PARENTS: If this issue is addressed to your son or daughter, who no longer maintains an address at your home, please send a current address to the Alumni Office, SUNY Institute of Technology at Utica/Rome, P.O. Box 856, Utica, New York 13504-0856.

Up Front
On the cover: The new Alumni Pavilion, adjacent to the Campus Center, will be dedicated on Saturday afternoon, Oct 2, as part of Alumni Weekend. The recently constructed pavilion was built through funds donated by the classes of '86, '88, '89, and '90. It will be an outdoor center for various campus events and activities.
Senator Challenges Class of '93 to be First

State Senator Thomas Libous, class of '93, the first alumnus to deliver the commencement address, appropriately challenged the class of '93 “to dare to be first,” during ceremonies held at Utica Memorial Auditorium on May 15.

Senator Libous spoke from his experiences of taking on leadership roles, both as an active student in the days of a "factory" campus and as a legislative force in Albany, where he represents Broome, Tioga and parts of Chenango counties.

The senator, the founding president of the Utica/Rome Student Association, told more than 600 participating graduates, "Younger Americans will redefine what it means to succeed, and to be first, in ways that show your deep concern for others."

More than 2,500 in attendance listened as the senator told students it was up to them to make their communities "decent and hope-filled places." The senator's work in the State Senate includes chairing the Senate's Alcoholism and Drug Abuse Committee and the Select Committee on the Disabled.

"Be ready for your chance to be first and take it," he said. "Take it with confidence because of what you've learned from life and from attending SUNY Tech."

"Those of you in nursing and allied health fields may be the first to blaze new trails in curing diseases, or in developing new protocols for patient care."

"Your two years at SUNY Tech have prepared you for skilled careers on the cutting edge of technology ... discovering innovations that will lead New York into the 21st century. Out of your labs and hospitals and businesses will come new inventions and discoveries that will enrich our lives."

"You've learned a lot from life and from SUNY Tech."

"When the time comes for you to take your chance to be first, whether it's today or next week or next year, you'll be ready."

"The future belongs to men like President (William) Kunsel (SUNY Tech's first president) and Dean Robert Meier, who helped SUNY Tech grow into what it is today." 

In closing, the senator had a simple wish, "Twenty years from now, when your children ask what you remember from your college commencement speech, I hope you'll tell them, 'At least Senator Libous didn't put me to sleep.'"
A feature of this year’s Alumni Weekend will be the awards luncheon on Monday, November 23. The Board of Directors will recognize for their service to their professions, their communities and/or the Institute of Technology. Among the highlights of Alumni Weekend will be a talk by Nicole Watson, a sports journalist who covered the Turners Falls and the Rochester Lynx.

The Board of Directors voted to reestablish the recognition program, which was discontinued after 1990 for apparent lack of interest. In order for the program to succeed, it would be necessary.

The Alumni Association has been established as a service to the institution. One of the goals of the Distinguished Service Award, which, until 1990, was given annually to deserving members of classes graduating 5, 10 or 15 years prior. The awards committee has decided to recognize one member each from the classes of ’78, ’83 and ’88. The second award is the Outstanding Service Award, which is given as special recognition to an alumni or alumna who has distinguished himself or herself in extracurricular activities and beyond.

The award is conferred only by the Board of Directors and in the history of the award. It has been awarded only once, to New York State Senator Thomas Libous, a 1976 alumnus.

A nomination form is printed on page 24 of this publication; alumni are urged to take a few moments to fill it out and return it to the college. Please note that the deadline for submitting nominations is Sept. 1.

Committee Studies Funding Issue

At its April meeting, the Alumni Association Board of Directors appointed a committee headed by Doug Tindeter, former USRA president, to address the problem of declining annual revenues and to recommend modifications that will permit continued professional staffing for the Alumni Association and the alumni office.

In support of the college, these

Technology in 1983 with a bachelor’s degree in business. In her role as sports correspondent for Turner Sports Network she has been co-host of the Pan-Am Games, the primary feature reporter for the “Turner Classic” network, and as a correspondent for the Atlanta Hawks NBA basketball games.

Watson also recently hosted the U.S. Olympic Sports Festival held in San Antonio. She has several features for Turner Sports’ exclusive Olympic package.

Although Watson hadn’t designed a career that revolved around sports, her background as a star high school athlete has proved very helpful, especially during live reports and interviews with world-class track and field stars.

Watson, a Rome native and 1979 graduate of Rome Free Academy, helped the RFA Black Knights win state track and field championship.

She also didn’t necessarily envision a career that would have her in front of a camera, broadcasting to a global audience of millions of sports fans, but her experience as a model and as a Turner Classic and state beauty pageant has also helped Watson build her professional skills. Watson is a former Miss Syracuse and was named Miss Congeniality in the Miss New York State Pageant.

But it was her interest and love of sports that directed Watson to her first shot at professional broadcasting. She started doing radio news in Washington, D.C., and caught on with the Black Entertainment Network, where she was assistant to the vice president, a role that gave her the opportunity to perform many managerial tasks and use some of the business and marketing background she acquired at SUNY Tech. Of course, Watson never stayed too far from the field — the sports field, that is — occasionally taking on assignments for the BET sports department.

In 1987, her career received a boost when she interviewed Hail of Fame basketball legend Julius "Dr. J" Erving. A short time after, she was assigned to BET’s sports department, where she helped create the network’s "Budweiser Sports Report."
Alumni Weekend Spiced with Variety

Campus activities during the first weekend of October will keep the joint jumping, as Alumni Weekend and Rocktoberfest parlay a variety of events. Highlights include a talk by SUNY Tech graduate Nicole Watson. Alumni and students will have plenty to keep them busy as they're offered a weekend that includes popular comedians and musicians, an alumni soccer game, volleyball, softball and other activities.

Because Alumni Weekend and Rocktoberfest coincide this year, entertainment opportunities abound. For example, Friday night offers both an informal mixer at a popular local pub, Spilka's, and a Cabaret-style performance at the Campus Center, where a comedian and vocalist will be featured.

Weekend visitors may also choose to attend a Players of Utica performance on Saturday evening. That afternoon Rocktoberfest and Alumni Weekend guests will join in a campus cookout/picnic. Saturday night at 12-North Sports Bar, the popular area band "Atlas" will provide an opportunity to either kick back and enjoy the music or hit the dance floor. The band's performance will be preceded by a Simon Sez, an unusual comedy act, and Martin Sexton, a singer, guitar player.

Watson will be sharing her experiences as a sports journalist for the Turner Broadcasting Network (TNT Sports) at the alumni awards luncheon on Saturday, where graduates of the college will be honored for their service and professional accomplishments.

Alumni Weekend will conclude on Sunday following a brunch and the Alumni Board of Directors' annual meeting.

Alumni Directory to List Grads

Finding a former classmate will soon be as simple as opening a book. The book, to be published by SUNY Institute of Technology Alumni Directory, will be a complete reference of more than 7,200 graduates of the college. The comprehensive volume will include name, address and phone number, as well as academic data and business information. It will be bound in a classic library-quality edition.

The directory is being produced by the Harris Publishing Company, Inc., who will soon begin researching and compiling the data. Each college alumni will receive a questionnaire.

82 Graduate Wins Chancellor's Award

Steven J. Perta, a 1982 graduate of the college, this spring was awarded the State University of New York Chancellor's Award for Excellence in Professional Service in recognition of his outstanding work at SUNY Institute of Technology at Utica/Rome.

Institute/Technology President Peter J. Cayan presented Perta with an inscribed certificate and a cast bronze medallion. The award, according to SUNY Chancellor D. Bruce Johnstone, recognizes the "extraordinarily professional achievements" of professional staff members, whose performance both within and beyond their job description is "outstanding."

Dr. Cayan said Perta, as chief engineer and associate for the instructional resources department, "has devoted himself to significant contributions in enhancing and expanding the role of instructional media as a vital part of the college's professional services."

Perta, an expert in local area networks, helped the college develop an internal surveillance system, a dormitory cable system, and a television equipped electronic classroom. He played a vital role in the Institute of Technology's satellite uplink project, helping the college create a cable system and develop its television studio into a professional broadcast facility.

The college president said, "Steve

has been an invaluable member of our campus, the university and the community at large."

Perta, of Utica, has been sought out as a consultant and has worked with General Electric Aerospace Division (Martin Marietta), Chicago Pneumatic Tool Company, the Mohawk Valley Psychiatric Center, the New York State School for the Deaf in Rome and other SUNY campuses.

Golden, Belmonte Retire from College

Two familiar members of the college family announced their retirements this past spring.

Leatrice Golden retired this past July after 20 years of service to the college. She had served as secretary for the vice president for academic affairs.

Prior to her tenure at the Institute of Technology, Golden was secretary and business manager for Golden Real Estate from 1948 to 1968. She was also a Spanish instructor at Utica College of Syracuse University, research and program director for a television woman's program, and secretary for Basloe, Basloe and Gallagher law firm.

Also retiring was Anthony Belmonte, the college director of career planning and placement for the past 18 years. Belmonte was director of corporate personnel operations for Mohawk Data Sciences before joining the college.

He holds a master's degree from Syracuse University and a bachelor's from Utica College. Belmonte also was awarded a Fulbright Grant in 1966 to attend a seminar in Beirut, Lebanon, and traveled extensively throughout the Middle East.

Alumni Newsletter
School of Nursing Adds Master’s Program

Federal Grant a Shot in the Arm For College

Responding to a growing need in professional health care, SUNY Institute of Technology at Utica/Rome will soon be offering a master’s degree in nursing with a major in adult nurse practitioner. Rep. Sherwood Boehlert, R-23rd Dist., said the college will begin the program as a direct result of a federal grant of more than one half million dollars from the Department of Health and Human Services, Division of Nursing. Part-time enrollment will be accepted this July, with full-time students to attend by fall 1994, said Dean of the Institute’s School of the Nursing, Dr. Elizabeth Kellogg Witz.

Rep. Sherwood Boehlert, R-23rd Dist., said the grant of $579,000 was awarded because the college was able to document a need for more nurse practitioners and demonstrate its outstanding record of training professionals in the health care field. “I was proud to be able to help SUNY Institute of Technology communicate its academic achievement and its commitment to meeting the needs of health care professionals seeking advanced degrees,” Boehlert said. “More importantly, the objective of this program is to make health care more accessible and affordable for the community; of course, I fully endorse that goal.”

Nurses with bachelor’s degrees are eligible for enrollment, said Dr. Walker.

As adult nurse practitioners allow ambulatory health settings, such as physicians’ offices and clinics, to see more clients, more economically,” said Dr. Walker. Nurses with this master’s degree will be trained to focus on health assessments, disease prevention, health promotion, and monitoring chronic conditions in order to keep people healthy outside of hospitals and nursing homes.”

Acute Need for Practitioners

The dean said that in the past decade nurse practitioner has been the fastest growing specialty in the healthcare field. Additionally, based on a survey taken by the Institute of Technology’s School of Nursing, there is an acute need for adult nurse practitioners in Central New York, especially in communities that have been identified as being medically underserved.

Graduates of the SUNY Tech master’s program will be qualified to take the American Nurses Association’s certification examination, a nationally-recognized credential in the nursing field.

According to Dr. Walker, master’s degree candidates will be required to complete 39 credit hours in courses such as research methods, pathophysiology, pharmacology, health psychology and four intensive clinical classes. Most graduates will complete part of their training at offices and clinics in the area. That arrangement, said Dr. Walker, will help place students in professional practice settings following graduation.

In addition to the new master’s program, SUNY Institute of Technology offers bachelor’s degrees in other health-related programs such as nursing, health services management and health information management. There is already in place a well-established master’s degree program in nursing administration from the School of Nursing.

Former West Point Dean Heads ISET

The associate academic dean at the U.S. Military Academy at West Point has been named dean of the School of Information Systems and Engineering Technology at SUNY Institute of Technology at Utica/Rome.

Edward G. Tezak, Ph. D., will bring more than two decades of academic and administrative experience to the SUNY Institute. According to Shirley Van Marter, executive vice president of academic affairs. The dean assumed his duties at the college on July 1.

U.S. Army War College, has made several presentations to scholarly groups and authored a number of articles dealing with engineering mechanisms, engineering education and related subjects.

Dr. Tezak holds a doctorate degree in engineering mechanics from Virginia Polytechnic Institute, a master’s in astrodynamics from UCLA and a bachelor’s from the USMA at West Point.

Highly decorated by the military, Dr. Tezak twice was awarded the Bronze Star, has received the Legion of Merit and the Meritorious Service Medal. He was four times presented with the Army Commendation Medal and was honored with the Republic of Vietnam Honor Medal (First Class).

His academic associations include membership in Phi Kappa Phi honor society. Dr. Tezak was named outstanding campus liaison representative in 1990 by the Middle Atlantic Association of the American Society of Engineering Educators and recently completed charting the ASEE Division of Mechanics. He was also recently appointed to a two-year term as a member of the ASEE national board of directors.

During his academic career at West Point, he was named Distinguished Cadet and was the Dean’s List for all eight of his semesters as a student.

Professor Qazi Receives
College's Goodell Award

Dr. Salahuddin Qazi, associate professor of electrical engineering technology, has been named this year’s recipient of the prestigious William Goodell Research Creativity Award, given annually in recognition of extraordinary professional research and scholarly achievement.

Dr. Qazi’s most recent research projects include an investigation of the use of lasers to improve the efficiency of optical cables. He has also worked with researchers at the Fluid Center of Rome Laboratory to discover methods to enhance telecommunications through tunable lasers.

Dr. Qazi’s expertise includes the areas of fiber optics, digital communications, satellite and optical communicators, and fiber optics. He holds a doctorate degree from Loughborough University and has been a faculty member since 1982.

The Goodell Award was established in honor of the late Dr. William Goodell, an associate professor of microbiology and a prominent scientific researcher at the college. He was internationally renowned for his molecular research and studied under Max Delbruec, the 1968 Nobel Prize winner for bacteria research.

Dr. Qazi’s name has been placed on a commemorative plaque hanging in the second floor foyer of Kunaca Hall. He will also receive an individual plaque and a stipend of $500.

The Goodell Award is given to individuals who have repeatedly sought improvement, through their research, of themselves, the college and the State University. Award recipients are seen as professional role models for others at the Institute of Technology who work in pursuit of research and creativity excellence.

Award winners must be full-time members of the college community and must have completed at least one year of continuous full-time professional service at a faculty member and may not have received the award in the previous two years.

Engineering Technologies Connect
For Students in the Capital District

Capital district residents will have an opportunity to earn a bachelor’s degree in either electrical or industrial engineering technology as a result of a cooperative educational program developed by the Institute of Technology and Hudson Valley Community College.

HVCC President Joseph Bulmer and Institute of Technology President Peter J. Cayan announced recently that the program will allow part-time students who already hold associate’s degrees or have earned 56 credit hours to complete a bachelor of science degree in four years by taking two courses per semester.

The classes, to be scheduled on evenings or Saturdays, will be offered on the HVCC campus by SUNY Institute of Technology faculty. A single course will be held at the Institute of Technology’s campus in Utica.

Typically, students will take a combination of arts and sciences and technical courses. Arts and sciences courses will be offered beginning in the fall, with technical courses beginning in the spring of next year.

Bustech '93 To Show Off High Tech

through an unusual partnership between private enterpise and education, Stetson Harza and SUNY Institute of Technology at Utica/Rome are planning a high technology trade fair, "exploring the business of technology and the technology of business," company and college officials announced at a press conference this morning.

"Bustech '93" will be held Oct. 17 and 18 on the first floor of Stetson-Harza's Geneva Street complex. Approximately two dozen regional exhibitors will demonstrate high tech solutions to many business and industry concerns in the former Woodburn building, according to Jim Gwirs, president of Stetson-Harza.

Gwirs said the fair will offer demonstrations, exhibits, workshops and seminars in five areas: facilities planning and design, facilities management, communications, manufacturing, and business operations.

Stetson-Harza representatives and Institute of Technology faculty and staff will be among those demonstrating how high technology has become an integral part of everyday business. Demonstrations may include, for example, how robotics technology may simplify manufacturing and increase productivity, or how modern facilities design can have an impact on small businesses planning to expand or needing to become more energy efficient.

"Bustech '93 will demonstrate that there are a wide-range of technologies accessible to businesses and industries. And with this area's excellent reputation for high technology applications, research and development, and education, we are confident that hundreds of companies and educational institutions from throughout the Northeast will send representatives to watch, listen and learn," said Dr. Shirley VanMarter, executive vice president for academic affairs at the Institute of Technology.

Among the regional companies that have shown an interest in participating in the three-day fair are Niagara Mohawk Power Corporation, New York Telephone, PAR Technology, Lanier, Hamilton Digital, Northland, New York State Photonics Development Corporation, Landcare Aviation and Genesis, LaFave, White and McGivern, Oneida County Industrial Development Corporation and about 20 manufacturing outfits.

Exhibits will be open on Sunday, Oct. 17, from 1 to 5 p.m. and Oct. 18, from 9 a.m. to 5 p.m. and Oct. 19, from 9 a.m. to 2 p.m. The exhibit space on the floor of the building is approximately 15,000 square feet and will hold from 25 to 30 exhibitors, depending on the area the participating company requires.

In addition to the exhibits, several organizations will present one- or two-hour seminars. For example, Aera Printing companies are planning a seminar on electronic publishing. Also, Institute of Technology professors will present a seminar concerning the latest developments in the telecommunications industry and some practical tips on how businesses can take advantage of new technologies; and another local company representatives will provide an overview of Total Quality Management programs.

SUNY Institute of Technology at Utica/Rome is the state's only college exclusively for transfer students and offers 18 undergraduate and 4 graduate degree programs. Dr. VanMarter said the college plans to offer demonstrations using faculty and students from such programs as industrial, mechanical and electrical engineering technologies, photonics, telecommunications, computer science and other technical and professional disciplines.

Bobby Cremins, one of the nation's most successful collegiate men's basketball coaches, will bring his charismatic style to Central New York as keynoto speaker at this year's Wildcat Booster Club annual dinner.

The 46-year-old Georgia Tech head coach will address friends of the college at Alfredo's in New Hartford on Oct. 28. The festivities will begin with an open bar at 6 p.m., followed by dinner at 7 p.m.

Cremins has been a visible national figure in men's basketball, recognized as much for his antimetic sideline style and silver hair as for his sparkling coaching record.

Coach Bobby Cremins

Known as a master of on-court strategy and a highly successful recruiter, Cremins last year became the second winningest coach in Yellow Jackets history, with 221 victories, and pushed his 17-year record to 321-194. The Georgia Tech mentor previously coached at Appalachian State, where, at age 27, he was the youngest Division I head basketball coach in the nation.

His recruiting prowess has been evident from the beginning of his tenure at Georgia Tech. Cremins has courted such college superstars as Kenny Anderson (New Jersey Nets), John Salley (Miami Heat), Mark Price (Cleveland Cavaliers), and Dennis Scott (Orlando Magic).

Cremins 1989 recruiting class, that included Anderson, Scott, Malcolm máckey (first round pick of the Phoenix Suns in this year's draft), Darryl Barnes and Iviee Newman, was named the best in the nation by national sports magazines.

When he arrived at Georgia Tech in 1981 the Yellowjackets were coming off a 4-23 season. The consummate motivator, Cremins soon led his cagers to a string of nine consecutive post-season tournament appearances, including eight straight NCAA invitations. Along the way, he also won two Atlantic Coast Conference championships, advanced to the NCAA Final Four. Cremins' teams have also made the Final Eight and "Sweet 16."

One of the game's most respected coaches, Cremins has racked up seven 20-win seasons, including two 27-victory campaigns and a career-best 28-7 record in 1989-90. Georgia Tech's Final Four season with Anderson and Scott leading the way. That effort earned Cremins the national Coach of the Year award.

A Long Way From the Bronx

A Bronx, N.Y., native, Cremins' reputation has reached international levels. In 1986, he assisted University of Arizona's Lute Olson in coaching the U.S. World Games team to its first ever gold medal. And, during the summer of '89, Cremins coached a U.S. squad to qualification for the World Games Championships.

His own college basketball career was highlighted when he became the starter for a South Carolina team that made the ACC title game.

Career Highlights

National Coach of the Year, 1990

Atlanta Coast Conference Coach of the Year, 1983 & 1985

Second winningest coach in Georgia Tech history

Career Record 321-194
Winning Percentage of .623

Nine NCAA Tournament Appearances

Final Four with 1989-90 team; ranked second in national poll

Nations top recruiter in 1989

Seven 20-win seasons

Coached six all-Americans, 15 all-ACC players, six ACC Rookie of the Year selections, Five first-round NBA draft choices

Assistant Coach of 86 Gold Medal U.S. team in World Games
Coach of the U.S. team to qualify for the '90 World Games

Dr. Hakken Earms Fulbright

Professor David Hakken, Ph.D., has been selected as a Fulbright Senior Scholar to conduct research in Norway and Sweden during the 1993-94 academic year.

Dr. Hakken, professor of anthropology and chair of the college's department of sociology and anthropology, will study how advances in computer technology are integrated with traditions for social and political factors in the two Scandinavian countries.

The Fulbright Senior Scholar award is the highest representative of two grants given by the J. William Fulbright Foreign Scholarship Board, which also provides teaching grants. The scholarship board noted Dr. Hakken's "impressive academic accomplishments" and said he would be an excellent representative of the American people while conducting his research abroad.

Dr. Hakken will be on academic sabbatical while conducting his research. In 1990, the professor was awarded the Ernest W. Goodell Research and Creativity Award, a prestigious award presented annually to an outstanding faculty member at the college.
'Cats' Cagers Among the Nation's Best

Four of SUNY Tech's basketball players ranked among the nation's best, according to National Col le giate Athletic Association statistics for the 1992-93 season.

Three of the Lady Wildcats star cagers earned spots among the best in the country, led by senior guard Vicki Fues, who netted the most three-point field goals per game in the nation. Fues collected 95 three-pointers in 25 games; her average of 3.8 per game was second best in the country for the second consecutive year.

Fues also finished her career as the second leading scorer in Lady Wildcats' basketball history. The Madison, N.Y., sharpshooter tallied 929 points in her two years at SUNY Tech. This past season she was second to her teammate, Anessa Lorenz, in the league scoring race, averaging 20.8 points per game. Fues paced the SUNY Tech Women's Conference with 63 three-pointers, second in three-point percentage at .384 and fourth in free throws percentage at .756.

Fues was also named SUNYAC co-player of the week and made both the All-Conference team as an honorable mention and was named to the All-ECAC second team.

Junior guard Lorenz made a lasting impression on the college and the conference, helping lead the Lady Wildcats to their second best record, 15-10, and pacing SUNYAC in scoring with a 23.4 points per game average. She was also fourth in the league in rebounding with a 12.2 per game average.

Lorenz led all New York state players in scoring and placed 21st in the nation.

A consistent force for the Lady Wildcats, in addition to leading the team in scoring, Lorenz topped SUNY Tech in steals, assists, blocked shots and was named to the ECAC Honor Roll three times.

Roman Qualifies, But Exits Early

Make no mistake, it's no small accomplishment qualifying for the Professional Golf Association's most prestigious tournament, played on one of the country's toughest 18-hole layouts. Class '90 graduate Kevin Roman of New York Mills, N.Y., was among the elite field of professional qualifiers who recently took on the challenging course at Baltusrol Country Club in New Jersey.

Roman, who made history at SUNY Tech when he became the college's first golfer to compete in the Eastern College Athletic Conference tournament, made his debut professional appearance at the U.S. Open, where he did not score well enough to qualify for the final two rounds of the national championship tournament.

However, the experience seemed to pay handsome dividends. Roman quickly regained his form and confidence, finishing second in the New York State Open Golf Championship at Albany Country Club in Voorheesville, N.Y., July 20-22.

The SUNY Tech graduate shot 70-71-74 for a 54-hole total of 215, five strokes off the pace set by Darrell Kent of Manhasset. Roman's three-round total on the par-72 course was 1-under par.

Student-Athletes Earn Statewide Recognition

Eight SUNY Tech student-athletes were selected this year to the SUNY Athletic Conference All-Academic team and Commissioner's List.

To qualify for the All-Academic team a student must be a varsity athlete and have a minimum 3.3 grade point average, out of a possible 4.0. To earn a place on the Commissioner's List a student must have at least a 3.3 for three semesters.

The students on the All-Academic team were: Kimberly Molen, a senior soccer team member from Albany, N.Y., studying health services management; Sandra Peck, senior volleyball team member from Morrisontown, N.Y., studying nursing; Donna Pritchard, senior soccer team member from Elon, N.Y., studying industrial engineering technology; and Joanne Rebello, senior volleyball team member from Fall River, Mass., studying business.

Peck and Rebello also were named to the Commissioner's List, along with volleyball teammate Kristen Appin, senior from Latham, N.Y., studying health services management; and Kathleen Nestor, senior soccer team member from Scotia, N.Y., studying health information management.

Michael Shepard '91, is engaged to marry Dawn Tanner on Aug. 14, 1993. Mike is employed at AFS/A Data Corporation, Utica, N.Y.
Edward J. Sabol, Former Dean, Dies

Edward J. Sabol, 77, former dean of public services at SUNY Institute of Technology at Utica/Rome died June 6, 1993.

Dr. Sabol retired from his duties at the college in 1984 as dean emeritus, following 10 years of service.

Edward J. Sabol served as a long and successful career in education. He earned his doctorate in education from Columbia University and served as director of admissions and coordinator of field services at Albany State Teachers College (now SUNY Albany) from 1948 to 1956. At Albany, Dr. Sabol also served as director of instructional television and was an instructor in the psychology department. He also taught graduate courses at Russell Sage College in Troy and served as dean of the school’s evening division.

Dr. Sabol served as president of SUNY College at Cobleskill, before becoming the founding president of Sault Valley College in Dixon. Prior to joining the Institute of Technology, he served as president of Dutchess Community College. In Utica, Dr. Sabol was a member of the First Church of Christ, Scientist, where he was a First Reader, a board member and Sunday School teacher.

A native of Johnson City, Dr. Sabol was survived by his wife, Virginia Davis Sabol, a daughter, two sons, and three grandchildren.

College Community Mourns Jim Burns

The College Community was shocked to learn that on May 22 James A. "Jim" Burns, Jr., 28, of Franklin, died unexpectedly of natural causes.

Jim was both a part of the college staff and an alumnus, graduating from the Institute of Technology with a bachelor’s degree in telecommunications in 1983. Soon after graduation, Jim became a mainstay at the college, where he managed the telecommunications department. A native Uticaan, he graduated from Mohawk Valley Community College and T.R. Proctor High School.

An outdoor enthusiast and athlete, Jim excelled in baseball and wrestling in high school, where he also played trumpet in the school band. His love for the outdoors included golfing, fishing, biking, alpine and water skiing. He also enjoyed bowling and karate.

Jim was active in the community, serving as a commissioner of St. Paul’s Church in Whitesboro.

Jim was married to the former Cindy Routouner on June 26, 1982. They were the son of Jim and Josephine Burns. He also leaves two sisters and brothers-in-law, a brother, nieces, nephews and many aunts, uncles and cousins.

Jim’s family requests that memorial contributions be made to a scholarship fund established in his name for students pursuing telecommunications.

Alumni Donors from 1992-93 Phanthon

The following list includes alumni of SUNY Institute of Technology at Utica/Rome who contributed to the college’s annual gift. We wish to thank all donors listed here for their generous support. This roster is current through June 30, 1993. If we have omitted a name, please notify the Foundation Office so we can include it in our next list.

1993 Alumni Awards Nominations Sought

The Alumni Association is again soliciting nominations of alumni to be recognized for distinguished service to their professions and/or their communities. Fifteen-year awards acknowledging alumni achievement and community involvement will be presented to members of the class of '78, while 10-year and 5-year awards will be given to members of the classes of '83 and '88, respectively, on Oct. 3 at the Alumni Weekend awards luncheon.

Awards are made based on promotions, contributions or other recognition received relating to the nominee's professional, community or personal life.
