Karen Wicka

Emailkkwicka@genesee.edu**IITG Project Title**

2019-Binghamton (BU)-Lynch-ePatient-2

Have you applied for, or received additional funds? (choose all that apply):

- Have received campus funds to support this project
- Other (please specify in text box below)

In 1-3 sentences, how would you describe how your project helps advance the SUNY mission?

The Genesee Community College Criminal Justice Center advances the SUNY mission by providing students with cutting-edge technology, enabling professors to engage in hands-on and interactive learning. Students will learn the newest trends and information for their chosen degree path while also learning to work collaboratively with other students.

In addition to the IITG grant money, Genesee Community College has contributed between \$100,000 to \$150,000 of additional Perkins funds for the project. They have also contributed additional college money for developing curriculum and hiring an additional adjunct to teach with the new technology. After seeing the progress in the Criminal Justice Technology Center, Genesee County has also made a contribution to the room to enable us to integrate even more high tech equipment into the room.

1st Choice:

Connected Learning Models

Connected Learning Models

- Active Learning
- Collaborative Learning Technologies
- Team-Based Learning

2nd Choice:

Instructional Design

Instructional Design

IITG Project Outcomes Form - Report Outcomes : Entry # 892

- Course Design/Development/Re-Design
- Hybrid/Flipped/Blended Learning
- Interaction
- Personalized Learning
- Student Engagement

3rd Choice:

Assessment, Understanding, Monitoring Student Progress

Assessment, Understanding, Monitoring Student Progress

- Adaptive Learning Technologies
- Micro Credentialing (Badging)

What recommendations would you make to scale-up or share your project more broadly (within an educational sector, or perhaps SUNY-wide)?

With the outbreak of COVID-19, we were unable to market the project in the manner that we wanted. Our original goal was to create the accompanying curriculum and create a model to be replicated throughout the SUNY system. Our hope was to help create a state-wide training program through SUNY for Emergency Telecommunications. We were in contact with two additional SUNY community colleges interested in this project. With the changes in learning and the loss of revenue at many schools, this may not be possible in today's climate. We will keep our options open, however, and hope to share with others when changes in academics occur.

criminal justice faculty
applied and collaborative learning sites

Yes, I would like assistance

Do you wish your current abstract to be used?

Yes

File One Upload and Brief Description

At this time we were planning a grand opening this fall with a media push. With the changes in learning, we were unable to do so and will provide these news stories in the future when we are able to reopen.

File Two Upload and Brief Description

We are also planning on sharing the developed curriculum for the Emergency Telecommunications courses that will be offered. When required to close the campus, we were unable to complete full installation and training on the equipment so this curriculum is not completed to date. Once this curriculum is complete, we hope to share it with other SUNY community colleges throughout the system.
