*(Dr. Paul Yu, President of the College)*

### **Resolution on Energy Conservation**

Whereas it is to the benefit of SUNY College at Brockport's students, faculty and staff, and to the fiscal health of the institution to encourage the responsible use and conservation of energy resources,

And whereas the College's mission has the success of its students as its highest priority, emphasizing student learning, thus mandating that the College maintain an environment conducive to student learning and success,

And whereas the College's Mission Statement includes our commitment to preparing our students to understand and act responsibly in a world of globally interdependent communities,

And with a clear understanding of the serious issues concerning the potential depletion of energy resources and the impact of global warming,

Therefore, be it resolved that each and every Faculty Senator will encourage members of the SUNY College at Brockport community to accept and to practice the intelligent conservation of the College's energy resources.
