Industrial Exposition

(Continued from page 1)

The Buffalo Institute felt privileged to participate in this panorama of nostalgic events of the past, and exciting plans for the future.

Our exhibit was highlighted by a display showing the Institute as a means of solving the problem of the 60 per cent of high school graduates who do not receive sufficient education to insure their place in the business and industrial world. A map of New York State showed the location of the five New York State Institutes together with a list of the courses offered to high school graduates. A chart illustrated the eight different courses offered in the Buffalo Institute, and a corresponding list of different fields directly connected with these courses. A similar offering in the field of education was exhibited by all the technical and vocational high schools, colleges and universities of the Niagara Frontier.

A projector showing different scenes throughout the school was accompanied by a wire recording machine explaining the slides. Mr. Buehl M. Ray, Communication Skills instructor, was narrator. The Institute was the only school participating in the exposition.

Newman Club Activities

(Continued from page 1)

At the Newman Club Supper Dance April 14, plans for the Geneva Conference were discussed.

The Conference was held in Geneva, New York, April 16-18. The schedule for the three days of the Annual Conference was as follows: On Friday between 8 and 9 p.m. the members registered at the President’s House, 690 South Main Street, followed by an informal reception; the program for Saturday began with a Mass at St. Stephen's Church at 8:30 a.m. At 10:30 a panel discussion was held, and at noon there was a banquet at Club 86; in the afternoon there was another panel discussion on “Practical Aspects of Newman Club Work,” which was followed by an informal dance in the evening at the Geneva Civic Center Ballroom. Sunday's Mass was followed by a Communion breakfast at Hotel Seneca. Most Reverend James E. Kearney presided at the Mass.

The delegates from the Institute were: Patricia Stack, Robert Burkhardt, and Edward Williams.

L. R. C. Reports

On Wednesday, April 21, the L.R.C. held its first monthly “Clean-Up Party.” The members of the Club, having agreed to lend a hand in the many projects the Library is endeavoring to carry on, volunteered to work for two hours after school once a month. Later, we all enjoyed the delicious supper prepared by Maureen Downing and Sally Blewett who were on the refreshment committee. Alice Morsch and Nancy Broosway are in charge of the L.R.C. had the privilege of visiting Cornell Aeronautical Laboratory again in the near future to see their famous Wind Tunnel.

L. R. C. Reports

While on the refreshment committee, Alice Morsch and Nancy Broosway are in charge of the L.R.C.'s 'Clean-Up Party.' The Club extends an invitation to any one who wishes to join the fun at our monthly get-together.

On May 13, the members of the L.R.C. had the privilege of visiting Cornell Aeronautical Laboratory again in the near future to see their famous Wind Tunnel.

Elma Evans, the Head Librarian, gave us an interesting talk on the highlights of her technical library. A great deal of space is saved in such a library by using microfilm cards. About 100 pages of a book are photographed on the back of a regular filing card from the card catalogue. Seven librarians are employed to take care of the 33,000 textbooks, 75,000 reports, 300 technical magazines and other materials kept on file in this library. The L.R.C. hopes to visit Cornell Aeronautical Laboratory again in the near future to see their famous Wind Tunnel.
