

Conferences on Instructional Technologies (CIT's)

Format: Face-to-face

Duration: 3 1/2 Days

Prerequisite Knowledge: N/A

DESCRIPTION:

This is an annual conference sponsored by FACT (Faculty Access to Computing Technology) and is SUNY's largest event on instructional technologies, drawing an average of 500 participants from SUNY and non-SUNY campuses. The conference is open to all professionals, faculty, technologists, administrators, and librarians interested in technology in teaching and learning.

The conference includes one day of hands-on, pre-conference workshops that focus on some of the latest technologies, and two and one-half days of concurrent sessions in the following formats: papers, panels, birds of a feather, hands-on demos, and vendor presentations. SUNY and non-SUNY individuals are encouraged to submit an abstract to be considered for presentation at the conference.

Vendors exhibit their products and services at the Technology Showcase. CIT, which began in 1992, takes place at a different SUNY campus each year, and is typically held immediately following the Memorial Day holiday.

Visit the CIT Conference Website at <http://cit.suny.edu/> for additional information.
