

## Student Council Primaries Next Thursday

### Cafeteria Problem Nears Solution

A significant step in the solution of the cafeteria problem was to be discussed by Student Council as a proposal last evening. There are few problems foreseen by the Council; therefore, we may assume that the proposal will have been passed without major change.

The proposal, drawn up by a Student Council Committee last Tuesday, asks for the establishment of a Student Court to levy fines on students found playing cards, loitering, or leaving trash in the cafeteria between 11 and 1.

The Court will consist of five judges headed by the President of Student Council. The other four judges will be

elected by a Student Council vote.

There will also be five deputies of the court, whose responsibility will be to hand out subpoenas between those hours mentioned. The deputies will be named by the judges of the Court.

Fines will be comparable to traffic fines in price, and the money will be given to the scholastic fund.

Dean Reynolds has already pledged full support of the Court and stated that student's failure to pay fines, or to comply with the deputies' requests will be met with disciplinary action.

### Activity Awards Limit Removed

by Peggy Telfer

The limit of awards to students in each co-curricular activity was removed at a special meeting of Student Council held April 2.

Formerly, the number of students in each organization eligible to receive an award was limited to three. A proposal was passed by a unanimous vote of Student Council to have no limit on the number of students eligible from each organization, but to have the faculty advisor of the club submit a written resume listing the achievements of each student to be considered for an award.

At the regularly scheduled council meeting on March 26, President Clickner announced that nine Broome Tech students, eight freshmen and one senior, will attend the annual statewide CISGA convention at Grossinger's on April 12, 13 and 14.

Frank Alessi suggested that pins be awarded to those students who are active in the task of improving the scholas-

tic and social life here at Tech.

These pins would be awarded at a convocation at the beginning of the senior year and would enable students to "know who is doing something for them" and "attract people into student government."

This suggestion was not made into a proposal, as Frank plans to take it to the Senior Executive Committee for formation of concrete ideas to be used in this plan. If a motion is made and passed, it is unlikely that it will go into effect this year.

### Choir Concert Next Friday

by S. Robert Houck

Broome Tech's next concert by the College Music Department will be conducted Friday, April 17, at 8 p.m. in the gymnasium. The concert will feature two professional soloists and the accompaniment of a full orchestra.

The soloists are Leona Curatola, soprano, and Marjorie Stetson, mezzo soprano. In addition to popular music and a brass ensemble, the choir will present "Gloria" and "The Peaceable Kingdom," the latter an oratorio appealing to mankind's universal search for peace.

The opportunity is presented to the student to contrast an 18th century work with a 20th century contemporary composition. "Gloria," by Antonio Vivaldi, is an 18th century masterpiece of solos and full chorus expressions in a multiplicity of variances, but retaining perfect unity in harmony.

However, "The Peaceable Kingdom," by Randall Thompson, is typical 20th century in

(Continued on Page 3)

### Interview Time for Students...

Steven Simons of the Engineering Science curriculum is being interviewed here by Mr. George Elliot, a representative of Sandia Corporation.

### ...Prospective Students

Here a prospective Broome Tech student is being interviewed by Mr. Powers, Admissions Director of the College.

### Rod Serling Expected Here on April 24

The eagerly-awaited date for Rod Serling's speaking visit to the Broome Tech campus is probably April 24, two weeks from tonight. His talk will be open to the public. This constitutes the second change, as he was originally scheduled for December, before a call by President Johnson forced postponement until June 1.

Mr. Serling, the noted creator of television's Twilight Zone series, notified Mr. Hartman on Wednesday that he would be in New York City from April 22 to 25 and that he would thus prefer coming to Broome Tech then instead of flying in from California in June.

Mr. Hartman wired him yesterday that April 24, a Friday night, was the date the convocation committee decided upon. Confirmation from Mr. Serling had not yet been received when this issue of Tech Talk went to press last night, but it was expected to be satisfactory because this was one of the dates suggested by Mr. Serling.

### No Candidate Yet for Secretary

In an effort to produce a full slate of candidates for next year's Student Council offices, President Bob Clickner invited all Freshman with a 2.5 or better average to a tea last Monday evening. Prior to the tea there were only three candidates willing to run for Student Council office. Now there are eight, but still none for secretary and only two for treasurer. Clickner stated that, "I guess we'll have to call up people and ask them to run for secretary."

Following are brief summaries and comments of and by the candidates:

#### For President

John Brauer graduated from Johnson City High where he was vice-president of Student Council, vice-president of his senior class and belonged to Key Club. He intends to "arouse interest in student activities."

Alen Goodsite is a North High graduate. "I'd like to see something done about the parking. I am now drawing up a presentation for a possible solution."

Bob Larkin is a graduate of Whitney Pont. He was vice-president of his junior and president of his senior class, president of Varsity Club and a member of the National Honor Society. "I would like to alleviate problems through improved communications, and try to tie the school's departments together."

Ted Miller graduated from Susquehanna Valley where he was president of Student Council, French Club, and Chi Phi Kappa fraternity. He stated, "I don't know what power this council has, but I always thought that a council should be very strong; I would see that the officers fully utilized their power."

#### For Vice-President

Paul Salimida is a Union-Endicott Graduate where he was president of the Church Club. He is an active member of Broome Tech's council. "Because I'm on this year's council, I am aware of the current problems. Specifically, they are the cafeteria, parking and the lack of life in student affairs. I back Frank Alessi's program all the way."

Low Young graduated from Cincinnatus Central and then put in 4½ years in the Air Force. At Cincinnatus he was president of his class. He feels that "more organization is needed. There is not enough information given to the students."

#### For Secretary

??????

#### For Treasurer

Dick Lehr graduated from Southold High in Long Island. He was the night auditor at the Arlington Hotel for two years, and he "set the bookkeeping procedure for Avis-Rent-A-Car in Binghamton." "I'd like to help initiate closer ties between the students and the campus."

(Continued on Page 3)

# EDITORIAL

## WHY VOTE?

Next November there will be an election for the Presidency of the United States. Many of us are, or will be, of voting age. We have all heard the tired old cliché "Voting is more than a privilege, it is the duty of the citizen."

This statement, as it stands, is nothing more than irresponsible flag waving. We intend to make our criticism clear, as well as our purpose in printing this editorial, which may appear premature to some.

The one point that all political demagogues omit in their frantic drive to herd all citizens to the polls in the phrase, "Vote intelligently." I suppose that they feel it is difficult enough to get the populace out of their overstuffed easy chairs and to the polls, without further complicating the task by asking them to examine the issues and candidates before they vote.

It would be amusing if it were not so tragic to see ignorant voters walking out of a poll with self-satisfied smiles and the misconception that they have exercised their rights as citizens. They have exercised only the right of ignorance (if there is such a right) which comes from apathy and indolence; their pathetic rantings as to the state of government (which they are innately a part of) is the fruit of their exercised right.

If the adult portion of our population is to be so lax and careless, the full burden for responsible government lands squarely in the lap of blossoming citizens. We, the college students of today and the government of tomorrow, must accept this responsibility.

We must not wait until we are faced with meaningless names and rows of levers; we must read and debate the issues right now and follow their progress to their conclusion.

We must debate the issues, because our responsibility requires it. We have to bring the issues to the public whether the public wants to take the time to listen or not. That is why we have to admire and foster organizations such as Broome Tech's "students for Rockefeller" group whether or not we happen to be for Rockefeller.

Finally, voting is only a privilege, **Intelligent voting** is the duty and the responsibility of every conscientious citizen.

## Campus Calendar

April 15	Baseball game at Keystone	3:30 P.M.
April 16	Student Council Convocation in SUB	10:00 A.M.
April 16	Student Council Primaries in SUB	11:00 A.M.
April 18	Science Congress	8:00 A.M.
April 18	Golf at Cornell	2:00 P.M.
April 19	Women's Club Spring tea in Lounge	4:00 P.M.
April 21	Golf at Keystone	2:30 P.M.
April 21	Baseball at Baptist Bible Seminary	3:30 P.M.
April 24	Student Council Finals	11:00 A.M.
April 24	Next issue of Tech Talk	11:00 A.M.

## Bank Donates \$100 Award

The Industrial Bank has established a new award, a \$100 savings bond, to go to the Liberal Arts senior who writes the best original essay in a competition that closes April 30.

The award will be made during the annual Honors Convocation (formerly called Moving Pp Day), which is set for May 8 this year.

The topic for this year's essay is public higher education, and all essays submitted must be typed and between 500 and 750 words.

Judges will be announced at a later date, probably in the next issue of Tech Talk, which will

be distributed on April 24. Contest rules sheets can be picked up in the Liberal Arts department.

Mrs. Nancy Ramsey, latest addition to faculty in Business Department, replacing Mr. Miles.

## 'Closed Door' Policy

During the past few months many students have been inconvenienced, while others recognized peril existing here on campus.

The problem concerns the tied doors at the rear exit of the cafeteria. The situation presented itself when the hinges on the doors failed and ropes were used to hold the door shut until newly ordered parts arrived.

Although this is the explanation for the tied door, some believe the card players are responsible for this action because they dislike the cold air entering the cafeteria through these doors. The latter belief will be disproved when the doors are repaired.

Since the hazard far surpasses the inconvenience, such as a possible fire alarm, the ropes on the doors have been loosened to facilitate an emergency exit. In addition, Mr. Young of the audio-visual department has prepared signs for the doors to notify all those who wish to enter or exit, that the "Doors are out of order."

## Colonel Yeager Stresses Value of Simulator Training Program

Col. Charles E. Yeager stressed the importance and need for scientists in the future development of space research, as he spoke here a week ago Wednesday night. He was introduced by Mr. Lloyd L. Kelly, President of Link Aviation, as a man of "courage and high capability" with a remarkably impressive service background.

He is commandant of the United States Aerospace Research School at the Edwards Air Force Base in California and the first man ever to break the sound barrier. He discussed the research program responsible for his achievement and the techniques and curricula of the training school.

His discussion centered on simulator training, a relatively new technique in the test pilot training program, which gives the student every sensation and practice he would experience in space, except acceleration.

## JFK Library Fund Seeks BT Support

In a letter to Robert Clickner, Student Council President, The John Fitzgerald Library Corp. asked him to (1) serve as fund chairman at Broome Tech or to choose another student to do so and (2) to inform the student body of the drive and to assess the reaction.

The corporation has been organized to raise \$10,000,000 for construction of a library in memory of our late President. The chosen site of the library is on the banks of the Charles River in Boston.

The letter emphasized the fact that the request came from a spontaneous desire by college students to help the corporation raise money.

It stated further, "Hopefully these funds will be used for a specific room of the library which will reflect President Kennedy's influence on youth and education."

## Profs Win Grants

By Carol Greenwald

Three faculty members have accepted six-week National Science Foundation (NSF) grants for study this summer. They are:

Prof. Frederick Hanrahan of the Chemical Technology department, who

Prof. Frederick J. Hanrahan

will study advanced chemistry at the University of North Carolina in Chapel Hill, N. C.

Prof. William Ryder of the Mechanical Technology department, who will study basic engineering sciences at Bucknell University in Lewisburg, Pa.

Prof. Arthur Stankevitz of the Chemical Technology department, who will also study basic engineering sciences at Bucknell.

Prof. Hanrahan attended a summer session last year also. It was under the sponsorship of the National Science Foundation at Tufts University. It was as a result of his work at Tufts that he was advised by an NSF interviewer to apply for a more advanced chemistry institute this year.

After applying to three different universities, and having been awarded a grant from each one, Prof. Hanrahan chose the University of North Carolina. The other two include Emory University in Atlanta, Georgia and the University of Florida in Gainesville, Florida.

Prof. Ryder was also accepted for an NSF grant at Penn State, but he preferred the Bucknell offering. Prof. Stankevitz applied only at Bucknell. This is his first year at Broome Tech following 12 years as an engineer at Anasco.

All of the universities granted the following allowances; weekly stipend to participants, allotments for transportation, books, fees, and tuition as well as expenses for a family of not more than four.

## THE DIN

by John O'Connor

There appears to be a concern in Broome County over the growing complexity of problems—social, commercial, educational and the like. This can be attributed to the rapidly rising population of the county and its industrial complexes as a whole. Whereas in past decades the population was largely concentrated in the city of Binghamton and the villages of Johnson City and Endicott, today the trend is toward the suburbs like Vestal, Kirkwood, and Windsor where land is cheaper and taxes are lower.

As the population becomes more evenly distributed throughout all of Broome County, we must recognize the need for and accept the responsibility of a county-wide form of government.

The Triple Cities, like King John of England, must grant a Magna Carta of quality, distasteful as it is, in order that all the people, and in turn the entire county, might benefit.

Throughout the 50's and continuing into this decade, we have witnessed continually recurring problems of taxes, legal rights, school systems, education, etc., etc., ad infinitum.

While we recognize these issues as growing pains, we must also realize that they cannot be alleviated by sticking that child Broome into antiquated vase of small municipalities. Rather, this dynamic young Broome must be put on an enlightened path forward, so that it might better be able to compete in the life of the State and fulfill its own needs as it matures.

We believe the first great step in the right direction will be the hardest to take, and at the same time the most beneficial. Consequently, we plead for the inevitable—a county-elected Executive Government, and believe that in being unique in the country at this time, Broome can, like Edison, illuminate the world of local government in the United States, as an enlightened forerunner of the Utopian system.

## TECH TALK STAFF

Editor-in-Chief	Robert H. Herzog
Editorial Directors	Robert Brhel, Monica Linsky, John J. O'Connor, Donald Purtell, Ronald Purtell, Mary Whitmore
Circulation	Carol Greenwald
Staff Writers	Dick Barnett, Tom Malloy, Serge Naramore, Cathy Hancock, Mary Carmody, Lori Butler, Bob Houck, Ellen McNamara, Sara Sepe, Chuck Curtis, Ray Moneagle, Jim Trask, Peggy Telfer, Ralph Brown, Cathy Crowe
Faculty Advisor	Mr. Marvin Behr

# Entertainment Was Sparkling At Candlelight Cafe

## Fireside 4 Headlines Program

by Monica Linsky

Using a coffee-house theme, the Tones and the College Choir successfully decorated for this year's Candlelight Cafe last Saturday night. The walls were trimmed with abstract paintings, the refreshments were typically "beat", and even M. C. Bob Houck donned a beard.

The most enjoyable part of the evening was the fine entertainment provided by the school talent.

Jennifer Trudgeon, Ann Marie Popick, Connie Sheldrake, and the Tones proved to be exceptional vocalists; Maggie Madigan thrilled her audience with a dance routine done to "Watermelon Man." A June '63 graduate of Broome Tech, Bob Kooch, surprised us with a take-off on the Beatles, guitar, wig and all.

The humor of the evening came from Leon Chojnacki and his friend Baby Fabiola (Gary Shiffer), and Elaine Robinson did a delightful monologue on Ban, Cleopatra, and Mr. Hickey. A new singing group comprised of seven "lovely girls", the B.B.B.'s sang their version of "I Feel Pretty."

Finally, the almost pro-sounding Fireside Four entertained with songs, jokes and the Spirit of '76. During their act, they announced that they are making a record for the Caprice Company.

All who were involved with this dance have ample reason to be proud of an excellent job; proof positive of Tech's students' ability to produce.

## Local Science Congress

There is no school on Saturdays here, but there may be as many people on campus a week from tomorrow, April 18, as we usually have on a weekday. The annual Science Congress will be held here that day.

This event has drawn more than 300 contestants in recent years and many more people who just come to see the exhibits and to witness the judging. It's a unique event and one worth watching for those interested in things technical and scientific.

The Science Congress is for high school and junior high school students who have exhibits or displays in five categories—chemistry, physics, biology, earth science and general science.

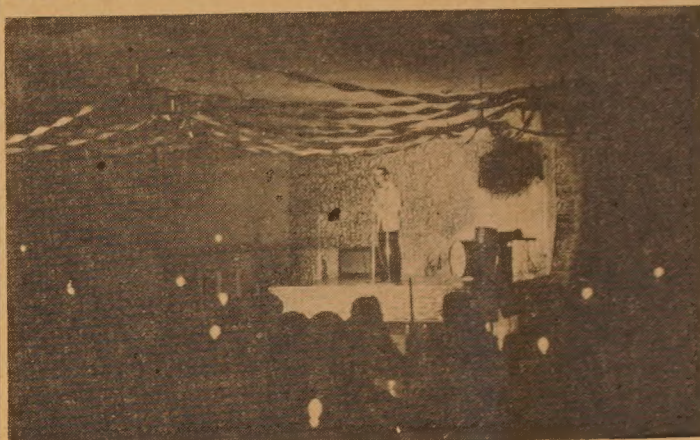

The event is open to boys and girls from a nine-county area.

The nine are Broome, Tioga, Chemung, Cortland, Tompkins, Steuben, Schuyler, Chenango and Otsego.

Prizes—and there are many—are awarded at 3 p.m. in the gymnasium. The exhibits are open to the public and to Broome Tech students starting at 9 a.m. The prizes include a \$200 scholarship to Broome Tech, as well as one to Harpur College.

Some of the entertainment at Candlelight Cafe: left to right, Ann Marie Popick, Jim Johnson, George Jones, Larry Meloro, Harry Moore, Leon Chojnacki, and Bob Houck in front.

Robert Houck, M. C.

## Choir Opens World's Fair

by S. Robert Houck  
Mr. John Wilson, production supervisor for the performing arts of the World's Fair has notified Professor Charles M. Greene that the Broome Tech College Choir has been selected to perform at the opening dedication ceremonies of the New York World's Fair Thursday, April 23, at 11:30 a.m. in the New York State Pavilion.

The February 21 issue of Tech Talk mentioned they were to sing at the opening performance, but they were not sure

at the time if they would be granted the privilege of the dedicatory ceremony. They will still perform three concerts at the Fair.

The New York City Youth Symphony and The Maritime College Band will also take part in the opening event. This televised program will be highlighted by appropriate remarks from Gov. Nelson Rockefeller, Lt. Gov. Malcolm Wilson, Mayor Robert Wagner of New York City, and a host of other New York State officials.

## Roberts Shows Women How

All women students are welcome to the annual spring tea of the Broome Tech Women's Club a week from Sunday, April 19. This will be held from 4 to 6 p.m. in the Student Center.

This is to be more than a mere social event, as a hair-styling talk and demonstration will be given by Mr. Roberts, a Johnson City hair stylist. His presentation is entitled "Leap Year Collection of Hair

Styles."

Four students will be models for Mr. Roberts. They are Nancy Kanabroski, Lorraine Butler, Dawn Joy and Ellen McNamara.

Mr. Roberts will give tips on hair coloring, hair setting and how to handle those last-minute emergencies that arise, as for example when one receives a last-minute invitation to go out.

## Prof. Beagle Named Head-Pre Tech

Prof. Axford Beagle of the Chemical Technology department has been named head of the Pre-Tech department on campus. He will continue teaching in the Chemical department.

Prof. Beagle's appointment makes him the first head of the department, although the Pre-

Tech program has been in existence since 1957.

The program is designed to aid students who are academically unprepared for admission to the regular curricula. The program not only academically prepares the student, but it also orients him psychologically to college level work.

## Concert...

(Continued from Page 1)

its irregularity of patterns, rhythm, and chord progression. One can easily recognize the difference and can appreciate the composer's accomplishment of his intent.

Tickets are now available in the Music Department's office. Broome Tech students are reminded that there is no admission charge if they present their identification card. Otherwise, adult tickets are \$1.00 and student's \$.50.

## Primaries...

(Continued from Page 1)

Ann Marie Progorowicz graduated from St. Patrick's Academy where she was treasurer of her Freshman class and secretary of her Junior class. At Broome Tech she is a member of the Frosh Executive Committee. "I'll endeavor to work hard and hand with the other officers, but of course we all need the support of the entire student body."

Primaries will be held April 16 following the convocation, and the finals will be April 24 from 11:00 to 4:00 in the SUB.

## Alumni Dance Tomorrow

The Alumni Dinner-Dance will be held April 11 at the Polish Community Home on Prospect Street in Binghamton. It is an annual affair, which this year will feature the installation of the new officers of the Broome Tech Alumni Association.

Members of the Class of 1964 will automatically become members of the association after graduation, and those in the class of 1965 will become members next June.

The Alumni dance committee can use some help in decorating the hall for the dance, and since the students did such a splendid job in decorating the gym for the King Tech and Queen of Hearts Dances this year, it is hoped that some of the same students will help the alumni.

Anyone interested should contact Mr. Behr in A 208.

## Pygmalion Production Cancelled

The oft-postponed drama club production of Pygmalion has been canceled. The major reason behind the cancellation is the fact that four parts were suddenly left vacant due to fail-outs.

Failure of the students to learn parts and their sporadic attendance at rehearsals was the reason for the earlier postponements and certainly must be a factor in the cancellation.

The club is planning to have meetings to see if it would be feasible to have another production.

## Phi Theta K to Hear Prof. Oggins

by Bob Curley

Robbin S. Oggins, history professor at Harpur College, will be guest speaker at a dinner meeting sponsored by Broome Tech's Phi Theta Kappa, national honor society, on Thursday, April 16, in the Faculty Dining Room.

Having earned both his bachelor's and his master's degree from the University of Chicago, Prof. Oggins is currently working on his doctorate in English Falconry. Although a relative newcomer to the Triple Cities (he came to Harpur in 1962), this is his second speaking engagement on the Tech campus. In 1962, Prof. Harold Hickey of our Liberal Arts Department asked Professor Oggins to be a guest speaker in his Development of Western Civilization class. The talk was very well received by the students.

## Frosh Class Needs Veep

The Freshmen Class has already started making plans for its Senior Year. However, there is one drawback to an effective class program. Due to Paul Weaver's withdrawal from school, there is a vacancy in the Vice-Presidency of the Freshman Class.

If any member of the class of '65 is interested in filling this vacancy, please contact Michael O'Connell, President. He will then refer your name to the Executive Committee. After an interview with the Executive Committee, they will vote on the applicant according to the constitution.

It is very important that we have a qualified Vice-President to help carry out the upcoming events which include plans for the graduation tea, Freshmen Orientation and continuation of the Sub program.

# Baseball, Golf, Tennis Bloom At Broome

## Baseball Nucleus Returns

by John Fiato

Rene Valentine opens his fifth and final season as head coach of the Hornets' baseball team on April 15. At the end of the school year, Rene will leave Broome Tech to become athletic director and basketball coach at Jefferson Community College.

In four previous seasons at the helm, he had compiled an excellent 37-17 coaching record in baseball.

Four veterans return to provide a nucleus for this year's team. John Phelps will head a potentially strong pitching staff. Last year John finished with a 5-1 record while hurling 37 straight scoreless innings during one stretch.

Dave Lewis will supply the Hornets with a top notch catcher. Last year he batted .314, second best on the club. Bill Skojec returns at third base and adds power to the lineup. John Petrosky, who came on strong at bat last year, will take over graduate Ken Moses' spot in center field.

Rene has two new highly regarded pitchers, Doug Fredricks and Wally Rezucha. Both are lefthanders to make them the first two lefties Valentine has had in his five seasons as coach. Both have proven themselves in high school and are strong hitters.

The infield will be filled with either Elmer Burruss or Bob Laughlin at second, where John Cregier has left a gap, and Tom Smith or Dennis Cliff at short, where Remza played last year.

First base material will probably come from among the pitchers when they are not pitching. Lou DeSantis can catch or play first base when needed.

Len DeSantis and Bruce Burnett, good hitters, will play in the outfield on either side of Petrosky.

A team loss in speed caused by the graduation of Cregier and Moses, and untried hitting seem to be coach Valentine's only concern, although Rene says the hitting will shape up with practice. (There were only two practices when this article went to press).

John Phelps, who will lead a strong Tech pitching staff.

## Impressive Golf Prospects Led By Rinker and Hrustich

by Don Purtell

On April 18, Broome Tech's golf team will open its season in hopes of improving on last year's fourth place finish in Region 3.

With three lettermen returning and a crop of fine looking prospects, faculty adviser Dick Baldwin feels he has the best prospects available since 1960, when Broome tied for the Eastern States title.

Returning from last year's varsity are Bob Finch, Jim McKiernan and Warren Brooks. Brooks was Broome's top winner in 1963, compiling a 4-3 record.

Broome's best looking prospect is Duane Rinker. Duane, a former club champion at State Park, used up one year of eligibility at Florida State. Shooting consistently in the 70's, he is respected as one of the top amateurs in this area.

Other good looking prospects are Mike Hrustich, who also shoots consistently in the 70's, Bob Lesko, Fred Howie and

Duane Rinker displays follow-through that Hornet fans hope will lead Broome's golf team to victory this spring.

Bill and Joe Mee.

Currently, practices have been hampered by adverse weather conditions. As soon as conditions are favorable, an 18 hole qualifying round will be held to determine starting berths.

Mr. Baldwin will carry 10 men, including five starters. Starting positions will likely rotate throughout the season, due to Baldwin's unique "ladder system". This system enables the substitutes to take over starting positions by competing against golfers above them.

### Golf Schedule

April 18 at Cornell Frosh; April 21, Keystone Junior College; April 27 at Onondaga C.C.; \*April 30, Mohawk Valley and Auburn C.C.

May 6, Cobleskill; May 8 at Auburn C.C.; May 14 at Delhi Tech; May 18, Region III Tourney at Onondaga.

June 1-4, National Golf Tourney.

\*Triangular Meet

## Tennis Turnout Is Poor

by Ron Purtell

Discouragement — this seems to be the by-word in describing the turnout for the newly initiated varsity tennis team at Broome Tech. Ed Daub, who will be taking over coaching duties of this spring sport, has expressed his disappointment at the lack of desire and interest in tennis on the campus.

A minimum of six players was needed to complete the team, and after Coach Daub held his initial meetings with those who were interested, he found that there were only six players trying out.

Nevertheless, Coach Daub believes that after excluding the incentive problem, the '64 tennis team shows some strong promise. Leading the squad will be Phil Meagley who achieved a strong tennis reputation at Oneonta High School. Paul Okoniewski and Pete Wilcox, both Central High graduates, Mike O'Connell, Charles Krupnick and Bob Walluk round out the squad.

The team, which is presently working out inside, will be playing a couple of exhibition matches (at least one against Harpur) before the opening match on April 25 at Onondaga Community College. Broome's first home game on the newly built courts behind the SUB will be on April 30 against Mohawk Valley.

# L.A. Seniors Lead Men's, Women's Intramurals

## Men's

Business Seniors B wrapped up the intramural basketball championship with a decisive 44-32 victory over Liberal Arts Frosh A entry. Led by Jim Hotchkiss, the Business Seniors utilized board strength and accurate shooting to overcome the aggressive floor play of Liberal Arts.

Tom Heslin, who kept his team in contention in the first half, contributed 14 points in the losing cause. Heslin demonstrated great poise and ability around the basket and should be a good prospect for next year's Hornets.

Experience proved to be the most vital factor in the Business Seniors victory. Most of their players have had varsity or Muni League experience. Hotchkiss led all scorers with 21 points. Pete Wilcox also contributed 14.

Business Frosh B (14-2) took third place in the playoffs. Winning the consolation bracket enabled Liberal Arts Seniors A (10-7) to finish in fourth place.

As of April 1, Liberal Arts Seniors held a slim lead for the coveted President's trophy. Liberal Arts has maintained this lead throughout the year and are determined to hold their position. Ironically, Liberal Arts Frosh pose their stiffest competition. This intra-curriculum race should prove interesting throughout the term.

Mr. Daub is taking over intramurals for the spring term. All rosters and questions concerning intramurals must be directed to him.

President's Trophy Standings:

Curriculum	Points
Liberal Arts Seniors A	351
Liberal Arts Frosh A	325
Electrical Seniors	271
Engineering	
Science Frosh	266

## Women's

With the start of a new semester, girls intramurals will begin a new series of activities. The remaining events, in order, badminton, softball and tennis.

The last intramural event was aerial tennis and the first three teams were:

- 1) D.H. Freshmen
- 2) M.O. Freshmen
- 3) L.A. Seniors

The bowling scores are not tallied because the participants

have not submitted their scores to Miss Davies.

Thus far, competition for the trophy is as follows:

L.A. Seniors	350 points
L.A. Freshmen	174 points
D.H. Freshmen	313 points
Bus. Freshmen	116 points
M.O. Freshmen	157 points

The winning team at the end of this semester will acquire a trophy to be placed in their building with their members' names on it.

## ABC: Director of Sports Activities at Tech

What is the ABC? The Athletic Board of Control at Broome Tech is composed of five members: three faculty representatives, a student representative and the athletic director. These five set the policy for the athletic program of the college.

This means the Board is involved in anything to do with athletics, such as varsity intercollegiate sports, intramural sports, cheerleading and the athletic awards banquet.

The board approves the budget for each sport and approves the schedules for the various intercollegiate sports. The board also checks into the amount of time athletes miss from classes. It strives to keep to a minimum the time absent from class.

Another important function is checking into the eligibility of a student for varsity sports. The board also decides if a varsity team from Broome Tech should participate in any regional or national tournament.

Probably one of the best known functions of the ABC is

the sports award banquet. Here trophies are awarded to the outstanding athletes in the various varsity sports and the President's trophy to the winning intramural entry.

If a student or faculty member has any questions or opinions on the athletic program, he should contact one of the members of the board.

Board personnel are:

Mr. Richard Baldwin, Athletic director.

Faculty members — Mr. David Fergus (Chairman), Mr. Warren Hoyt and Mr. Michael Kapral.

Student representative—Bob Walluk.

## Seniors, Frosh Have No Veep

The resignation of Jack Kellogg and the withdrawal of Paul Weaver have left both the senior and the freshman classes without vice-presidents.

Kellogg handed in his resignation to devote more time to

## NYU Offers AA Degree

The fact that NYU is offering an Associate in Arts degree (equivalent to two years in Liberal Arts at Broome) points out the fact that education has become vital and that the two-year degree is being looked to as the answer to many problems.

The program at NYU is for night students only, at present, and requires the student to attend classes two nights a week, for four years. This program, obviously, is geared for adult students who feel the pressures caused by a lack of education.

The differences in the program offered at NYU and the one at Broome Tech lie in the fact that they are geared for different needs: Tech's program gives younger students a relatively inexpensive two-year background for a four-year degree; NYU, on the other hand, is interested in providing an educational background for people already earning a living. It may, but not necessarily, be used as a start toward a Bachelors degree.

At any rate it appears as though the two-year degree may provide many answers to the nation's educational needs.

his studies. Any senior wishing to run for this office is requested to attend the next meeting of the Senior Executive Committee to be held Monday, April 13 in E 102.
