Rare Book Room
(Continued from page 1)
The Rosegarden Library, a collection of miniature books so small that 24 volumes will fit into a thimble 3/8 inches high, held the interest of many of us, as did many first editions and a collection of Mark Twain’s books in special bindings.

Among the other interesting books seen in the Rare Book Room were several with fore-edge painting. When closed these edges appeared to be only gilt, but when held at an angle, scenes appeared painted in the most minute detail and in beautiful colors.

Flash—A Varsity Team Is Born
Friday, April 23, witnessed the birth of a hounding, blasting varsity baseball team. On the Rees Street playground diamond 1, the Technicians had a highly-rated Griffin team on the run for the better part of six innings. With Harry Sev er on the mound and Norm Kicior showing beautiful form behind the plate, the Canisius team was held to four runs until the sixth inning.

We have a real team, and those who missed the action will want to see the return game on May 12. Other games will be announced beforehand.

In the first inning, Nick Naples sprained his ankle sliding into second; the umpire did a double-take when Sebastian ran in to take his brother’s place. Special bouquet to Harry Sev er for doing a fine job with only two warm-up sessions. Following is the line-up for both teams and the box scores:

Norwegian Educator
(Continued from page 1)
Our visitor’s impression of the Institute was extremely favorable. He felt that the combination of technical and general education was very desirable. He commented that here we have a chance to develop our special interests and to participate in extra-curricular activities for which there is little time in a Norwegian school. Dr. Hel said that he would like to start a school such as ours in Norway, and complimented the program by describing our Institute as the “school of the future.”
