NOTES:

The Department of Mathematics proposes to require that the courses MTH 201, MTH 202, and MTH 281 be required of all mathematics minors, and that the remaining three courses be chosen by advisement from MTH 203, MTH 243, MTH 255, or any course numbered MTH 324 or higher. We would also like to allow an approved college-level statistics course as a substitute for the elective MTH 243. (The other statistics courses currently include ECN 204, PSH 202, SOC 200, and HLS 488.)

*Side-by-side comparison of the old and new program*

Current requirements:	Proposed requirements:
<p>Students must complete a minimum of six courses in mathematics, as follows:</p> <p><b>1. Required courses:</b> MTH 201 Calculus I and MTH 202 Calculus II.</p> <p><b>2. Elective courses:</b> Four courses in mathematics, chosen from MTH 203, MTH 255, MTH 243 or higher. Students must choose these electives only after consultation with their mathematics department advisor.</p> <p><b>Note:</b> At least nine credits toward the minor must be completed at The College at Brockport. If a student wishes to fill some of the requirements of the minor through coursework at an institution other than The College, then the student must first obtain the approval of the department chairperson.</p>	<p>Students must complete a minimum of six courses in mathematics, as follows:</p> <p><b>1. *A brief rationale for changes*

We have found that as a practical matter, MTH 281 has become a “hidden” requirement of the math minor. This is true for at least two reasons. First, advisors will almost always advise their math minors to take this course because of its fundamental nature. Second, because of prerequisites, it is nearly impossible to find enough electives that do not depend on MTH 281. (While it may be possible to do so, some of the courses are rarely offered, and the resulting program could be rather incoherent.) Therefore, we wish to introduce MTH 281 as a formal requirement for reasons of transparency.

Under the current requirements, there are courses such as MTH 313 and MTH 314 that sound as though they would be permissible electives, but which are virtually never agreed to by the advisor as part of a coherent minor program of study in mathematics. (Although these are allowed as part of a coherent *major* program of study in mathematics, to include these special courses in a six course program would represent

too much sacrifice in both depth and breadth.) Therefore, again for reasons of transparency, we wish to write guidelines that clearly exclude these.

Finally, we have a policy of excluding from MTH 243 those students who have taken an approved statistics course through another department. Because of this policy, it seems only fair to allow one of these courses as part of a math minor.

***Description of any new courses***

This proposal does not include the addition of any new courses.

***Staffing issues***

None anticipated.

***Academic administration commentary***

See attached.

***Resources, facilities that may be needed to implement the program***

None

***If appropriate, letters of support from cooperating or affected agencies, ITS, library or other units/departments that may be involved.***

Hello Jason,

As presented in our department meetings, the description of the Minor in Mathematics Program created confusion among some students as it does not reflect the actual status of the program. I think that the clarifications that you make in the Minor in Math Proposals will fix this and I support your proposal.

Michael
