/LS or SB/LS)

An analysis of the role that Disney animated films have played throughout 20th Century America, and how they have addressed the issues of race, class, and gender. This course allows students to gain a better understanding of the impact that American culture and politics has had on Disney's works, as well as attain a clear grasp of the significance of technology, globalization, and international relations to Walt Disney, the company, and the continually transforming American people. By examining animated films, and incorporating readings that both criticize and defend Walt Disney and the Disney organization, students will draw their own conclusions about Disney's status as an icon of American popular culture, as well as evaluate the Disney phenomenon and its place in American History.

CEX 520 Ethics in Management (MPS Core A)

This course aims at enabling students preparing for careers in management to bring to bear on problems of organizational life those ethical principles they have already adopted based upon religious, secular, and personal experience. Starting with relatively simple problems (bribery), the course progresses to more complex and ambiguous situations (government-operated lotteries, corporate greed). Practice is given in orally defending ethical opinions.

Section S31: Online course, Susan Alevas, Class#97998

CEX 537 Training and Development

This course provides an overview of employee training methods, training design, development programs, and evaluation procedures, including cost/benefit analysis. Emphasis is placed on how to perform a needs analysis, how to select the latest training technologies, and how to apply these technologies to maximize adult learning. In addition, development strategies are reviewed-for instance, when to train generalist managers and specialists, how to foster an atmosphere conducive to continuous learning, and how to reward supervisors for supporting their subordinates' development. Students apply these concepts to a specific organization for hands-on learning. In addition, a focus on career planning and development gives students a chance to take interest inventories and self-assessments of abilities and learning style. Students formulate their own career plans and develop action strategies. This course is offered as both MBA 537 and CEX 537.

Prerequisites: Students in the MBA or MBX Program only.

Section S30: Online course, Kevin Hauss, Class#97972

CEX 538 Organizational Change Mgt (SB/LS)

The aim of this course is to acquaint students with types of organizational change and the roles of human resources managers as change agents. Cases, group exercises, and class discussions are used to examine change methods, employees' reactions to change, facilitation techniques, and evaluation methods. Roles of leaders, managers, employees, and human resources professionals are considered. Targets of change include job designs, interpersonal relationships, and organizational structures. Quality improvement, employee involvement, and professional development are studied as examples of change strategies. Students learn how to help themselves and their co-workers cope. This course is offered as both CEX 538 and MBA 538.

Prerequisite: MBA 532/CES 515

Section S30: Online course, Edward Delgaizo, Class#97827

CEY 503 Environmental Law and Regulation (SB/LS)

Designed for the non-lawyer interested in environmental planning, regulation, and enforcement, this course will introduce significant statutes, regulations, and judicial decisions in their historic context, including policy considerations and litigation strategies. The course will also provide an overview of environmental law as it relates to the protection and preservation of land, air, water, and natural resources. Students will be given practical advice on preparing environmental impact statements and working with regulatory agencies.

Note: Offered as CEY 503 and MAR 536

Section 01: TU, 5:20 PM-8:10 PM, Michael Cahill, Class#97669

CEY 507 Long Island's Groundwater (NS/LS)

This course will cover basic groundwater concepts in unconsolidated sediments, and examine contamination issues in light of Long Island's particular hydrogeology, land use, and waste management history. Mathematical principles will be discussed but not stressed; scientific and technical papers discussing particular concepts or problems, including important local examples, will be closely read. Crosslisted with MAR 521.

Section S30: Online course, Janakiram Naidu, Class#97785

CEY 512 Marine Pollution (NS/LS)

Pollutant bioavailability, assimilation by marine organisms, toxicity, and related policy issues will be examined in this course, which will also look at physical and chemical characteristics and speciation in the marine environment of organic pollutants, metals and metalloids, and long-lived radio nuclides emanating from the nuclear fuel cycle, as well as the geochemical cycling and mobility in marine systems.

Prerequisite: College-level biology, chemistry and organic chemistry

Note: College-level biology, chemistry and organic chemistry; Offered as CEY/MAR 512 and MAR 336
Section 01: TH, 5:20 PM-8:20 PM, Nicholas Fisher; Bruce Brownawell, Class#97668

CEY 594 Diagnosis of Envir Disputes (NS/LS)

Diagnosis of disagreements about environmental and waste problems. Tools for evaluating disputes about (a) scientific theories and environmental models, (b) definitions and analytical methodologies for estimating risk, 'real' cost, net energy use, and life-cycle environmental impact, (c) regulatory and legal policy, (d) siting of controversial environmental facilities, and (e) fairness and other ethical issues. These diagnostic tools are brought to bear upon case studies of pollution prevention, recycling, nuclear waste disposal, and climate change.

Offered as EST 594 or CEY 594 or HPH 687.

Note: Offered as CEY 594/EST 594 and HPH 687

Section S01: M, 5:20 PM-8:20 PM, Sheldon Reaven, Class#97622

CEZ 542 Behavior Analytic Principles

Presents the applications of behavior analytic principles in changing behavior. Students will learn to select targets for change, to establish and strengthen behavior and to weaken behavior. This course is open to graduate students in a related field and non-matriculated students holding graduate degrees in a related field. Registration for the course is dependent upon prior approval of the instructor.

Courses restricted to students admitted into the Board Certified Behavior Analyst Program

Section S01: TU, 5:20 PM-8:20 PM, Susan Milla, Class#97871

CEZ 570 Concept Appl Behavior Analysis

This course will provide the student with the vocabulary and framework that will form the foundation for later study in Applied Behavior Analysis. Students will learn the basic vocabulary and thinking process integral to ABA and understanding its basic procedures.

Section S01: TU, 5:20 PM-8:20 PM, Robert Newman, Class#70236
