Recommendation from the Graduate Curriculum and Policies Committee  
with regard to proposed changes in program submitted by  
the Department of Public Administration.

The Committee recommends that the proposed change, which adds an information management specialization to the graduate program in the Department of Public Administration, and which is described in the attached letter, be accepted for approval.

A handwritten signature in cursive script that reads "Robert P. Thompson".

TO: Bob Thompson, Chairperson, Graduate Curriculum Committee  
FROM: Ed Downey, Chairperson for Public Administration *Ed*  
RE: Curriculum Changes in Public Administration

We would like to add an information management specialization to our current program. This specialization will not affect other departments and, therefore, does not create the problems associated with interdepartmental coordination.

Students in the management information specialization would be required to successfully complete our core courses (27 credits) and 12 credits of electives in information management for a total of 39 credits. The electives in information management would be drawn from the following list of Public Administration courses:

- PAD 620 Management Information Systems
- PAD 666 Computer Applications in Public Administration
- PAD 667 Statistics for Managers
- PAD 668 Computers in Financial Management
- PAD 669 Micro Computers For Managers

All but one of these courses, PAD 668 Computers in Financial Management, are currently offered by Public Administration. Therefore, the specialization is, in essence, a reformulation of existing courses.

If you have any questions or require further information, please contact me at your convenience.
