

# TECH TALK

Vol. XV, No. 2

Broome Technical Community College, Binghamton, N. Y.

Friday, October 4, 1963

## Rod Serling to Speak at Tech

### 1st Tech Forum Next Wednesday

The class officers and Tech Talk have combined to initiate a program that many feel is long needed at this college. The first in a series of forums will be held Wednesday at 12:10 p.m. in the Little Theater.

These forums will, for the most part, consist of a public interview of influential persons on campus by a selected board

of Tech Talk representatives.

The initial forum will see the Senior Class officers and representatives of the Executive Committee face a panel of three members of the Tech Talk editorial board. Frank Alessi, Ken Harper, Diane Aton, Ann Burrus and Linda Domurad will be asked pointed and pertinent questions by Bob Herzog, John O'Connor and Bob Brhel. Mr. Pufky, assistant coordinator of student activities, will moderate.

General areas of discussion will be the success of the orientation program, the controversial election of the Senior Class Vice President and President Alessi's intention to open the Student Center on weekends.

An opportunity for questions from the floor will be offered 30 minutes after commencement of the forum.

In the future, it is planned to have Tech Talk interview Student Council officials, influential club officials and even Administration and Staff members.

It is the ultimate desire of the class officers and Tech Talk that these forums will make the students more aware of what is happening on campus. It is hoped that through this direct contact with student leaders, the average student will find a desire to wholeheartedly contribute to college programs; at least, so the student will be able to intelligently discuss matters that directly concern his existence on this campus.

Rod Serling, noted television personality

### Evening Address on Dec. 11

Rod Serling, author and creator of the nationally celebrated television series, Twilight Zone, will speak at a special convocation at the college on Dec. 11, a Wednesday. This will be an evening convocation in the gym, starting at 8:15 and the public is invited. Broome Tech students and staff however, will be given preferred seating locations.

Mr. Serling accepted the convocation committee's invitation to speak here in the form of a letter, sent this week, to Lloyd Hartman, chairman of the Liberal Arts Department and of the convocation committee.

The nationally renowned TV author is about to leave on a trip to the Orient, and he will decide on the topic for his talk here after his return to the United States on Nov. 5.

He will fly from California to Binghamton for the engagement here. He plans to arrive the morning of Dec. 11.

At Mr. Serling's request, there will be ample time set aside for questions from the audience. "One thing I would appreciate," he wrote, "and that is to be allowed the time to have an audience give-and-take. I've found that it's far more fruitful to let the bulk of time be devoted to questions and answers."

Mr. Serling is a native Binghamtonian, who attended Central High School. Mr. Hartman was one of his English teachers at Central, which explains why he was able to prevail upon Mr. Serling to include Broome Tech in his plans this winter.

Mr. Hartman recalled the other day that Mr. Serling not only was an outstanding student in his English class, but that he also was editor of the Central High School newspaper, while Mr. Hartman was its faculty adviser.

Twilight Zone, which appears on WNBFTV (Channel 12) in the Triple Cities viewing area, is an extremely popular series. It is respected and enjoyed for its advanced ideas, imaginative writing and excellent presentation.

### Enrollment Explosion

The enrollment explosion at Broome Tech has reached the proportions of 1129 full-time and 140 part-time day students for a total of 1269 on campus. College officials announced these figures last week, two days after the deadline for late registration.

This is by far the largest concentration of students at the college since it was opened in 1947. It greatly exceeds last year's record fall enrollment of 950.

There are 740 freshmen on campus and 389 seniors, with more than twice as many men students as women. The male total of freshmen and seniors is 805, compared to 324 women attending full-time. More than two-thirds of the students are from Broome County, although exact figures won't be available for a few days yet.

The sharp increase has caused considerable concern among college officials, because

(Continued on Page 2)

### Summer Honor Roll

Arthur Sharpe, Electrical Technology senior, finished the summer term at Broome Tech with six A's and one B for a 3.93 average out of a possible 4.00. He had the highest average among the 79 full-time summer students.

Sharpe, T. James Haupt and William Bendart were named to the President's High Honor List. Haupt's average was 3.83, as he had four A's and one B. He is a Mechanical Technology senior. Bendart, a Pre-Tech student, had a 3.58 average.

Ten students earned places on the Honor Roll:  
Roland McClure, Pre-Tech,

Rodney Ritchie, Pre-Tech, 3.47 average.

Kenneth Porter, Electrical, 3.42.

Richard Post, Electrical, 3.26.

Vincent Innarella Mechanical, 3.20.

James Fairchild, Electrical, 3.15.

Charles R. Terry, Electrical, 3.11.

Randy Swartout, Mechanical, 3.10.

Joseph Carrioggi, Mechanical, 3.05.

Charles Rising, Electrical, 3.00.

### Language Lab Nears Completion

Mrs. Bacheller and Mr. Church-Smith in new Language Lab in T 109.

New at Titchner Hall is the Language Laboratory, designed by Mr. Church-Smith of the Liberal Arts Department. Its function is to aid in the instruction of foreign languages through the use of recorded audio lessons.

These weekly lessons will be planned by Mr. Church-Smith and Mrs. Bacheller of the L.A. Department. It is hoped that a student technician can be obtained to tape these lessons and service equipment.

Although the lab will be used mainly by L.A. students, it will also be available to students taking language electives. Students taking a language will spend three hours in class and one hour in lab each week for three credit hour courses. This is standard procedure at other schools with similar programs.

Equipment for the lab is being installed by Brown-Soude of Syracuse.

### Pick Up Citadels

All students on campus, who are entitled to the 1963 Citadel, are urged to pick up their copies of the yearbook, without further delay. They are available daily, from 9 a.m. to 5 p.m., from Mr. Behr in the Public Relations Office, Room 208 of the Administration Building. They are free.

# Editorial

## Democracy vs. Expediency

There is a somewhat idealistic phrase that has been floating around for sometime—the future of democracy is in the hands of the college student. This is idealistic because there will never be a radical change in which college graduates will be thrust into public office, free to dictate to the world their private theories and doctrines; they will be, through political parties, coached and molded into the mainstreams of modern politics—the real future of democracy.

The analogy of college and democracy should not be idealized as indicated in our first sentence. On the other hand, neither should it be as minimized, as it is on the campus of Broome Technical Community College,

There being a vacancy in the office of Vice-President of the Class of '64, Frank Alessi, class president, attempted to throw open the election to the entire senior class. The Class Constitution, drawn up by the Executive Committee and ratified by the Executive Committee, states that in case of a vacancy the candidates for the office should be selected from—you guessed it—the Executive Committee.

The Executive Committee voted down Alessi's proposal for several reasons. Some of the reasons were that Frank needed help right away and that they didn't have time for screening candidates, people who were really interested in the Senior Class were in the Executive Committee, and if anyone wanted to run for Vice-President they could join the Executive Committee (an appointive post by the way).

These representatives of the Senior Class did not consult the class but (idealistically) interpreted the desires of the class or (realistically) did what they, personally, wanted to do. I asked one "representative" why she didn't consult the class, and she said because the students weren't interested in what was going on. How could they be interested in what was going on; they didn't know what was going on.

It would be dangerous to write off this fiasco as the selfish desire of the Executive Committee to keep the office in a clique, although this is an obvious motive. We must consider the fact that some people on the Executive Committee honestly feel that they do not have time for democracy. One member actually told me "We don't have time for democracy. We'll elect a Vice-President and then we'll go back to democracy." Let me caution him and everyone, democracy is not a toy to be discarded when it seems impractical.

In a college predominantly technical—although the budding Liberal Arts curriculum may change that in the future—it seems almost plausible that value is judged by material gains. However, if we, college students, do not have time for democracy, who does?

## LA Orientation ... Enrollment

The Liberal Arts orientation program starts next Wednesday, when the LA freshmen will hear Henry F. Enzian, director of admissions at Ithaca College. The session is scheduled for Titchener 101 at 2 p.m.

This is the first of six such sessions — three for the freshmen and three for the seniors in the Liberal Arts curriculum. The purpose of these orientation meetings is to acquaint the students with information that will be helpful to them in their transfer plans.

The second meeting for freshmen is Oct. 16, when Major Thomas Shimrock, Air Force Academy liaison officer, will speak. Then on Nov. 6, the freshmen will hear John Milavec, transfer counselor of State University of New York at Albany.

These meetings are also set for 2 p.m. in T-101.

The seniors will have their three meetings in T-101 at 10 a.m. on Mondays. On Oct. 14 they will hear Van Burd, director of arts and sciences at State University College at Cortland and Van Dam, his assistant.

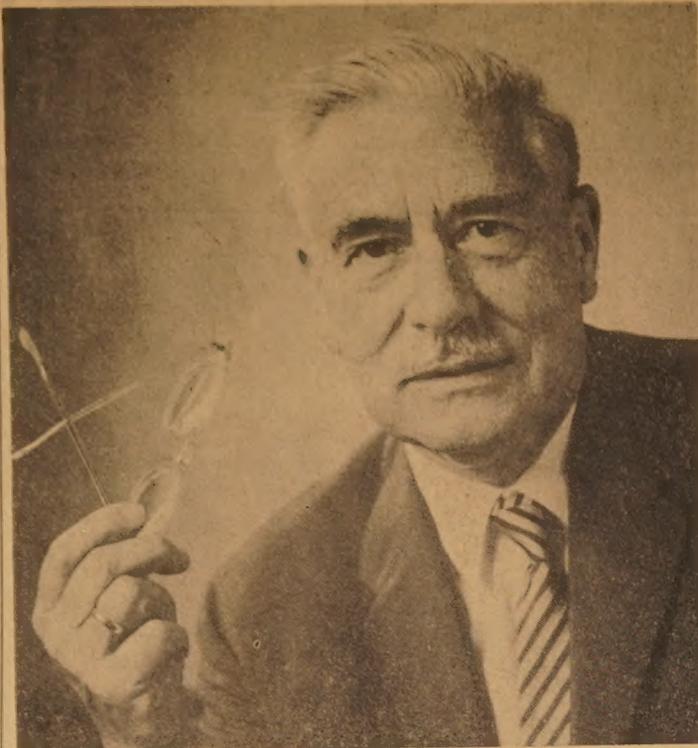

Major Shimrock will address them on Oct. 28 and Edgar L. Sagan, director of admissions at Hartwick College, will be the speaker on Nov. 25.

(Continued from Page 1)

it came in a year when there was no appreciable gain in the number of high school graduates in Broome County. They are wondering what the impact will be next year, when there will be a 30 percent increase in the number of boys and girls graduating from high schools in the county, according to high school projections. There is room for more students in the curricula — electrical, mechanical, civil, chemical and medical office assistant. But capacity was reached this year in the business liberal arts, dental hygiene and engineering science programs.

Following is a breakdown of this year's enrollment figures:

Full-time students			
Curriculum	F	S	T
Business	206	105	311
Chem. Tech	25	21	46
Civil Tech.	19	15	34
Dental Hyg.	38	28	66
Elec. Tech.	73	45	118
Engn. Science	34	23	57
Liberal Arts	155	95	250
Mech. Tech.	58	40	98
Med. Ofc. Asst.	26	17	43
Pre-Tech	89		89
Nurses (SH)	17		17
Totals	740	389	1129
Part-time students			
Nurses (GH)			42
Ext. Div.			98
Totals			140
<b>Over-all totals</b>	<b>740</b>	<b>389</b>	<b>1269</b>

Dr. Debye, winner of the 1936 Nobel Prize in chemistry, will speak at Broome Tech tomorrow.

## Dr. Debye To Speak at Tech Tomorrow

The winner of the 1936 Nobel Prize in chemistry will speak at Broome Tech tomorrow afternoon at the annual joint meeting of the five upper New York State sections of the American Chemical Society.

He is Dr. Peter J. W. Debye. Dr. Debye now lives in Ithaca, where he is professor emeritus at Cornell University.

The meeting is scheduled for 3 p.m. Saturday in Titchener Hall (T-102), and students and faculty members interested in chemistry are welcome.

Dr. Debye will talk on light scattering as a tool in determining high molecular weights. Although his lectures deal with complicated subjects, he is noted for presenting them in a vividly simple and understandable style.

Dr. Debye was born in Holland in 1884 and educated in Germany. He succeeded Dr. Albert Einstein as professor of theoretical physics at the University of Zurich in 1911.

## The Din

by John O'Connor

We deem it necessary at this opportune time to relate to our fellow students those ludicrous occurrences, which their "representatives" and "officers" consider to be of the utmost importance and benefit to the student body.

The first is directed to the Senior Class: Whereas the Class lacks a vice-president, whereas the Executive Committee (a misnomer we think) considers their peers to be FAR too ignorant to choose their own vice-president, said Committee has decided to interpret (rather clumsily and as we shall show at a later date, totally inaccurate) the class constitution and, in their own magical way, declare themselves the only legal candidates for the office.

Oh, the wisdom of our leaders is indeed a wonder to behold! What a magnificent scope of freedom we envision for the future!

The next item is directed to the seniors first and then the frosh. It concerns that grand old custom called orientation. The seniors should be congratulated for their splendid support of their officers and Executive Committee. This was surpassed only by the grand and glorious throngs of Frosh who were always in evidence and ever willing to take their place as an integral part of the college.

Tears come to our eyes when we think of that remixer-Kangaroo Court thing. What a magnificent turn-out! What a success! What fun! It did indeed surpass all our fondest expectations.

Next we congratulate the Student Council for its apparent rescheduling of meetings so as to interfere with nothing. They are, we gather, meeting at midnight in the pasture adjoining the campus on the sixth and eighth Saturday of every month.

We see that the senior class has had one of its offices vacated during the summer, the presidency, I believe. It seems that a class officer is one who is elected for the purpose of penetrating a hoax on his classmates. And, transferring as quickly as possible. CUT LOOSE SIR, AND DAMN THE RESPONSIBILITIES OF OFFICE!

## Word of Thanks

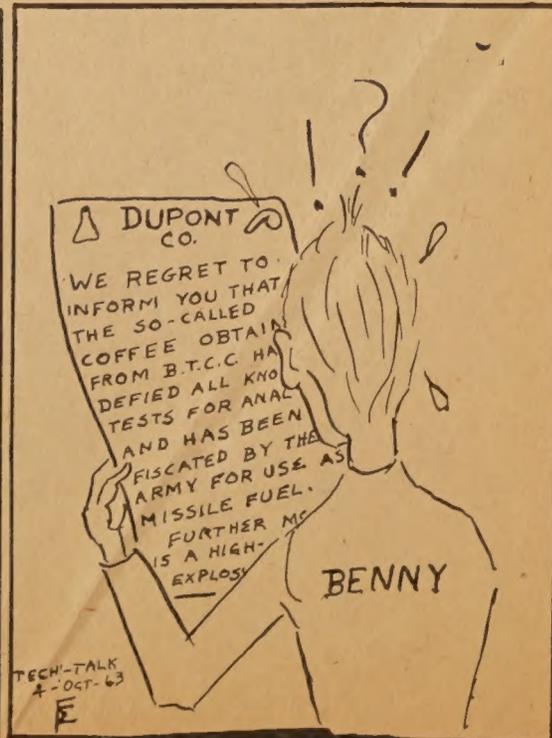

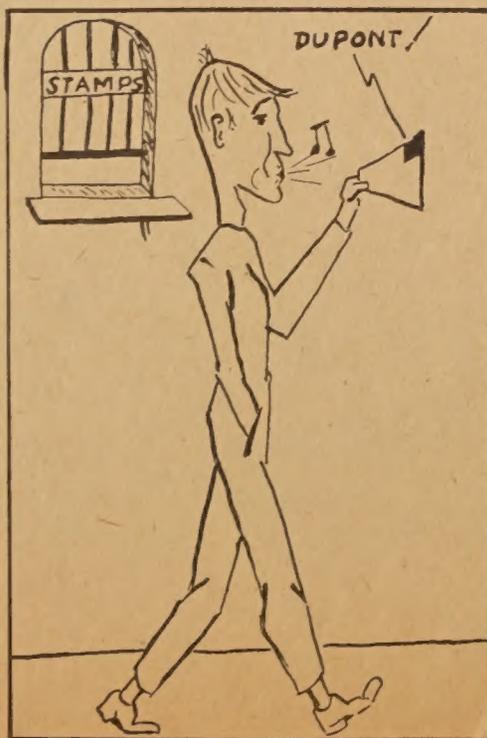

The thoughtfulness of the Tech Talk Staff during my recent hospital experience encourages me to request the courtesy of using the medium of Tech Talk to express a word of appreciation to the many in the college community who thought of me.

Mrs. Hickey and I will forever remember with gratitude the many students who found varied and practical ways of demonstrating concern for us.

To each our heartfelt thanks.

HAROLD HICKEY

(Editor's note — Mr. Hickey was hospitalized for five days with a bleeding laceration that forced him to miss one week of classes. Happily, surgery is not required and he is back on campus).

# Lowdown on Orientation

## Freshman's View

Before I arrived at the college of my choice, I was sent information concerning a program, which has as its general purpose, acquainting the incoming student with the college. This is Broome Tech's Orientation Program. During this period, many diversified activities take place, from getting your schedule of classes, to mixers with upperclassmen.

Here at Broome Tech, some 700 Freshmen participated (or didn't participate as the case may be), in such an orientation program.

Having attended another college before coming to Broome Tech, my views of the orientation program are probably different from the views of someone who is attending college for the first time.

Orientation programs are extremely difficult to plan and to carry out. Something you are sure will be a high point turns out to be a complete dud, or at the very last minute, months of planning must be scrapped and something quickly set up in its place.

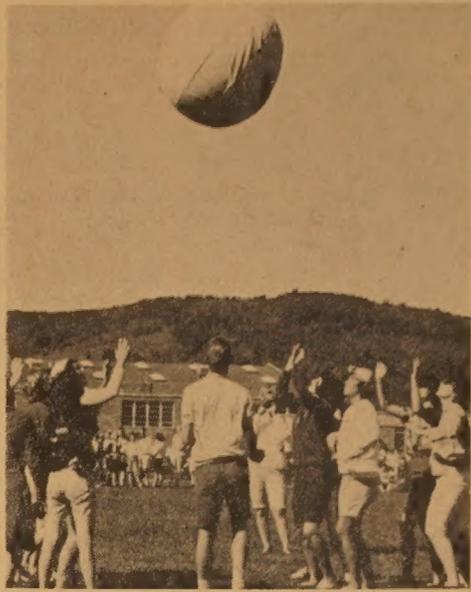

Freshman orientation at Broome Tech seems to need more efficient planning and scheduling of activities. For example, on Tuesday night, the Student Activities Fair and the movie were scheduled for the same time. Many students wanted to see both. By the time the movie was over, so was the Fair.

Why not have the Fair scheduled for another night or, at least extend the time that it will last? I realize the Fair was hampered by seniors, who promised to help, but never showed up. As always, it was left to the few people who are dependable.

There were too many times during this program when we would meet for 10 or 15 minutes and then wait two hours for the next meeting, which was of similar length. Couldn't some of these meetings be consolidated? It is exasperating to wait so long between meetings.

Obviously, hazing doesn't play a big part in Tech life. After the first few days, beanies were virtually non-existent. The seniors didn't seem to care whether hazing was enforced or not. It is a great way to meet your fellow students, provided it isn't taken too seriously.

Orientation program can be improved somehow, but it would be hard to improve the friendliness and helpfulness of the group leaders, who sacrificed so much of their time for the orientation program. To these leaders and to all the faculty, I say thank you, very much. You have certainly made me feel as if I am already a part of Broome Tech.

Fun-packed Orientation contained such activities as Kangaroo Court, picnic and out-ing, and the Activity Fair as pictured above

## Senior's View

The traditional orientation schedule, which the new freshmen have just plowed through, has been regarded by some students as a partial failure. Criticism of the various social functions of the last three weeks is numerous and well-voiced.

Generally, these bullets are aimed at the persons who planned, organized and worked for orientation. Attacks have been made through the usual cliches, "unorganized, no planning, lack of drive." Even, "high school stuff."

These barbs of criticism float from the mouths of many of the freshmen, who thus deserve great praise for their support of our social functions. They also flow from seniors, who perhaps honored us with their presence for a few hours at one of the mixers, or perhaps the picnic, or, if we were very lucky, even at both.

The greater majority of the

seniors don't criticize at all, for they probably attended none of the functions and, therefore, had no idea what had happened.

If, in truth, orientation was a failure, it is not due to the efforts of those few who worked hard for its success. They were betrayed by the seniors, who pay lip-service, and lip-service only, to the social life at Broome Tech!

If you are among these non-participants praising the glories of the class of '64, then you are a phoney. You complained last year about our seniors; you bragged that we had much more spirit and drive than they. Yet, last year, they, a class much smaller than ours, were represented at all social functions. Equally, if not more than we were.

This year, our great, big, boastful senior class was a mere trickle among the many freshmen who attended the various events of orientation.

## "Tie Me Kangaroo Down"

Kangaroo Court was planned as a surprise, but word leaked out, and it wasn't a surprise at all to most of the freshmen.

Out of 770 freshmen, only about 70 of them showed up. There should have been more seniors, too.

Kangaroo Court could have gone better and at a faster pace; but it wasn't too bad. More frosh were on trial than last year and there were more

penalties. Six freshmen had to roll marshmallows across the gym floor and back, with their noses. Many of them got whipped cream pies in their faces.

The jury was made up of freshmen. The judge was a senior. The frosh were picked out by some of the seniors.

If word hadn't leaked out and more freshmen and seniors had shown up, Kangaroo Court could have been a success.

## Harry's Hairy Problem

by Monica Linsky

Another school year has started bringing new problems for the administration and the students. Most important of these is the parking problem.

Due to an increase in the number of students on campus, Broome Tech is beginning to look like a small suburbia with three cars for every family.

The focal point of the problem is Titchener Hall and the entrance to the campus. Within that small area, about one-fourth of the cars on campus are concentrated.

The Administration has issued regulations, which prohibit parking on the left side of the entrance to the campus and on the grass at Titchener Hall.

Why then, is it necessary for

"Harry" to give out so many parking warnings? With so many clear-cut, well-defined rules, why do students persist in ignoring these rules? Why is there a traffic congestion around Titchener Hall?

Some students say that there just is NO place to park. Others have been heard to remark that it is only a dollar ticket.

But I wonder if lack of space is the whole problem. Why is there such a problem to find a place to park?

Could the fact that a majority of the students arrive on campus at eight o'clock in the morning have something to do with it? And what about those students who drive from class to the SUB and then back to class again?

The main problem definitely is a lack of parking space (which will grow more acute in future years). A contributing factor seems to be laziness. How about making better use of the car pools? Ride with someone instead of driving yourself. It still beats walking.

## Choir Openings

There is still time for students, (especially men), to try out for the College Choir and Tech Tone Masters.

There is hard work involved, but there is also a guarantee of parties if you join. If you are at all interested, come to the rehearsals.

The weekly rehearsal schedule follows:

Tech Tones Monday, 4-6 p.m.  
Choir Tuesday, 4-6 p.m.  
Girls Thursday, 4-6 p.m.

## Business Club Has New Policy

The Broome Tech Business Club inaugurated a new policy at its first meeting of the school year last Wednesday, when it had alumnus William Spring (Class of 1961), appear as a guest speaker.

Speakers will be scheduled at all Business Club meetings this year. For the most part, these speakers will be former club members and alumni of the college, who can give first-hand information of their experiences on the job and an evaluation of their preparation for work at Broome Tech.

Mr. Spring, a marketing major here, is now employed by the First-City National Bank of Binghamton.

# Successful Starts For Soccer, X-Country Teams

## Harriers Win Despite Loss Of Lettermen

By Don Purtell

Early in September, cross-country coach, Dick Leo was pondering the outcome of the current season. His worries appeared trivial. After all, with the nucleus of last year's team (won 7, lost 1) returning, he could afford to be optimistic. Then Leo's bubble burst. A series of disastrous setbacks followed:

- 1) Phil Adams, one of Broome's top runners last season, did not return to school.
- 2) Dick Haskell quit, in order to devote more time to academic studies.
- 3) Larry Hayes dropped out, because practice conflicted with his job.
- 4) Bob Hancock, a transfer student from Niagara, was declared ineligible. However, his keen interest in cross-country has prompted him to take over the managerial duties of the team.

The eligibility of Bob Walluk, Broome's top runner, had to be reviewed by the National Junior College Athletic Association, and it was in doubt until about an hour before the opening meet last week.

Since Bob has attended Tech for three years, (one year as Electrical Fresh, two in the Liberal Arts curriculum) the question of excess of credits arose. Much to the relief of Coach Leo, Bob's eligibility has been retained.

As a result of these setbacks, Leo has had to start practically from scratch.

If the results of Broome's first two meets give any indication of the potential of this reinforced squad, Broome's opponents should be on guard.

Broome defeated Monroe Community College (19-40), Walluk and Bradley tying for first with times of 18:41. Jerry Eddy and Bob Miller took fourth and fifth for Broome, while John Lotsman finished seventh.

In last Saturday's action, Broome defeated Hudson Valley 19-36. Walluk and Marshall Bradley finished 1-2.

Other newcomers are:

Phil Pallady, experienced runner from Windsor High.

Dick Shiels, also a Windsor graduate, who hasn't run for three years, but is developing at a rapid speed.

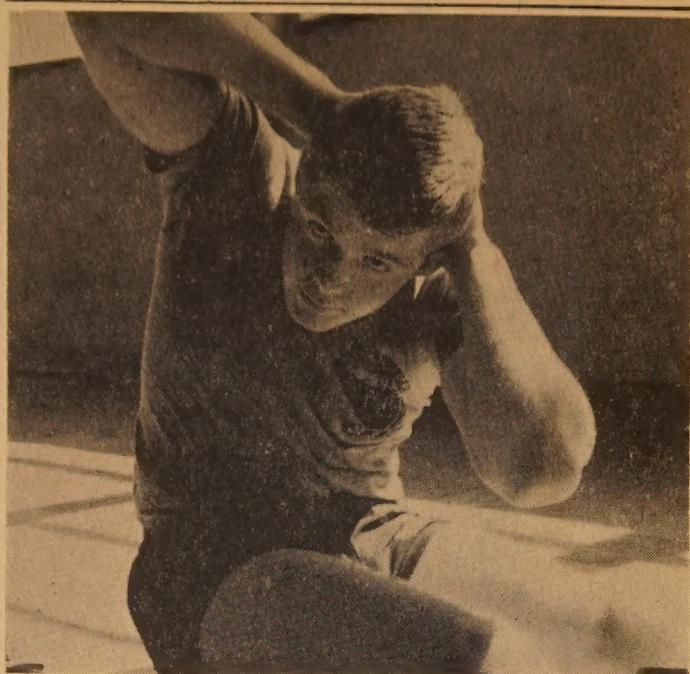

Clyde Black, Ralph Brown and Dave Hettinger.

## Ball Rolling For Bowling

Again this year, Broome Tech will have faculty-student bowling at the Town and Country Lanes. It started on Sept. 23.

There will be two leagues, Mondays at 4:15 and Wednesdays at 4:15. These leagues will be composed of ten teams, consisting of four bowlers on each team.

If time permits, after the leagues are finished, there will be a playoff among the top eight teams.

Bob Harrison

## Will the Real Bob Harrison Please Sit Up?

Bob Harrison, a Liberal Arts freshman, astounded Broome Tech's Physical Education department when he did 628 sit-ups in a physical fitness test given by all men's gym classes. Coach Rene Valentine says that the average endurance is somewhere between 50 and 60 sit-ups.

Furthermore, Harrison said he wasn't even tired, but only quit because he had to go to work. (He kept the same pace throughout the endeavor. He said that after the first 150-200 sit-ups, you get into a groove and don't even feel the muscle pull. He added, "But you do wear a little hide off.")

He said that he has never reached a limit in sit-ups, but 628 is as high as he has ever tried for.

He does sit-ups in his own

physical fitness program, which entails working out with weights three times a week.

A graduate of Chenango Forks, Bob won varsity letters in cross-country, wrestling, baseball and track. He does not intend to try out for varsity sport at Tech this year because of a job obligation.

## Cheerleaders Selected

After hours of practice and weeks of anticipation, Broome Tech has selected two cheerleading squads for the 1963-64 season. The girls were selected for their ability to cheer, general appearance, poise and personality.

Cheering the Hornets to victory on the soccer field will be Pat O'Neil, Cathy Hancock, Sandy Shimer, Sharon Boezi, Barbara Troger, Ann Boyle, Ann Russin, Gail Van Derver and Liz Borvika. All are freshmen.

The basketball cheerleaders, all seniors, are Joyce Harrison, co-captain, Sally Hazard, co-captain, Dawn Fix, Rennie Healey, Ellie Page, Mary Hanchak, Mickie Jablonski and Jeanne Bakeman. Janice Komarinetz and Jerry Yacko are alternates.

This year the girls would like to accompany the teams and cheer at away games. The cheerleaders and their advisor, Miss Davies, will arrange to have spectator buses for the students' convenience. You are asked to cooperate and attend not only the home games, but, also the away games, when possible.

## Skojec Leads Booters In First Three Starts

Broome Tech's varsity soccer team under the new direction of Ed Daub, has made an impressive showing in its first three contests winning two and tying the third.

Against the Alumni on September 21, Broome scored a 3-2 victory, with John Fiato scoring the winning goal. If this weren't enough to turn Mr. Daub's hair white, then on September 25, Mike Roe of Broome Tech scored the winning goal with 11 seconds remaining, against Monroe Community College. An assist from John Fiato helped pull out the 4-3 victory.

Scoring ace Bill Skojec, playing with a bad right knee, rounded out Broome's scoring in the Alumni game with the first two goals, and also added two goals against Monroe.

Broome finally ran into some trouble on September 28, when it played Hudson Valley to a 2-2 tie. Broome's attack in this deadlock was comprised of goals by Carl Fobel, a freshman and Skojec once more. Broome went ahead in this contest in the fourth period on Skojec's goal, but Hudson tied the score at 2-2, with 8:10 to play.

Each of the Hornet's con-

tests thus far has been dominated by the aggressive desire of the players throughout the entirety of each game. This was particularly evident in the defeat of the strong Monroe team. Special laurels should be given to Jim Snape and Dick Swantak, who played excellent, steady games in each of the three contests.

Daub's team also seems to have found a strong goalie in Duane Rinker, who has taken the place of the graduated Ray Van Ness. Duane collected 10 saves against Monroe Community College.

Coach Daub

## INTRAMURALS

by Walter Prospect

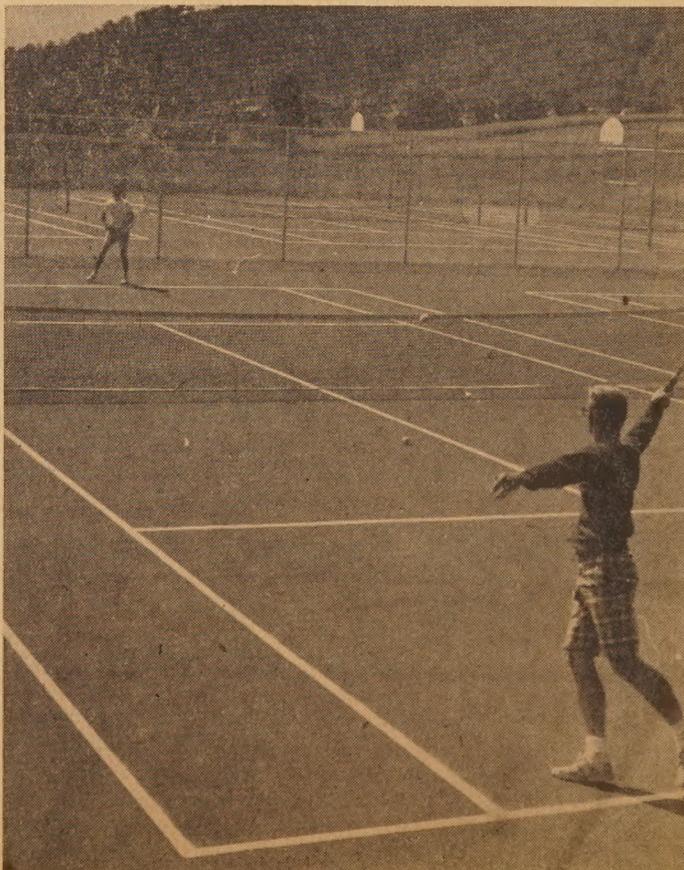

The 1963-64 Men's and Women's Intramural programs are being prepared. All games will be held daily from 11 to 1 and all students are urged to join their departments' teams in action.

The men have 16 teams entered and the women seven in this year's activities. Men's sports include bowling, basketball, softball, badminton, golf, archery, volleyball and soccer.

The women's sports are archery, volleyball, badminton, bowling, softball, tennis, bas-

ketball and Hurricane 9. (a female version of flag football).

The winning team in both divisions will attend the annual Awards Banquet with the Broome Tech varsity teams. At that time, the President's Trophy will be awarded to the winning men's team and the new Dean's Cup to the winning women's team. This entitles the two teams to display the trophies in their respective department buildings through the following year.

Paul Okoniewski (right) challenges Mike O'Connell on newly constructed tennis courts.

## Daub to Coach Soccer, Tennis

Broome Tech's latest addition to its Athletic Department is Mr. Edwin C. Daub, who has joined Broome's Physical Education Staff this fall as an instructor. Mr. Daub has also assumed the duties of varsity soccer coach and will coach the Hornet's varsity tennis team next spring.

Coach Daub is a graduate of Cortland State, obtaining both his BS and MS degrees there. His experience in coaching soccer ranges back to 1958, when his team won the first of three consecutive league championships at Oriskany Falls High School, near Utica. He also coached baseball and basketball while at Oriskany Falls.

In 1961, Mr. Daub went to Hudson Valley Community College where he started the college's first varsity soccer team and also handled the baseball team. Last year, he coached at King Ferry High School, near Ithaca, where he again handled soccer, baseball and basketball.

Thus far at Broome Tech (at time of printing), Coach Daub's soccer team has made an excellent showing, winning its first two games and tying the third. Next game is scheduled for tomorrow against the Cornell Frosh at Cornell.
