COLLEGE TO CONSTRUCT NEW TECHNOLOGY LABS

By next September, students at the SUNY College of Technology will be learning and experimenting in 14 new technology laboratories. Badly needed for more than a year, these laboratories will be located not in a new building, but in the former State Street Mill, now known as Mill Square, which was built more than a century ago.

Thanks to the foresight of William Brodock, owner of the Mill Square building, and the persistence and cooperation of political leaders, bankers, architects, contractors, and college officials, excellent interim facilities can be provided to meet the ever-expanding needs of the College of Technology.

The project also means additional revitalization for the city. Direct economic impact includes nearly $2 million in up-front investments and approximately $5 million annual rent for the college's share of space.

In addition, indirect and long-term impact will result from the advanced training and retraining of the local workforce provided by the college's technology programs.

Brodock, with the support of Utica Mayor Stephen Pawlinga and city officials, successfully completed application for an urban development action grant of $350,000 to supplement $800,000 in the form of Industrial Revenue bonds from Oneida National Bank and $100,000 of Brodock's own money to assure the design and construction of the laboratories. The college, which needed to secure additional dollars in its operating budget in order to pay the $496,000 per year rent, looked to and received financial backing from city and state political leaders on a bi-partisan basis. Senator James Donovan and Assemblyman William Sears, along with former Assemblyman Nicholas Calogero, vigorously supported the college's request for $450,000 in last year's State supplemental budget, and the addition this year of $800,000 in operating funds to be provided on an annual basis to cover the rental of the Mill Square laboratories and expanded facilities elsewhere.

The complex funding package took considerable effort to put together, and for a variety of reasons appeared to have bogged down during the late fall of 1980. City officials, led by Mayor Pawlinga, visited Albany in early December to seek assistance in breaking the log jam. When Governor Hugh L. Carey held a town meeting in Utica on December 10, 1980, he announced that he had ordered the State Division for the Budget to immediately release money to allow the project to move forward. And, from that point on, progress has been swift. Leases have been approved, and preliminary work is underway for the construction of the laboratories. The current schedule calls for the labs to be completed by early June.

With enrollment up more than 13% in September 1980 (much of the growth attributable to students enrolling in technology programs), the college was faced with a critical need for laboratory space. In anticipation of such demands, college officials began more than a year ago to search out an appropriate temporary location to construct interim laboratories until the campus issue could be resolved and permanent laboratories could be built. After thorough investigation of available space in the City of Utica, Mill Square was chosen as the most suitable to the college's needs.

In cooperation with Mayor Pawlinga and the City of Utica, Brodock had already financed the facelifting of the former State Street Mill initiated under the city's Economic Reinvestment Program. What resulted was a first class facility totally refurbished on the outside, energy efficient, and with broad expanses of open, flexible space inside. The building is nearly ideal for the college's immediate needs.

Progress Report on the Annual College of Technology President's Ball

Plans are well underway for a gala social event in the Utica area on Sunday, April 26. On that evening, the Annual SUNY College of Technology President's Ball will be held at beautiful new Sangertown M&J in New Hartford. This cooperative community affair which will be an annual event, has as its central purpose funds-raising for the College of Technology Foundation. Citizen response from various public and private sectors has been enthusiastic toward the Foundation's plans.

Featured performers at the President's Ball will be the all-new Vaughn Monroe Orchestra. From 8:00 p.m. to midnight, guests will enjoy listening and dancing to the famous big-band music in the charm and comfort of Sangertown's Americana atmosphere. Special arrangements have been made for alumni and their guests who purchase tickets for this event. From 7 to 8 p.m., alumni subscribers are invited to a pre-ball cocktail party. The event is a great opportunity to meet with college friends prior to the dance. NOTE: This is the only group that will be allowed to have a pre-ball party in the hall.

You will soon receive an invitation to subscribe to the ball, which includes attending the cocktail party. Tickets are only $15.00 per person. Honors are complimentary and a cash bar will be provided. As you know, the College Foundation is a major source of funds for those students who need various forms of financial assistance. Let's show our Alma Mater that we support its efforts in this worthwhile endeavor. Who ever wants to discover the secrets of the President's Ball together?

**Bus./Public Mgt.**

The business/public management Advanced Management Program was indeed fortunate to have Mr. Robert Tarnow, Chairman, Board of Directors, Goodyear, as its guest speaker on December 15, 1980. A social function preceded the speaker. Our Rome Conference Center proved to be an exceptional and satisfactory location for the affair.

The Advanced Management Program is a series of six 10-week seminars spread over two years. Each three week period is dedicated to a specific business functional area, such as finance, accounting, etc., and meets every Monday evening. Enrollment is limited to management personnel from Central New York firms. The program objective is to update managerial skills. Results since its start three years ago have been very satisfactory.

On March 16, 1981, the Mohawk Valley Chapter, Association of Accountants, will acknowledge a publication submitted by Dr. William L. Langdon. Chapter members voted the contribution as the single most worthy publication submitted for the Association in 1980. According to a spokesman for the Chapter, the publication played a significant part in having the local organization designated as the National Outstanding Chapter in 1980.

Professor Robert Orillio will attend a two-day symposium at the American University in Washington, D.C. The seminar is sponsored by the Conference Board, one of the top independent business research organizations in the world.

Dr. Allen Halwes is editor of the Business/Public Management Division Management Forum. The publication includes articles from the faculty that appeal to the business community. Our alumni are welcomed to submit articles for consideration by the editorial board.

**Judd Named Chairperson of Alumni Cocktail Party**

Penny Judd has been named to head the annual College of Technology President's Ball alumni cocktail hour. Penny is a 1978 graduate in behavioral science and is now enrolled in Project PLUS, Business and Public Management Division. Penny lives in Canastota, New York. You will be hearing more from her as the plans evolve for this party.

Thanks for your concern for our alumni, Penny, and good luck on a successful party!

Judd Named Chairperson of Alumni Cocktail Party

Penny Judd has been named to head the annual College of Technology President's Ball alumni cocktail hour. Penny is a 1978 graduate in behavioral science and is now enrolled in Project PLUS, Business and Public Management Division. Penny lives in Canastota, New York. You will be hearing more from her as the plans evolve for this party.

Thanks for your concern for our alumni, Penny, and good luck on a successful party!

**Criminal Justice**

Two new faculty members have been added to the criminal justice staff. Jacob Messina is currently teaching courses in law enforcement and criminal justice management. He has strong planning experience having served most recently as director of the Broward County Criminal Justice Planning Office, the police department of Pennsylvania. Jacob completed bachelor's degree in criminology at Pennsylvania State University and his master's degree in the same field at Florida State University.

We miss Dan Lockwood this year. He accepted a very attractive offer at Temple University in Philadelphia. Filling Dan's shoes is Martin Miller, who was appointed assistant professor of criminal justice this past January. A 1979 Ph.D. graduate of the School of Criminal Justice, University of California at Berkeley, Marty has been teaching criminal justice for the past eight years. His present teaching assignments include courses on violence, correctional management, and criminal law.

Another recent doctoral recipient is Gary Gordon, who will be defending his degree this May at Boston University. Gary's dissertation was entitled, "Toward Justice As An End in Corrections: A Planned Change Case Study.

**Criminal Justice Chairperson, Bruce McBride, would welcome any letters or calls updating the activities of criminal justice graduates (315-792-3344).**

Bruce McBride
Criminal Justice

**Criminal Justice Graduate Update**

Many recent graduates from the classes of 1972 and 1973 in criminal justice have entered careers around the United States. Appointed to the Palm Beach (FL) Police Department this past summer was Bob Colleen. Serving in a capacity of the class of 1973 is Clark Brown (Broom County), Patrick Clune (Ontario County), and Peter VanPatten (Onondaga County).

(Cont. on Page 4)
Vo-Tech. Education

There have been a lot of exciting things happening in the Vo-Tech division in the past few months that have added new dimensions to our programming.

Dr. Jeanine Beye joined our faculty as an assistant professor in January to complement our programming in business/distributive education. She brings to the department a diverse background in both technical and educational settings and will be an asset to the department as we continue to service the needs of vocational teachers in Upstate New York.

Dr. Boyce completed her doctoral studies at the University of Massachusetts and most recently was an instructor at the State University College at Buffalo. She has an extensive background in curriculum development, word processing and competency-based teacher education.

The department had a total of 17 graduates fall 1980. This brings the grand total of graduates to 128 at the undergraduate level and 45 at the graduate level since the Vocational-technical education program transferred to the College of Technology in 1975. This represents a significant commitment on the part of the college to provide professional development opportunities to pre-service and in-service teachers at the undergraduate and graduate degree levels.

The Vocational Education Club sponsored two programs during Vocational Education Week (2/9-2/14/81) that focused on the technological revolution. Dr. Peter Larsen of the Institute for Occupational Studies at Cornell University spoke on "Teaching Basic Skills Through Vocational Education" and Dr. Charlotte Farriss from Project MOVE at our college spoke on "Pulling Out the Stops in Vocational Education."
Health Services Mgt.

Nothing new and extremely different to report. The program is holding its own and maintaining its FTE headcount. I still want to encourage you all, however, to get out in the bushes of community colleges in your area and give us a little PR. I did not get an overwhelming response from my personal letter-one call. We will help you get the information if you will just sacrifice ONE hour of your time.

We are very carefully, cautiously, and methodically checking the waters in terms of a master’s program in long-term care administration or nursing home administration. I would like support letters from you in the nursing home field or your negative comments. We will need your help and/or advice.

In the gossip: got a letter from Joe Cicatone in California. He is about to graduate from chiropractic school and ready to give some massage away to the cares of the world. Good luck to him.

Phyllis Norgaas is working as Director of Lutheran Homes Health Related Section.

One of the last things called the other day. She is working in a hospital in Winthrop, MA. Is informing me about a position they had available for a graduate. This could be something you all could be doing for your fellow alumni. Get the idea? Mary Andriella has done the same concerning two nursing homes in the corporation she works for in Arizona. They’re looking for two administrators.

George Potter became Assistant Personnel Director at Paxton Hospital, working with David Armstrong, who has moved up in the organization.

Seth Gordon is now Assistant Executive Director at St. Luke’s in Utica.

Bob Robertson has moved over to Utica/Marcy Psychiatric in an improved job move.

Bob Flynn is working out of Dewitt, NY, as a health facility planner. Joe tells me that John Hartment has two children and that he and Bob Schibbe painted the wall yellow a while back. Dick Fletcher called me from New London, CT. He’s still in the Navy—my old submarine stomping ground.

No other marriages, births, or what have you that I’m aware of.

Good luck and God’s speed!

Monte Walker
Health Services Management

Senator Donovan Pushes for Marcy Campus

Senator James H. Donovan, R-Chadwicks, has recently urged a massive letter-writing campaign to get Governor Carey know that "the only acceptable alternative for construction of the College of Technology is the original Marcy site."

He said that "we have had enough vacillations and studies. We want the Marcy campus and we want it now."

He said, "I know that many people and organizations have opinions to the Governor and to the State University Board of Trustees before."

"But, I said, 'now is the day, the 11th hour, or whatever you want to call it. It is imperative that we let the Governor know once again that Marcy is not only our No. 1 priority, it is our only priority."

He said, "And anyone who has never spoken out on the college before, if he or she is interested in the development of our area, should sit down tonight and let Governor know how we feel about the college."

He said, "I hope we can get at least 20,000 letters to the Governor by February 20. We’ve got to get him know how strongly we feel."

He said, "I have felt that there would come a time when the people of our area had to pull out all the stops, when we had to raise as one and let the Governor know where we stand on the college. Well, that time has come."

Donovan said he believed that Marcy was still the site preferred by most of the trustees.

But, he said, "once again, they’re talking about the high cost of building new college, and looking for alternatives. We should remind them that, regardless of where the college is built, the delays will have doubled the cost of the college."

Besides Marcy, the trustees are reportedly considering, as possible college locations, Utica Psychiatric Center, co-location with Mohawk Valley Community College, the present site in the old Globe Mill on Court Street, or a combination thereof. Co-location with Utica College is no longer under consideration.

McBride on Arson Task Force

Bruce McBride, assistant professor of criminal justice at the SUNY College of Technology, was appointed to the Oneida County Arson Task Force Advisory Board by County Executive Sherwood I. Boehlert recently.

McBride will be addressing goals and objectives of the board which include increased fire department participation in the New York State Fire System, increased arson related training, and increased team work between fire, police, and prosecution representatives.

McBride, appointed to a one-year term, has specialized in urban police function, conflict management, and criminal history. He has been honored with numerous commendations for his work with the police. He is a member of the Criminal Justice Educators Association of New York State.

SUNY Alumni Write to Carey

"Enough is enough," the Alumni Association of the SUNY College of Technology at Utica/Rome told Gov. Carey in a letter calling for the construction of a permanent campus for the college at Marcy.

"The faculty, students, alumni, and citizens of the Mohawk Valley have heard as much as one can bear about site locations," said the letter signed by Natalie Festine, secretary of the alumni association.

In the letter, the alumni group expressed concern over the reports that Carey is encouraging co-location with Mohawk Valley Community College. "...Clearly, there is a strong bipartisan community support for the Marcy campus," the alumni wrote.

Mrs. Ernenwein Named Volunteer Director

Mrs. Debbie Kogut Ernenwein has been named Director of the Office of Volunteer Development for the Syracuse and Onondaga County Chapter, American Red Cross, announced Elton H. Fairbank, manager.

Prior to her appointment, Mrs. Ernenwein has been a District Consultant for Red Cross at its Eastern Field Office in Alexandria, Virginia.

She is "looking forward to working with all the many Red Cross volunteers in increasing our volunteer numbers." She will be investigating new ways of recruiting volunteers and Red Cross with Mrs. Carol Tilley, volunteer chairman of the Office of Volunteer Development.

Mrs. Ernenwein is a graduate of SUNY Morrisville and College of Technology in Utica, where she obtained a degree in health services management. She is a member of the North Syracuse-Liverpool Education Foundation, the Women’s Auxiliary for the Salvation Army and the Camillus Art Association. She is former Treasurer of the American Association of Donor Recruitment Professionals.
Enrollment Up

The American Association of State Colleges and Universities reports that state colleges and universities in the country have generally fared better than had been expected during the past year. State schools have experienced the largest enrollment increase since 1975, and one of the largest in history, the AASCU says. Factors figuring in such a rise include increasing unemployment, high inflation, and low tuition, the AASCU adds.

The SUNY College of Technology at Utica/Rome is among the schools riding that high enrollment wave. Statistics show that fall 1980 undergraduate enrollment has increased 21% over fall 1979 figures. Over 2,300 undergraduates enrolled at the College of Technology in the fall of 1979. A year later that figure swelled to over 2,800 students. Noteworthy is the growth of part-time enrollment during that period which increased 10 times faster than full-time enrollment. Full-time, male-to-female undergraduate enrollments stand at almost equal proportions for the fall 1980 term, while women dominated the undergraduate part-time sphere.

A variety of factors affect growth at the College of Technology. For one, it is an upper division college which caters specifically to the needs of junior- and senior-level students. Another highly attractive quality of the college is its emphasis on career-oriented programs. Thus, it appeals to "traditional" as well as "non-traditional" students. Non-traditional students, for example, include those who are already employed and are returning to college to upgrade their careers or those looking to change their careers entirely.

SUNY Basketball Season Concluded

The SUNY Tech women's basketball team ended its 1980-81 season on a winning note with a 48-40 win over Green Mountain College. The SUNY women concluded their season with an 8-10 overall record, coach Lee Ellis reports.

Next season's 23-game schedule includes contests against State University College's at Fredonia, Purchase, and Cortland, Hamilton College, St. Lawrence, Russell Sage, Albany State and Daemen College.

The SUNY Tech men's basketball team ended its season with a 12-9 mark.

HIGHLIGHTS OF THE NURSING PROGRAM

The most significant event for the nursing program was the preparation of the National League for Nursing self-study document in preparation for the initial accreditation visit February 12-15, 1980. On April 28, 1980 the nursing department was informed by the NLN Board of Review that the baccalaureate nursing program at the college had been rendered a "defer initial accreditation decision". A special request report, addressing the board's concerns and recommendations, was requested within two years.

The special request report will be written in Fall 1980 and will be submitted to NLN in January 1981 and reviewed by the board in April 1981. We know you are as anxious as we are to complete this process and we will keep you, our alumni, informed.

State, 632 students, have graduated from our baccalaureate nursing program; 176 graduated in the 1979-80 academic year.

The nursing department is happy to announce five new faculty members who will begin this fall. They are:

- Esther Bankert, who holds an A.A.S. degree in nursing from Maria College, a B.S. in nursing from St. Mary College and a N.A. in nursing from New York University. She will be teaching Nursing Leadership.
- Elizabeth Essman received her B.S. from St. Vincent's Hospital School of Nursing and her B.S. and M.S., were earned at Syracuse University. She will be teaching Advanced Nursing Theory.
- Margaret Graham holds an A.A.S. degree from Ferrum College, a B.S. from the University of Virginia and M.S. in nursing, family nurse clinician, from Vanderbuilt University. She will be teaching Comprehensive Health Assessment.
- Susan Hochberg holds an A.A.S. degree in Nursing from Onondaga Community College, her B.S. from our college and her M.S. from Syracuse University. She will be teaching Advanced Nursing Theory, Ethical Issues in Nursing and Health Counseling.
- Mary Lou Wranesh received her B.S.N. and M.S., Family Health Nurse Clinician, from the University of Rochester. She will be teaching Community Health Organization.

Sincerely,

Jerome F. Donovan
President

PUBLIC SERVICE AWARD PRESENTED TO DR. KUNSELA

Dr. William R. Kunsela, president of our College, received the public service award of the Mohawk Valley Section of the Institute of Electrical and Electronic Engineers (IEEE) at the annual awards banquet on June 20 at Hart's Hill Inn.

John Entzminger, chairman of the chapter, presented the award to Dr. Kunsela citing his outstanding leadership and contributions "in furthering engineering education in the Mohawk Valley."

Dr. Kunsela is responsible for the establishment of the engineering technology program at our College. The engineering technology program emphasizes the application of engineering principles to practical industrial problems. Special courses are created to meet training needs of local business and industry. Some technology programs that have been offered include Software Engineering, Basic Process Control, Pascal Programming, and Intermediate Probability and Statistics.

Congratulations go out to "our president".

PROFESSOR WALLACE ADDRESSES 2,000 ATTENDEES OF NATIONAL CONFERENCE

Most Business/Public Management alumni are aware of Professor Wallis's dedication to the Mohawk Valley Chapter of the American Management Association. He has been a very active member, serving in just about all elected positions, including president for the year 1979-80. For the 1980-81 year, he received the Stevens Trophy for being the most outstanding chapter (active members, new membership, publications, etc.) of the largest competing chapters in the country. Professor Wallis was elected President of the Utica chapter of the State Society of Certified Public Accountants.

The above information should partially reflect why Professor Wallis was also elected by the national association of Junior Chamber of Commerce (Jaycees) as one of the nation's most "outstanding young men of 1980".

In light of Professor Wallis's accomplishments and accolades, any other divisional news at this time would not be exciting enough to report.

Have a good summer!

Mr. Albert Mario
Associate Professor
Finance
1975

Linda Morgan is Executive Director of the Central New York Multiple Sclerosis Society in Utica, NY. (Human Services alumn)

Joseph Murray is owner and operator of Gerling’s Market. Joe was recently married to Sue Ann Kaye. (Business/Public Management alum)

Patrick Perretto is manager of conferences and promotions at Syracuse University. He is married to Carrie Orsago, Class of ’79. "Two alumni married in 1979 are now the proud parents of a baby girl, Kimberly Ann, born April 7. At present, Carrie is unemployed and enjoying motherhood. She invites anyone nearby to call 469-8572 or drop in for coffee. Pat continues to support the family while pursuing his MBA from Syracuse University." (Pat, Business/Public Management alum)

1976

Scott Broedel is employed as a police officer with the Restaurants City Police Department, Greenacres City, Florida. (Criminal Justice alum)

Michael Gallagher is a senior account clerk at the Rome Developmental Center. "At the present, I am involved in another aspect of the business office—managing an inventory. I’m looking forward to the construction of our new campus. My wife, Carol, and I attended the February Wine and Cheese party." (Business/Public Management alum)

Robert R. Lewis was awarded the Master of Divinity degree, magna cum laude, from Drew University on May 17. He is pastor of Kanona-Wheeling United Methodist Church in Kanona, NY. (Human Services alum)

Oscar McKee, a graduate of Syracuse University Law School on May 11, Ron Klugl reports, "Completed master’s degree in Management at SUNY/Binghamton. Teach Management for Griffiss Air Force Base, part-time instructor for new school for Social Research/Role Division. Regards to all" (Behavioral Science alum)

David H. Underwood graduated from the Methodist Theological School in Ohio on June 7 with the Master of Divinity. He will be appointed to a United Methodist church in New York. (Health Services Management alum)

Alice Williams was married to Borry Nicholas Bowar on May 2. Alice is a cardiac nurse therapist at St. Luke’s Memorial Center. (Nursing alum)

1977

Sandra L. Beyer, now Sandra L. Baumes, is a registered staff nurse at Richmond Memorial Hospital in Virginia and presently working in pediatrics. (Nursing alum)

Mark Kindserman is a temporary release interviewer with the NYS Department of Correctional Services, Mt. McGregor Correctional Facility, Wilton, NY. "My wife, Deborah Wondro, Class of ’76, and I received a new "addition" to our family on March 27, Andrew David Kindserman, weighed in at 10 lbs. 4 ozs., 22" long and has not stopped eating yet." (Mark, Human Services, Deborah, General Studies)

Paul J. Konrad is a police patrol sergeant with the Gillette Police Department in Wyoming. "I have been living in Gillette and working for the police department for approximately 2 years along with other Utica/Rome Criminal Justice graduates; Mark Zieba, David Adrat. I was married in July 1977. Was promoted to patrol sergeant approximately one year ago and I am in charge of firearms training for the department along with another Utica/Rome graduate. (Criminal Justice alum)

Gloria Myers reports that she, "Spent the last 24 years in Oxfords, England with husband and family stationed with USAF. Daughter, Samantha Jo born May 1980." (Nursing alum)

1978

Robert Archbald is a sales representative for the American Fuel and Supply Company in Hawaii. "Had a great time at the North Carolina this year. Suggest that we hold a 5th year reunion there with Jack Falvo as Reunion Committee Chairman and Billy Foye, chairman in charge of the booze. Still single and partying with Lisa. (Business/Public Management alum)

Jim Cassenza is a police officer with the Syracuse Police Department. "Say "Hi" to Jack Falvo and Lou Arcuri, come out and see us." (Criminal Justice alum)

Tom Kershaw is a platform assistant with the National Bank of America, Brentwood, CA. "I’m a 33rd Degree Mason and I would like to extend our congratulations to the Class of ’80. We are also approaching our first anniversary and doing well at our jobs." (Business/Public Management alum)

David E. Murdock is an assistant manager with Ames Department Store, Inc., in Binghamton, NY. (Business/Public Management alum)

Kenneth D. Schue is a Federal police officer for the Federal Protective Service in Syracuse. "As of July 1980, I will be married to a young lady from my hometown, Boonville, NY." (Criminal Justice alum)

Connie Spieelman is a nurse practitioner student. "I will be graduating in August from Albany Medical College’s Primary Care Nurse Practitioner program. I plan on working with a physician in the Margaretville area and am very excited about my new expanded role." (Nursing alum)

Virginia Tempel is on the teaching faculty at Sullivan County Community College. "On May 15, 1980, I was promoted to the rank of assistant professor of the Hotel Division Faculty at Sullivan County Community College, Loch Sheldrake, NY." (Voc Ed alum)

1979

Gina Gottuolo was married to Joseph Mancini on May 2. (Human Services alum)

Ronald D. Richardson reports, "After a year and a half into the work world, I would like to continue my education towards my master’s degree." Ron is a security officer at Kelsey Hayes Company, Utica Division. (Human Services alum)

1980

Diane F. Kolaki will be starting her "MBA" at Pace in the fall. She is a market analyst at Simmons Precision in Tarrytown, NY. (Business/Public Management alum)

OSP INITIATES TWO NEW PROGRAMS

The Office of Special Programs, OSP, Division of Graduate Studies and Continuing Education, initiated two new programs series for working professionals during the spring. They are the Institute for Secretarial and Office Personnel (ISOP) and the Seminars for Supervisors and Managers.

The ISOP workshops, which are co-sponsored with Mohawk Valley Community College, are the result of a survey conducted during the fall with the National Secretaries Association which indicated that office personnel have few opportunities to develop their interpersonal and technical skills. Thus, a series of half-day workshops offered at a modest cost in the local area has begun.

LADY WILDCATS ANNOUNCE NEW RECRUITS

The College of Technology Lady Wildcats basketball team will feature six new faces when their 1980-81 campaign. The six new recruits are Penny Lipert, Poonie Snow, Kari Sorrell, Mariah Murphy, Janice Durand, and Janet Weiss. Mariah Murphy is a recent All-Penn League selection and leading scorer for Gilbert College in Buffalo. Kari Sorrell was the leading assist maker at Clinton Community College in Plattsburgh, Janet Weiss, and Janice Durand were both starters on their respective teams, Canton-ACC and Nassau Community College.
SIXTH ANNUAL COMMENCEMENT

550 more Alumni added to our growing ranks!

SUNY College of Technology held its sixth annual commencement ceremonies on May 25, 1980 at 1:00 p.m. in the Utica Memorial Auditorium.

Bachelor's degrees were conferred upon 550 students from programs in Business and Public Management, Criminal Justice, Human Services, Nursing, Vocational Technical Education, Health Services Management, Engineering Technology, and Arts and Science. Seventy-two students received Master of Science in Education degrees. This brings the total number of graduates from our college to 2,550. Your numbers are growing!

Former astronaut William A. Anders delivered the commencement address. Mr. Anders spoke about living in a rapidly changing world with which we must be ready to change and grow. He said technological advancements are happening at such a rapid pace that the education one works for could become obsolete without continued training and learning. Because of the growing importance that technology plays in American society, Anders called for the graduates to take it upon themselves to remain informed about the latest scientific studies.

Anders told the members of the Class of '80 they would be continually challenged with new technological information and it would therefore be beneficial to them—economically and socially—to be aware of the changes. He suggested they take continuing education courses, attend seminars and read.

"Education must be a continuing process...." Anders said.

COMMENCEMENT HIGHLIGHTS

Marjorie Canfield and her daughter, Debra of Troy, received degrees. Mrs. Canfield graduated magna cum laude with a bachelor of science in Vocational/Technical Education while her daughter earned a Masters of Education degree in counseling. Miss Canfield had completed her master's requirements at SUNY/Plattsburgh but requested that she receive her degree in Utica with her mother.

A bachelor's degree in Vocational/Technical Education was awarded posthumously to the wife of Albert D'Aquino of Rochester.

Mr. D'Aquino died of a heart attack shortly after completing degree requirements last fall. Mrs. D'Aquino accepted the degree for her husband while their two children, Albert and Anita, looked on.
PROJECT MOVE—ONE OF TOP 12 SEX EQUITY PROJECTS IN U.S.

Maximizing Options in Vocational Education has been located at the College as part of the Department of Vocational-Technical Education since September 1979. The project is funded with federal vocational monies by New York State Education Department, Office of Special Programs.

Since conducting the first phase of pilot in-service workshops in 1977, Project MOVE has implemented various strategies and activities to reduce sex stereotyping and bias in vocational education. These have included:
- developing numerous resource materials
- providing a graduate course for vocational educators in 11 different state-wide locations
- providing numerous workshops for educators and youth groups, a conference for vocational teacher educators
- a survey of sex equity resource people and resource centers
- a cartoon contest on "Sex Equity in American Life"

A comprehensive 138-page sourcebook, Expanding Adolescent Role Expectations: Information, Activities, Resources for Vocational Education, was designed and published—directed to secondary vocational and occupational educators.

The project philosophy plus the demonstrated successes of the project resulted in its being selected by the American Institute of Research in 1978 as one of 12 sex equity projects from across the nation that have proved to be effective. These 12 projects have been reported to Congress and other groups concerned with sex equity in vocational education as exemplary programs that work.

As alumni you may be interested in Project MOVE's graduate courses. The graduate level course is taught over a period of two semesters and is delivered by means of a monthly class meeting and learning packets. In addition to the various class topics on sex equity, the topics of change, evolution and facilitory leadership are covered in the course. All class members plan, implement and evaluate a major project aimed at facilitating change and work with a wide variety of groups including other teachers, school boards, advisory councils, parents, employers and various community groups.

It is planned that a course will be offered in the Spring of 1981 on campus. Project MOVE's courses may be fee paid for vocational educators. Please inquire.

For further information and a listing of resources and services available from the project, contact: Dr. C.J. Farris, Project MOVE, 315-792-1536.

By Dr. C.J. Farris
Co-Project Director
Project MOVE

WILDCATS AWAITS VERDICT ON NATIONAL AFFILIATION APPLICATION

The Executive Council at the College of Technology recently approved a proposal to fund affiliation application procedures for two athletic governing organizations, and are now awaiting their responses.

The two organizations are the National Association of Intercollegiate Athletics (NAIA) for men's programming and the New York State Association of Intercollegiate Athletics for Women (NYSIAW).

Both of these associations offer the College of Technology national and regional visibility but also enable our athletes an opportunity for post-season tournament play in each of our intercollegiate programs.

The NAIA is a national organization whose membership is predominantly small institutions with limited program offerings.

The NYSIAW is a regional affiliate of the national NAIA. Nearly every four-year institution in New York State that offers women's athletics maintains membership with the group.

WILDCATS SET SCHEDULES FOR 80-81 CAMPAIGN

The College of Technology Wildcats have set their schedules for the 1980-81 basketball campaign.

The men's schedule will feature 21 contests against such teams as Green Mountain, Skidmore, Daemen, Southern Vermont and Albany College of Pharmacy. Eleven of the contests will be played at home (i.e., Utica College, MVCC, or Notre Dame High School).

The women's team will play 22 games, five of which will be played at home. The schedule includes opponents such as Hamilton, St. Lawrence, Elmira, Bard, and Southern Vermont.

The season will begin November 15, 1980, for both the men's and women's basketball teams.

PRELIMINARY ALUMNI HOMECOMING SCHEDULE

- 11:00-11:30 Business meeting in the College Center
- 3:30-5:00 Refreshments served in the College Center after the game

Now for the Night Life

- 1:00-3:30 Alumni All-Star Football Matchup—Proctor Park

Alums from all classes are forming an all-star football team to challenge all comers from the current study body. Team captains from the various classes are presently being recruited. All alums are encouraged to participate in this fun-time event. If you are interested in being your "class captain" or would like to participate, please contact the Student Activities Office at 792-3460 for further information.

SUNY COLLEGE OF TECHNOLOGY

August 1980

Greetings from the Homecoming Committee!

In case you were unable to attend last year's festivities, we would like to give you plenty of advance notice about our 4th annual Alumni Homecoming to be held on October 4, 1980.

In light of the fact that the attendance at last year's dinner was approximately fifty percent greater than previous years, all guests are looking forward to an even greater participation from all of our alumni this year.

Please watch for invitations arriving in the near future.

Sincerely,

Natalie Bonvissut Testina - Class '77
Co-Chairman

Tim Sargent - Class '76
Chairman

...NOW FOR THE NIGHT LIFE...

at

Ramada Inn
Burrstone Road

- 8:00-8:30 Buffet Dinner
- 9:30 till 7 ALL FOR $7.50

WATCH FOR FURTHER DETAILS AND RESERVATION FORM IN THE MAIL SOON!
TECHNOLOGY DEAN ELECTED TO ASEE

Dr. Louis J. Galbiati, Dean of Engineering Technology, has been elected to membership on the College Council for the American Society for Engineering Education. The council sets national policy with respect to engineering technology programs at both the Associate and Baccalaureate levels. Currently, there are a total of 598 accredited candidates for accreditation engineering technology programs in the country. Of these, 195 are at the baccalaureate level. There are eighteen graduate engineering technology programs leading to the master's degree.

Dr. Galbiati will present a report on "Graduate Engineering Technology Programs" in Session 1650 at the Engineering Education for the 21st Century National ASEE Conference in Amherst, Massachusetts.

ROLL OF HONOR

ALUMNI CONTRIBUTORS

The Alumni Association wants to thank the following for their contributions and support of their Alumni Association:

Class of '75
Maryanne DiMeo Brindisi
Class of '76
Wilson Sprague
Donna Boland
Michael Gallagher
Debra Trinkaus
Class of '77
Patricia Arcuri
Gary Clark
Richard Ziomek

The Class of '79 has done an outstanding job in developing their participation in our Alumni Association.

TAU ALPHA PI FORMED

A chapter of the Engineering Technology National Honor Society, Tau Alpha Pi has been formed.

The purpose of this society is to provide recognition for high-standard scholarship among students in Engineering Technology. The society also promotes and encourages scholarship achievement by offering membership to outstanding students who have maintained an average of 3.5 or higher. The society will have an initiation banquet in September and Mr. Frederick Berger, Executive Director of the National Honor Society will be the guest speaker.

Individuals who are to be initiated are:

The SUNY College of Technology has given this honor in view of the rapid growth of the program and the expected enrollment of 310 in the Fall 1980 semester.
