Database Update

This past summer, librarians were engaged in a project aimed at dealing with budget reductions in a manner that would also result in the least possible damage to the print and electronic content that we offer to faculty and students.

We first examined our remaining print journal collection to identify titles that have good-quality electronic equivalents. Titles that met this criterion were cancelled, with some exceptions. We kept, for example, titles that have high quality pictures or photos in the print version that are not duplicated adequately online, such as Dance and Herpetological Review. As a second measure, we compared duplication between titles held in the many databases to which we subscribe. There is a great deal of duplication there, but reviewing the 35,000+ titles that we now have access to is complicated by several factors, for example:

- A single title may be held in many databases, but each database may provide coverage of different years of the publication.
- Some databases may include everything in the print equivalent and others only selected material.
- Some databases have “embargos” on new content and do not add material until it is already several months old.
- Some provide pdf copy, others may include only html copy, and still others provide both.

Librarians pored over reams of data in order to make decisions about how to relinquish databases without the loss of significant content. Low use and high cost were also factors in decisions made. Ultimately, we feel that relatively few truly unique titles were lost. If you discover that a database that you used is no longer available, there is still a very good chance that the title you are searching for is available in another of our databases. We know that moving to a new database can be frustrating and inconvenient but, given the situation, and the need to identify the best places to economize, we did our best to minimize the impact.

For those who discover that a relied-upon title is simply gone from the collection, we have reserved a small amount of money to replace individual titles of value. Let your liaison librarian know if you have experienced this and we will do our best to recover that title for you.
**Database Update (cont’d)**

*Biology Digest, Columbia International Affairs Online* (CIAO), *Criminal Justice Abstracts*, *Lexis-Nexis*, and *Scribner Writers Series* are no longer available. The *Project Muse* database will be available until December.

On the positive side, one of our vendors, EBSCO, is providing SUNY with cost-effective access to the following databases: *Alt HealthWatch, Computer Source, Computers & Applied Sciences Complete, Environment Complete, Health Source, Humanities International Complete, Canadian Reference Centre, Points of View Reference Center, Psychology and Behavioral Sciences Collection, Religion and Philosophy Collection*, and *Vocational and Career Collection*.

It is perhaps also worth noting here that negotiations between SUNY and the Elsevier Corporation for the *Science Direct* database are nearing completion at this point, after almost a year at the table. SUNY is currently at the end of a five year contract for this important database. The negotiations have been difficult to say the least and nearly all of the Arts and Sciences colleges, along with the University Centers, will experience large billing increases next year for continued access to *Science Direct*. We have looked closely at our use of this database and, based on those figures – well over 20,000 uses last year – we are fully invested in continuing to support it but the increase in pricing is additional pressure on the Library’s budget.

Mary Beth Bell, Director, with Kathryn Johns-Masten, Electronic Resources/Serials Librarian

**Food for Fines at Penfield Library November 2 - 25**

Penfield Library is once again sponsoring *Food for Fines*, a chance for you to “pay” overdue and other fees with food donations. Each item of food will cancel $1.00 or less in fees. (Exception: ramen-type noodles will be accepted as 4 packages = $1.00).

Only pre-packaged, unopened food in cans, boxes or plastic jars can be accepted: no glass, perishables, or damaged/expired items please.

Food will be accepted for fees only, not lost book costs. Items will be donated to the Human Concerns Food Pantry in Oswego. Any food/money donations will also be gratefully accepted.

For further information ask at the Circulation Desk or email circdesk@oswego.edu

**Of Challenges and Changes**

Penfield Library has recently created a space in SUNY Oswego’s iTunes U. We have just begun to put materials in our space, but expect to upload more content soon.

In addition to efforts in iTunes U, the Library now offers a version of its web-based Information Literacy tutorial, *The Lake Effect Research Challenge*, in an Angel-friendly format that can be imported as a component of your Angel course shell. This version of *The Lake Effect Research Challenge* has assessments that can be linked to your grade book. Please contact Shannon Pritting (shannon.pritting@oswego.edu) if you are interested in importing the Challenge into your Angel course.

Shannon Pritting, Special Projects Librarian

‘Round the Clock Service

We have a new addition to our suite of reference services – Ask Us 24/7 chat! This pilot project was started in January 2009 in collaboration with the Northern New York Library Network and other academic libraries across the country.

Ask Us 24/7 offers an added level of convenience, providing faculty and students with assistance at just the time you need it – no matter what time of day that might be. All participating librarians are equipped with information about our resources and services so they can provide expert help.

To access this service, click on the blue Ask Us 24/7 icon on our Ask A Librarian page.

Barbara Shaffer, Reference Services Coordinator

**New to the Library!**

We are most pleased to welcome two new full-time staff members to the Penfield team. Brenda Parkhurst is our new secretary, coming to us from Facilities, Maintenance, and Operations. She brings a great wealth of information and ability gained from her 25+ years of service to the University.

Dr. Ray Morrison is our new Head of Access Services. He comes to us from MidAmerica Nazarene College, in Olathe, Kansas, where he was Director of Libraries for over 20 years. He will now provide oversight for circulation, reserves, and related functions. In addition to his copious professional presentations and publications, he is active in Rotary and the Boy Scouts.

We welcome you both to Penfield!
Penfield Library Associates, the official “Friends of the Library” group for Penfield Library, sponsors two book sales every year, both held in the basement of the library. The most recent sale, on Saturday, October 17, 2009, was a success, with well over a thousand used books finding new homes. Please join us again for book sales in the future!

Textbooks @ Your Library!

For the last several years, our Information Desk has been deluged with requests from students requesting textbooks used in their courses. We view these requests as outcries from students who may not be able to handle the financial burden of purchasing several expensive texts per class.

Library budget limitations do not allow for the purchase of this type of material. Interlibrary Loan has been an option used by many students, but has been normally unsuccessful due to short loan periods. A number of librarians have been in discussions, however, to find a viable answer to this problem. We have considered a number of options and have decided to test a model that has worked for other academic libraries around the country.

With faculty collaboration, we plan to initiate a pilot project entitled “Textbooks on Reserve” in the spring of 2010. We will be asking faculty to donate a copy of required texts to Penfield for placement on Reserve. Faculty will designate the type of reserve loan: 2 hour, overnight, or some variation, for the semester. At the end of the semester these textbooks will be returned to faculty members.

Penfield Subject Liaisons will reach out to their department faculty at the end of the fall semester, and will encourage them to participate in this project.

If you have any questions, please call me at 312-3545 or email me at deborah.curry@oswego.edu.

Deborah Curry, Coordinator, Collection Development/Acquisitions

Library Plans Learning Commons and Continues Valuable Collaboration with CTS

For over a decade, staff in academic libraries have been developing new models of service and building new facilities that cater to an increasingly technology-wise and “social” student body. These students expect us to provide robust computing facilities, access to a broad range of digital information resources, and technology-rich spaces that support collaborative learning and group study. Students also want the assistance of expert staff to help them throughout the research process, from information gathering to assignment completion, no matter what the format. Libraries that have created such facilities often refer to them as Information or Learning Commons; they are environments designed for creation and support, and require a shared effort between libraries and other campus entities for their success.

Penfield Library has been developing its own concept of the Learning Commons. We’ve increased the number of public computer workstations—including laptops that can be checked out from the Circulation Desk, designated group study space with wireless connectivity and power-ready tables for easy laptop use, and created the Lake Effect Conference Room (with a large screen TV/monitor) for collaborative projects. Additionally, our two classrooms provide a setting for not only information literacy instruction, but also practice space for student presentations. Generous funding from private donors, technical help from Campus Technology Services (CTS), & SUNY support helped realize many of these initiatives.

This year we are partnering with CTS on several new projects that will further our efforts toward developing the Learning Commons. The first project is the creation of an experimental classroom in the library, a dynamic space where faculty and students can experiment with instructional technologies, furniture configurations, and pedagogical styles to improve learning and teaching at SUNY Oswego. A steering committee was formed to help develop the concept. Anyone interested in joining this steering committee should contact Dave McQuin (CTS) or Chris Hebblethwaite (Library).

Our second project relates to the campus iTunes U initiative. To encourage faculty and professional staff to develop and post multimedia content to Oswego’s iTunes U site, CTS, in cooperation with the library, is offering two options. The first is a studio in the library equipped with pre-configured hardware and software for recording podcasts and video casts (“vodcasts.”) The room is expected to open this fall. In addition, CTS put together three podcast recording kits and 5 vodcast recording kits that can be signed out from the library’s Circulation Desk for home or office use. For information about SUNY Oswego’s iTunes U initiative and the production of multimedia content go to www.oswego.edu/itunesu.

Our third collaboration is a pilot this fall to discover the pros and cons of providing Technology Support Center services alongside reference services at Penfield’s Information Desk. Both the library and the Technology Support Center have a strong service ethic and we believe that combining our information and technology services will help contribute to student success. We hope that this pilot project will result in guidelines for us to follow as we further develop this idea.

Chris Hebblethwaite, Information Commons Coordinator
October is Information Literacy Awareness Month

President Obama recently declared October National Information Literacy Awareness Month. In recognition of this, Penfield Library is raising awareness of Information Literacy through displays and promotional materials to raise awareness. In addition to Library Instruction, the Library is finishing Information Literacy Infusion Programs to be distributed soon to coordinate our efforts to ensure that all students are information literate by graduation and are prepared for lifelong learning.

Please take a look at Penfield Library’s Library Instruction Webpage to learn more about Penfield’s Information Literacy Program.

Shannon Pritting, Special Projects Librarian

Banned Books @ Penfield

Each year Penfield Library joins thousands of libraries across the country in celebrating Banned Books Week and our right to read.

We again mounted posters and displayed books that have been banned or “challenged”--books that some person or organization has requested to be removed from the shelves of American libraries.

This year we also partnered with Oswego State’s Civic Engagement Coalition to provide programming and food for thought for the entire college community.

Penfield Library is always pleased to accept gifts of materials for our Special Collection Department. This past summer faculty emeriti author Lewis Turco and illustrator George O’Connell donated one of six copies of their collaborative work, *Bordello*, to the library. The volume consists of original poems by Turco, printed on paper which is “artist-made from cotton linters, cattail leaves, sisal rope, and recycled acid-free paper scraps.” Each of the 22 leaves also features an original engraving by Mr. O’Connell.

The volume may be viewed by appointment in the Special Collections Department at Penfield, or online at http://lewisturco.typepad.com/photos/bordello_poems_with_print/index.html
